

Contents

Section 1 BIOCHEMISTRY

1. Introduction	3
2. Biochemical Composition of Cells	6
3. Enzymes	37
4. Techniques in Biochemical Studies	58

Section 2 CELL BIOLOGY

5. Introduction	99
6. Cell Architecture and Cell Organelles	106
7. Cytoskeleton	139
8. Cilia and Flagella	146
9. Cell Senescence	150
10. Protein Biosynthesis—Transcription and Translation	153
11. Oncogenes	164

Section 3 GENETICS

12. Classical Genetics	171
13. Nucleic Acids	194
14. Chromosomes	206
15. Cell Division	219
16. Chromosomal Aberrations	234
17. Sex Determination	246
18. Cytogenetics and Human Disease	250
19. Basic Microbial Genetics	256
20. Mutations	260

Section 4 MICROBIOLOGY AND IMMUNOLOGY

21. History of Microbiology	275
22. Microscopy	279
23. Sterilization and Disinfection	290

24. Basis of Taxonomy	310
25. Anatomy of the Bacterial Cell	319
26. Immunology	330
27. Body's Defence Against Viruses.....	346
28. Interaction between Micro-organisms	352
29. Nitrogen Metabolism.....	356
30. Photosynthesis	363
31. Industrial Microbiology	377
