<i>Foreword</i>	v
<i>Preface</i>	vii
<i>Acknowledgements</i>	xii

Chapter 1 Clinical skills in neurology

1.1	The consultation	1
1.2	The neurological history	1
1.3	The neurological examination	4
1.4	Case summary and synthesis	5
1.5	Describing and referring cases	6
1.6	The junior doctor's neurology toolkit	7
1.7	Ethicolegal considerations	8

Chapter 2 Gait and general inspection

2.1	Anatomy and physiology review	9
2.2	Clinical features and pathophysiology	14
2.3	General inspection	19
2.4	Abnormal posture and movements	21
2.5	Assessing gait	25
2.6	System summary	28

Chapter 3 Head and neck (cranial nerves)

3.1	Objectives	29
3.2	Anatomy and physiology review	29
3.3	Clinical features and pathophysiology	41
3.4	General observations	54
3.5	The nose (CN I)	56
3.6	The eyes: part 1 (CN II and III) - pupils, acuity, fields and fundi	57
3.7	The eyes: part 2 (CN III, IV and VI)	65
3.8	The face (CN V, VII)	68
3.9	The ears (CN VIII)	74
3.10	The mouth (CN IX, X, XII)	78
3.11	The neck (CN XI)	80
3.12	System summary	82

Chapter 4 Upper limb

4.1	Objectives	83
4.2	Anatomy and physiology review	83
4.3	Clinical features and pathophysiology	92
4.4	General observations	95
4.5	Tone	96
4.6	Power	97
4.7	Reflexes	104
4.8	Co-ordination	106
4.9	Sensation	107
4.10	System summary	112

Chapter 5 Lower limb

5.1	Objectives	113
5.2	Anatomy and physiology review	113
5.3	Clinical features and pathophysiology	117
5.4	General observations	119
5.5	Tone	120
5.6	Power	120
5.7	Reflexes	125
5.8	Co-ordination	129
5.9	Sensation	130
5.10	System summary	136

Chapter 6 Cerebellum

6.1	Objectives	137
6.2	Anatomy and physiology review	137
6.3	Clinical features and pathophysiology	139
6.4	General observations	140
6.5	VANISHD	141
6.6	System summary	147

Chapter 7 Higher cortical function

7.1	Objectives	149
7.2	Anatomy and physiology review	150
7.3	Clinical features and pathophysiology	152
7.4	Bedside testing of cognitive domains	155
7.5	System summary	165

Chapter 8 Autonomic nervous system	
8.1 Objectives	167
8.2 Anatomy and physiology review	167
8.3 Clinical features and pathophysiology	170
8.4 History	172
8.5 Bedside examination and tests	172
8.6 System summary	175
Chapter 9 Examining the stroke patient	
9.1 Objectives	177
9.2 Anatomy and physiology review	177
9.3 Clinical features and pathophysiology	179
9.4 Stroke: history	183
9.5 Stroke: neurological examination	186
9.6 Stroke: general examination	187
9.7 Acute stroke treatments	189
9.8 System summary	192
Chapter 10 Examining the coma patient	
10.1 Objectives	193
10.2 Anatomy and physiology review	193
10.3 Clinical features and pathophysiology	193
10.4 General observations	198
10.5 Eyes and reflexes	200
10.6 System summary	204
Chapter 11 The neurological screening examination in 4 minutes	
11.1 Objectives	205
11.2 Sequence	205
Chapter 12 The neurological examination in undergraduate exams	
12.1 Objectives	207
12.2 Common conditions in examinations	207
12.3 Examination instructions	208
12.4 Questions and answers	208
Further reading	211
Index	213
