|------------------------------------------------------------|--------------|
| <b>1. From Here and There</b>                              | <b>1-9</b>   |
| • Standard Hospital                                        | 2            |
| • Measurements, Temperatures,                              | 3            |
| • Fever                                                    | 4            |
| • Pulse Types, Variations                                  | 5            |
| • Respiration Types and Variations.                        | 7            |
| • Blood Pressure                                           | 8            |
| • Neurological Examination                                 | 9            |
| <b>2. Clinical Studies</b>                                 | <b>10-18</b> |
| • Urine                                                    | 10           |
| • Motion                                                   | 12           |
| • Conditions in the Mouth                                  | 12           |
| • Types of Diets                                           | 13           |
| • Tube Feedings.                                           | 14           |
| • Calculation of Milk Formula                              | 14           |
| • Exercises and Types.                                     | 15           |
| • Enema or Clysis and Types                                | 16           |
| <b>3. Physiological or Primary Effect of heat and Cold</b> | <b>19-21</b> |
| <b>4. Comparative Studies</b>                              | <b>22-29</b> |
| <b>5. Neurological Assessment</b>                          | <b>30-39</b> |
| <b>6. Reasoning</b>                                        | <b>40-53</b> |
| <b>7. Special Procedures</b>                               | <b>54-75</b> |
| • Central Venous Pressure                                  | 54           |
| • Right Arterial Pressure                                  | 55           |
| • Pulmonary Artery Pressure                                | 56           |
| • Pulmonary Capillary Wedge Pressure                       | 57           |

|                                                       |    |
|-------------------------------------------------------|----|
| • Measurement of Cardiac Output by _____              | 57 |
| Thermodilution Method                                 |    |
| • Cardiac Index _____                                 | 59 |
| • Respiratory Tidal Volume _____                      | 59 |
| • Compressed Spectral Array _____                     | 59 |
| • Neurometric Monitors _____                          | 59 |
| • Intraoperative Monitoring Somatosensory. _____      | 59 |
| • Ultrasound _____                                    | 60 |
| • CT Scan _____                                       | 63 |
| • MRI _____                                           | 64 |
| • Brain Scan _____                                    | 64 |
| • Cerebral Angiography _____                          | 65 |
| • Electroencephalography _____                        | 65 |
| • Positron Emission Tomography _____                  | 66 |
| • Single Photon Emission Computed Tomography _____    | 66 |
| • Evoked Potential Studies _____                      | 66 |
| • Cerebral Angiography _____                          | 66 |
| • Inventional Angiography _____                       | 66 |
| • Lumbar puncture _____                               | 66 |
| • Cisternal puncture _____                            | 68 |
| • Myelography and Electromyelography _____            | 68 |
| • Bone Scan, Arthroscopy and Arthrocentesis _____     | 68 |
| • ECG or EKG _____                                    | 69 |
| • Cardiac Catheterization _____                       | 73 |
| • Coronary Arteriography and Cardiac Monitoring _____ | 74 |

**8. Blood Values \_\_\_\_\_ 76-89**

**9. Special Values and Procedures \_\_\_\_\_ 90-103**

|                                     |    |
|-------------------------------------|----|
| • Serum Acid Base Status _____      | 90 |
| • Combs' Test _____                 | 91 |
| • Pace Makers _____                 | 91 |
| • Erythema neonatorum Toxicum _____ | 93 |
| • Diastasis Recti _____             | 93 |
| • Postpartum blue _____             | 93 |
| • Acrocyanosis _____                | 94 |
| • Silver Man's Score _____          | 94 |

|                                                       |                |
|-------------------------------------------------------|----------------|
| • Ortolani's Sign _____                               | 94             |
| • Tocolysis _____                                     | 94             |
| • "5 Ps" of Neurovascular Assessment _____            | 94             |
| • Croup _____                                         | 94             |
| • Common Knee Injuries _____                          | 94             |
| • Infrared Thermometer _____                          | 94             |
| • Beating Heart Coronary Bypass Surgery _____         | 95             |
| • Ruptured Heart _____                                | 96             |
| • Painless Surgery For DUB _____                      | 96             |
| • Endometrial Laser Intrauterine Thermotherapy _____  | 96             |
| • Brain Stroke _____                                  | 96             |
| • Contiform _____                                     | 97             |
| • Ultrasound and Doppler Methods _____                | 97             |
| • 87 Access Immuno Assay System _____                 | 98             |
| • Lasik Eye Surgery _____                             | 98             |
| • Guthrie Test _____                                  | 100            |
| • GIFT or Gamete Intrafallopian Transfer _____        | 100            |
| • Mayer-Robitansky-Kyster-Hauser Syndrome _____       | 100            |
| • Galactorrhea, Galactagogue, Galactacrasia, _____    | 100            |
| Galactobolic, Galactocele, Gynandrisms,               |                |
| Gilliam's Operation, Haematocolpos, Hidradenoma,      |                |
| Hydropic Abortion                                     |                |
| • Osteoporosis _____                                  | 101            |
| • Deep Brain Stimulation _____                        | 103            |
| <b>10. Differences and Definitions _____</b>          | <b>104-114</b> |
| <b>11. Medical News or Updates _____</b>              | <b>115-130</b> |
| • New Treatment for Cardiac Arrhythmias _____         | 115            |
| • New Drug Eluting Stent _____                        | 116            |
| • Surgical Weight Loss _____                          | 116            |
| • Cytotron _____                                      | 117            |
| • Rotational Field Quantum Magnetic Resonance _____   | 117            |
| • Surgical Treatment for Menorrhagia. _____           | 117            |
| • Cochlear Implant _____                              | 118            |
| • Three-dimensional Cardiovascular Carotography _____ | 118            |
| • A Camera in a Capsule to Find Abnormalities _____   | 119            |
| in the Intestines.                                    |                |
