

Rotator Cuff Disorders: Basic Science and Clinical Medicine

Table of Contents

Chapter 1 – Anatomy and embryology

Francisco Forriol-Campos, Research Unit FREMAP Hospital, Madrid, Spain

Chapter 2 – Surgical anatomy and rotator cuff tear pattern

Francesco Franceschi, Bio-Medico University, Rome, Italy

Chapter 3 – Why does it fail? The pathophysiology of rotator cuff disease

Gerald R Williams, Thomas Jefferson University, Philadelphia, USA

Chapter 4 – Epidemiology and genetic basis of rotator cuff pathology

Nicola Maffulli, London, UK

Chapter 5 – Rotator Cuff biomechanics

Giuseppe Porcellini, D. Cervesi Hospital, Cattolica, Italy

Chapter 6 – Physical examination

Edward G McFarland, John Hopkins University, Baltimore, USA

Chapter 7 – Imaging of the rotator cuff

Javier Beltran, New York University, New York, USA

Chapter 8 – Partial rotator cuff tears

Rocco Papalia, Bio-Medico University, Rome, Italy

Chapter 9 – The overhead athlete

Marc Safran, Stanford University, Stanford, USA

Chapter 10 – SLAP lesions and tendinopathy of the long head of the biceps

Jeffrey S Abrams, Princeton Orthopaedic Associates, Princeton, USA

Chapter 11 – Full thickness rotator cuff tears

Leonardo Osti, Hesperia Hospital, Modena, Italy

Chapter 12 – Subscapularis tears

Jon J P Warner, Massachusetts General Hospital, Boston, USA

Chapter 13 – Rotator cuff arthropathy and glenohumeral arthritis: prevention and treatment

Andrea Grasso, Rome, Italy

Chapter 14 – Single vs double row repairs

Joshua S Dines, Hospital for Special Surgery, New York, USA

Chapter 15 – Growth factors and tendon healing

Francesco Oliva, Università degli Studi di Roma, Italy

Chapter 16 – Rotator cuff orthobiologics

Raffaele Garofalo, Università degli Studi di Bari, Italy

Chapter 17 – Synthetic augmentation of massive rotator cuff tears

Giuseppe Longo, Bio-Medico University, Rome, Italy

Chapter 18 – Platelet rich plasma: does it help tendon healing?

Omer Mei Dan, Meir University Hospital, Kfar-Saba, Israel

Chapter 19 – Outcome measures

Giuseppe Longo, Bio-Medico University, Rome, Italy

Chapter 20 – Tissue engineering: the future of rotator cuff repair surgery

Scott A Rodeo, Hospital for Special Surgery, New York, USA
