

CONTENTS

Section One: Laser Surgery of the Retina and Choroid

1. Practical Considerations—Laser Application	3
2. Panretinal Photocoagulation (PRP) in Diabetic Retinopathy	21
3. Photocoagulation (Focal/Grid) in Diabetic Maculopathy	35
4. Photodynamic Therapy (PDT)	45
5. Transpupillary Thermotherapy (TTT)	53
6. Photocoagulation in Peripheral Retinal Degenerations and Tears	59
7. Photocoagulation in Peripheral Chorioretinal Tumors	67
I. Angiomas Retinae	68
II. Retinoblastoma	72
III. Malignant Melanoma	76
8. Photocoagulation in Retinal Venous Occlusion	81
9. Photocoagulation in Miscellaneous Retinal Diseases	89
I. Retinal Vasculitis	90
II. Central Serous Choroidopathy	94
III. Retinopathy of Prematurity	97

Section Two: Laser Surgery in Glaucoma and on Iris

10. Argon Laser Trabeculoplasty (ALT)	107
11. Selective Laser Trabeculoplasty (SLT)	115
12. Argon Laser Iridotomy	123
13. Nd: YAG Laser Iridotomy	129
14. Laser Peripheral Iridoplasty(LPI)/ Gonioplasty	137
15. Argon Laser Pupilloplasty/Photomydriasis	143

16. Nd:YAG Photomydriasis/Iridohyaloid Synechialysis	149
17. Nd: YAG Coreoplasty	153
18. Nd: YAG Persistent Hyperplastic Pupillary Membranectomy	159
19. Nd: YAG Anterior Hyaloidectomy and Cyclophotocoagulation	165

Section Three: Laser Surgery on Lens and in Pupillary Area

20. Nd: YAG Posterior Capsulotomy	173
21. Nd: YAG Sweeping	195
22. Nd: YAG Corticolysis	199
23. Nd: YAG Membranectomy	203
24. Miscellaneous Anterior Segment Applications	207

Section Four: Laser Surgery on Vitreous

25. Nd: YAG Anterior Segment Vitreolysis	217
26. Nd: YAG Posterior Segment Vitreolysis	223
