

CONTENTS

1. Radiophysics	1
2. Age Verification with Medicolegal Implications	11
3. Anatomical Considerations of Bones and Joints	15
4. Congenital and Chromosomal Disorders	21
5. Diseases of the Spine	57
6. Radiologic Approach to Bone Dysplasias	69
7. Fractures	111
8. Imaging in Bone Tumors	125
9. Disorders of the Joints	189
10. Imaging in Musculoskeletal Infections	225
11. Imaging in Hematological and Vascular Disorders	241
12. Imaging in Metabolic and Endocrine Disorders	259
13. Imaging of Skull and Orbit	279
14. Periosteal Reaction	295
15. Bone Metastasis	301
16. Dental Radiography	311
17. Various Signs in Radiology	325
18. Differential Diagnosis in Vertebral Radiology	345

19. Common Causes of Bony Lesions	355
20. Differentiating Tables	373
21. How to Report X-rays of Bones/Joints	385
22. Radiation Changes in Bone	389
23. Magnetic Resonance Spectroscopy (MRS)	395
24. Radionuclide Bone Imaging	411
25. Positron Emission Tomography (PET)	423
