|-------------------------------------------------------------|------------|
| <b>SECTION 1: ANATOMY</b>                                   | <b>1</b>   |
| 1. Eyeball                                                  | 3          |
| 2. The Cornea                                               | 17         |
| 3. The Lens                                                 | 23         |
| 4. The Vitreous                                             | 27         |
| 5. The Uveal Tract                                          | 29         |
| 6. Lymphatic Drainage of the Eye                            | 38         |
| 7. Retina                                                   | 39         |
| 8. The Orbit                                                | 49         |
| 9. Extraocular Muscles (Extrinsic Muscles)                  | 55         |
| 10. Cranial Nerves Connected with the Eye                   | 64         |
| 11. Pituitary Gland and the Hypophysis Cerebri              | 89         |
| <b>SECTION 2: BIOCHEMISTRY</b>                              | <b>107</b> |
| 12. General Biochemistry of the Eye                         | 109        |
| 13. Biochemistry of Individual Ocular Tissue                | 126        |
| <b>SECTION 3: OCULAR PATHOLOGY</b>                          | <b>181</b> |
| 14. Ocular Pathology                                        | 183        |
| <b>SECTION 4: PHARMACOLOGY</b>                              | <b>231</b> |
| 15. Routes of Administration of Drugs for Ocular Conditions | 233        |
| 16. Anti-inflammatory Agents                                | 237        |
| 17. Antiallergic Drugs                                      | 244        |
| 18. Drugs Used for Dry Eyes and Corneal Edema               | 246        |
| 19. Antibiotics                                             | 249        |
| 20. Antivirals                                              | 255        |
| 21. Antifungal Agents                                       | 258        |
| 22. Antihypertensives                                       | 260        |
| 23. Parasympathomimetics, Mydriatics and Mydriolytics       | 264        |

|                                       |            |
|---------------------------------------|------------|
| 24. Cycloplegics                      | 270        |
| 25. Local Anesthetics                 | 274        |
| 26. Fluorescein Sodium and Other Dyes | 282        |
| 27. Irrigating Solutions              | 287        |
| 28. Vitreous Substitutes              | 289        |
| 29. Medical Management of Glaucoma    | 293        |
| 30. Viscoelastics                     | 306        |
| 31. Diabetes Mellitus                 | 308        |
| <b>SECTION 5: PHYSIOLOGY</b>          | <b>311</b> |
| 32. Physiology                        | 313        |
| <b>SECTION 6: MICROBIOLOGY</b>        | <b>335</b> |
| 33. Microbiology                      | 337        |
