

## Table of Contents

1	Abnormality of the genital tract
2	Amenorrhoea, primary and secondary
3	Cancer of the cervix
4	Cervical screening
5	Chemotherapy
6	Chronic pelvic pain
7	Contraception I: male and female sterilisation (including technique)
8	Contraception II: reversible methods
9	Dyspareunia
10	Ectopic pregnancy
11	Endometriosis
12	Female genital mutilation
13	Fibroids (including interventional radiology)
14	Fistulae in obstetrics and gynaecology
15	Forensic gynaecology (rape/sexual assault)
16	Genital prolapse
17	Gestational trophoblastic disease
18	Hirsutism
19	Hormone replacement therapy
20	Human papillomavirus (HPV) vaccination
21	Hysterectomy (including abdominal, vaginal and laparoscopic, and technique)
22	Imaging in Gynaecology
23	Infertility - I
24	Infertility - II
25	Intermenstrual, post coital and post menopausal bleeding
26	Male subfertility
27	Menopause
28	Menorrhagia
29	Menstrual cycle physiology
30	Minimally access surgery (including laparoscopy and hysteroscopy)
31	Miscarriage
32	Ovarian cancer (including FT cancer)
33	Ovarian cysts
34	Paediatric gynaecology
35	Pelvic inflammatory disease
36	Perioperative complications in obstetrics and gynaecology
37	Polycystic ovarian syndrome
38	Pre- and post-operative care and the enhanced recovery programme
39	Premenstrual syndrome
40	Pruritis vulvae and vulval pain
41	Radiotherapy
42	Risk management in gynaecology
43	Sexual function
44	Sexually transmitted infection
45	Termination of pregnancy
46	Urinary incontinence: incontinence and retention
47	Urinary incontinence: urodynamics
48	Uterine tumours
49	Vaginal discharge

- 50 Vaginal tumours
- 51 Vulval cancer
- 52 Vulval diseases

#### OBSTETRICS

- 53 Amniotic fluid embolus
- 54 Anaemia in pregnancy (including sickle cell)
- 55 Analgesia/anaesthesia in labour
- 56 Antenatal care
- 57 Antepartum haemorrhage (including praevia & abruption)
- 58 Blood transfusion
- 59 Breech presentation (including ECV)
- 60 Caesarean section
- 61 Cancer in pregnancy
- 62 Cardiac disease in pregnancy
- 63 Changes to maternal physiology during pregnancy
- 64 Coagulation and pregnancy
- 65 Cord prolapse
- 66 Diabetes and pregnancy
- 67 Dysfunctional labour
- 68 Epilepsy in pregnancy
- 69 Fetocide and late TOP
- 70 HIV in pregnancy
- 71 Hydrops fetalis
- 72 Induction of labour
- 73 Infection in pregnancy (including herpes simplex and varicella)
- 74 Instrumental delivery
- 75 Intrauterine growth restriction
- 76 Invasive fetal testing (including amniocentesis and CVS)
- 77 Malpresentation and malposition
- 78 Maternal death
- 79 Monitoring in labour
- 80 Morbidly adherent placenta (including retained placenta, vasa praevia and placenta accreta)
- 81 Multiple pregnancy
- 82 Neonatal resuscitation
- 83 Normal labour
- 84 Obstetric cholestasis (including acute fatty liver of pregnancy)
- 85 Perineal repair (including technique)
- 86 Polyhydramnios/oligohydramnios
- 87 Post-partum haemorrhage
- 88 Pre-eclampsia and eclampsia
- 89 Premature labour
- 90 Preterm rupture of the membranes (PROM)
- 91 Prolonged pregnancy
- 92 Puerperal psychosis and postnatal depression
- 93 Puerperium and breastfeeding
- 94 Reduced fetal movements
- 95 Renal disease in pregnancy
- 96 Rhesus disease
- 97 Risk management in Obstetrics
- 98 Sepsis
- 99 Shoulder dystocia

- 100 Stillbirth
- 101 Teratogenic agents
- 102 Thyroid and pregnancy
- 103 Vaginal birth after caesarean section
- 104 Venous thromboembolism

#### ADDITIONAL TOPICS

- 105 Asthma in pregnancy
- 106 Fertility preservation
- 107 Cervical incompetence and cervical suture
- 108 Recurrent miscarriage
