|                                                                                              |    |
|----------------------------------------------------------------------------------------------|----|
| 1. Introduction .....                                                                        | 1  |
| 2. The X-ray Film .....                                                                      | 5  |
| 3. Sensitometric Characteristics of X-ray Film<br>(Emulsion) .....                           | 8  |
| 4. The Sensitometric Curve .....                                                             | 11 |
| 5. The Developable Latent Image Formation on<br>X-ray Film .....                             | 16 |
| 6. Density and Contrast: What do they Signify? .....                                         | 19 |
| 7. X-ray Film Processing .....                                                               | 26 |
| 8. Composition of Developer .....                                                            | 30 |
| 9. Other Stages of Processing .....                                                          | 35 |
| 10. The Factors Affecting the Quality of the<br>Radiographs in the Processing Stage. ....    | 39 |
| 11. Developer Replenishment Guidelines .....                                                 | 43 |
| 12. Fixing Bath .....                                                                        | 46 |
| 13. Physical and Geometric Factors .....                                                     | 50 |
| 14. Effects of Physical and Geometrical Factors on the<br>Quality .....                      | 55 |
| 15. The Four Important Factors .....                                                         | 59 |
| 16. The Safe Lights .....                                                                    | 65 |
| 17. Intensifying Screen and Latent Image<br>Formation .....                                  | 70 |
| 18. Intensifying Screens and Cassettes .....                                                 | 84 |
| 19. Automatic Machine Processing and Manual<br>Processing of X-ray Films: A Comparison ..... | 91 |

**x Medical Radiographic Techniques and Dark Room Practices**

---

|                                                                     |     |
|---------------------------------------------------------------------|-----|
| 20. Automatic Film Processor: Merits and Demerits .....             | 94  |
| 21. Unexplained Ghost Images, Fog Bands on<br>Radiographs .....     | 97  |
| 22. X-ray Film Storage .....                                        | 100 |
| 23. Technical People are Part of the Medical Team .....             | 105 |
| 24. The Balancing Act .....                                         | 108 |
| 25. Radiographic Techniques .....                                   | 111 |
| 26. Some Medical Terminology: Terms .....                           | 145 |
| 27. Low Level Radiation: Some Facts .....                           | 159 |
| 28. A Brief Note on other Kinds of Medical Imaging<br>Systems ..... | 163 |
| <i>Index</i> .....                                                  | 167 |
