

Contents

1. GETTING INTRODUCED TO PHYSIOLOGY	1
• The Unicellular Organism 1	
• Multicellular Organisms 3	
<i>What About the Other Systems?</i> 5	
• Principles of Regulation: Control Systems 6	
<i>Response Characteristics of a Control System</i> 8; <i>Additional Complexities in Control Systems</i> 8	
• Physiology as the Basis of Medicine 9	
2. FUNDAMENTALS OF CELL BIOLOGY	14
• The Cell Membrane 15	
<i>Cell Junctions</i> 16	
• The Organelles 17	
<i>Rough Endoplasmic Reticulum</i> 17; <i>Smooth Endoplasmic Reticulum</i> 17; <i>The Golgi Complex</i> 18; <i>Lysosomes</i> 19; <i>Peroxisomes</i> 19; <i>Mitochondria</i> 20; <i>Cytoskeletal Elements</i> 21	
• Inclusions 22	
• Nucleus 22	
• Communication Between Cells 23	
• Cell Division 24	
<i>Mitosis</i> 24; <i>Meiosis</i> 25	
• Genetics 26	
<i>Molecular Basis of Genes</i> 27; <i>The Basis of Similarity and Variety</i> 27; <i>Regulatory Genes</i> 29; <i>Inheritance of Characteristics</i> 29; <i>Modes of Inheritance</i> 29; <i>Appearance of New Characters</i> 30; <i>The Human Genome Project</i> 31	
3. PHYSICOCHEMICAL PRINCIPLES OF BIOLOGICAL TRANSPORT	34
• Passive Transport 34	
<i>Simple Diffusion</i> 34; <i>Facilitated Diffusion</i> 35; <i>Osmosis</i> 36; <i>Ultrafiltration</i> 37; <i>Dialysis</i> 37	
• Active Transport 37	
<i>Secondary Active Transport</i> 38	

4. BLOOD

41

- **Plasma 41**
Plasma Proteins 42
- **Red Blood Cells 43**
- **Anemia 44**
Causes of Anemia 44; Iron Deficiency Anemia 45; Folic Acid and Vitamin B₁₂ Deficiency Anemias 45
- **Jaundice 47**
Physiological Jaundice 48
- **White Blood Cells 48**
Types of WBC 48
- **Immune Mechanisms 49**
Innate Immunity 49; Acquired Immunity 50; Vaccines 53
- **Platelets 53**
- **Coagulation 54**
Dissolution of the Clot 55; Vitamin K and Coagulation 55; Anticoagulants 55; Hemophilia 55
- **Hemopoiesis 56**
Regulation of Erythropoiesis 57
- **Blood Groups 57**
ABO System 57; Blood Transfusion 58

5. CARDIOVASCULAR SYSTEM

62

- **The Route of Circulation 62**
- **Cardiac Muscle 64**
Pacemaker and Conduction Tissue 64
- **Resting Membrane Potential 64**
Potassium 65; Chloride 65; Sodium 66; Proteins 67
- **Action Potential 67**
Pacemaker Potential 68; Ionic Basis of Action Potential 68
- **The Cardiac Impulse 69**
- **Properties of Cardiac Muscle 69**
Automaticity 69; Rhythmicity 69; Long Refractory Period 70; All or None Law 70; Length-tension Relationship 70
- **Electrocardiography 70**
Configuration of the ECG 72; The ECG Leads 74; Configuration of the Electrocardiogram 76; Electrical Axis of the Heart 76

- **Cardiac Cycle** 77
- **Cardiac Output** 79
 - Determination of Cardiac Output* 80; *Factors Affecting Cardiac Output* 80
- **Arteries** 81
- **Capillaries** 82
 - Fluid Exchange Across Capillaries: Starling's Hypothesis* 83
- **Lymphatics** 84
 - Functions of Lymphatics* 84
- **Edema** 84
- **Veins** 84
 - What Keeps Blood Flowing in the Veins* 84
- **Regulation of Cardiovascular Function** 85
 - Neural Center for Cardiovascular Regulation* 85; *Mediation of Effects of Cardiovascular Centers* 86; *Baroreceptor Reflex* 88; *Chemoreceptor Reflex* 88; *CNS Ischemic Response* 88; *Local Regulation* 88; *Factors Affecting Blood Pressure* 89; *Regulation of Blood Pressure* 90; *Hypertension* 90
- **Coronary Circulation** 91
 - Regulation of Coronary Blood Flow* 92
- **Coronary Artery Disease** 92
- **Shock** 92
 - Hypovolemic Shock* 93; *Cardiogenic Shock* 93; *Neurogenic Shock* 93; *Anaphylactic Shock* 93; *Septic Shock* 93

6. RESPIRATORY SYSTEM

96

- **Functional Anatomy** 96
 - Volumes and Capacities* 96; *Some More Volumes Relevant to Pulmonary Physiology* 99
- **Mechanics of Breathing** 100
 - Inspiration* 101; *Expiration* 102; *Thoracic, Abdominal and Clavicular Breathing* 103; *Respiratory Pressures* 104; *Compliance* 105
- **Oxygen Transport** 105
 - Diffusion* 106; *Dalton's Law of Partial Pressures* 106; *Oxygen Transfer in the Lungs* 106; *Oxygen Transport in Blood* 107; *Oxygen Transfer in the Tissues* 108
- **Carbon Dioxide Transport** 108
 - Carbon Dioxide Transfer in the Tissues* 109; *Carbon Dioxide Transport in Blood* 109; *Carbon Dioxide Transfer in the Lungs* 110; *Haldane Effect* 110
- **Regulation of Respiration** 110
 - Neural Regulation of Respiration* 111; *Chemical Regulation of Respiration* 113

- **Pulmonary Function Tests 115**

Tests of Ventilation 115; Tests of Diffusion 116; Tests of the End-result of Respiration 116; Test of Response to Respiratory Stimulants 116; Tests during Exercise 116

- **Applied Respiratory Physiology 116**

Hypoxia 116; Cyanosis 117; Dyspnea 117; Breath Holding 118; Cheyne-Stokes Breathing 118; Respiratory Failure 118; Oxygen Toxicity 119; Artificial Respiration 119; Manual Methods 119

7. ADAPTATION TO ENVIRONMENT

122

- **Regulation of Body Temperature 122**

What is Normal Temperature 123; Heat Balance 123; Temperature Regulatory Mechanisms 124; Fever 124

- **Acclimatization to Hot Environment 125**

- **Heat Syndromes 125**

Heat Cramps 125; Heat Exhaustion 125; Heat Stroke 125

- **Acclimatization to Cold Environment 126**

Hypothermia 126

- **Life at High Altitude 126**

Effects of Acute Exposure to High Altitude 127; Acclimatization to High Altitude 127; Exercise at High Altitude 129; Maladaptation to High Altitude 129

8. GASTROINTESTINAL SYSTEM

130

- **Functional Anatomy 132**

Blood Supply 132; Nerve Supply 133

- **Food in the Mouth 135**

Salivary Secretion 135; Swallowing 136

- **Food in the Stomach 138**

Regulation of Gastric Secretion 139; Meal-related Gastric Secretion 140; Digestive Function of Gastric Secretion 142; Regulation of Gastric Emptying 142; Functions of the Stomach 142

- **Peptic Ulcer 142**

Factors which Increase Secretion 143; Factors which Decrease Mucosal Defence 143

- **Pancreatic Secretion 143**

Regulation of Pancreatic Secretion 143

- **Bile 144**

Regulation of Biliary Secretion 144

- **The Small Intestine 144**
Carbohydrate Digestion and Absorption 145; Protein Digestion and Absorption 146; Fat Digestion and Absorption 147; Water and Electrolyte Absorption 148; Absorption of Cyanocobalamin (Vitamin B₁₂) 149; Absorption of Iron 149
- **The Large Intestine 150**
Absorption 150; Fermentation 150; Storage 152
- **Motility of the Gut 152**
Stomach 153; Small Intestine 154; Large Intestine 154
- **Gastrointestinal Function Tests 155**
D-xylose Absorption Test 155; Fecal Fat 156; Schilling's Test 156
- **Functions of the Liver 156**
Secretion of Bile 156; Metabolic Functions 157; Immunological Functions 157; Other Functions 157
- **Liver Function Tests 158**
Tests of Detoxification and Excretory Function 158; Tests of Protein Metabolism 158; Tests of Bile Acid Metabolism 158; Tests of Bile Duct Patency 159; Tests of Hepatocellular Damage 159

9. NUTRITION AND METABOLISM

162

- **Energy Metabolism 163**
Energy Intake 163; Energy Expenditure 163
- **Carbohydrates 167**
Chemistry 167; Sources 168; Physiological Role 168; Carbohydrate Requirements 172
- **Fats 172**
Chemistry 172; Sources 173; Essential Fatty Acids 174; The Lipid-coronary Connection 175
- **Proteins 177**
Chemistry 178; Essential Amino Acids 178; Protein Quality 178; Sources 178; Protein Requirements 179
- **Vitamins 179**
Vitamin A 179; Vitamin D 180; Vitamin E 181; Vitamin K 182; Thiamine 183; Riboflavin 183; Niacin 184; Pantothenic Acid 185; Biotin 185; Pyridoxine 186; Folic Acid 186; Cobalamin 187; Ascorbic Acid 188; Vitamin Pills: Yes or No 189
- **Minerals 189**
Calcium 190; Phosphorus 190; Iron 191; Iodine 191; Zinc 192; Selenium 193; Sodium 193; Potassium 194; Fluorine 194; Mineral Supplements 195

- **Recommended Dietary Allowances** 195
- **Balanced Diet** 195
Framing a Balanced Diet 196; *Scientific Specifications* 196; *Translating the Specifications into a Diet* 196
- **Nutrition During Pregnancy and Lactation** 197
Nutritional Requirements during Pregnancy 197; *Nutritional Requirements during Lactation* 198
- **Nutrition During Infancy and Childhood** 198
Nutrition from Birth Onwards 199; *Advantages of Breastfeeding* 199; *Digestive Properties* 200; *Supplements* 201; *The Protein Myth* 201; *Tips for Feeding Children* 201

10. EXCRETORY SYSTEM

204

- **Functional Anatomy** 204
- **Mechanism of Urine Formation** 205
Glomerular Filtration 206; *Proximal Tubule* 206; *Loop of Henle* 207; *The Distal Tubule and Collecting Duct* 208; *Functional Segments of the Nephron* 209
- **Role of Kidneys in Acid-base Balance** 210
Mechanism of Reabsorption of Bicarbonate 210; *Generation of Fresh Bicarbonate* 210; *Buffers in Tubular Fluid* 211; *Regulation of Acid-base Balance* 211
- **Physiology of Micturition** 211
Functional Anatomy 211; *Mechanics of Micturition* 212; *Neural Mechanism of Micturition* 212

11. ENDOCRINE SYSTEM

215

- **Classification of Hormones** 215
- **Mechanism of Action of Hormones with Intracellular Receptors** 216
- **Mechanism of Action of Hormones with Cell Membrane Receptors** 216
Hormone-induced Activation of Adenylyl Cyclase 217; *Other Second Messengers* 217
- **Hypothalamic and Pituitary Hormones** 218
Hypothalamic Control of Anterior Pituitary 218; *Anterior Pituitary Hormones* 219; *Posterior Pituitary Hormones* 221
- **Thyroid Gland** 222
Hormones of the Thyroid Gland 222; *Functions of Thyroid Hormones* 223; *Mechanism of Action of Thyroid Hormones* 225; *Regulation of Thyroid Secretion* 225; *Disorders of the Thyroid Gland* 225
- **Parathyroid Glands** 226
Regulation of Parathyroid Hormone Secretion 226
- **Other Hormones Affecting Calcium Metabolism** 226
Calcitriol 227; *Calcitonin* 227

- **Adrenal Cortex 227**
Mechanism of Action 227; Glucocorticoids 227; Mineralocorticoids 228; Androgens 229
- **Adrenal Medulla 229**
Actions of Catecholamines 230; Regulation of Catecholamine Secretion 230; Excess Catecholamine Secretion 231
- **Pancreas 231**
Insulin 231; Glucagon 233
- **Gastrointestinal Hormones 233**

12. REPRODUCTIVE SYSTEM

236

- **Sex Determination 236**
Sex Chromatin 236
- **General Scheme of Reproductive Function 237**
- **Puberty 237**
Why is Hormonal Secretion Low in Childhood? 238; What Increases the Hormonal Secretion at Puberty 238
- **Male Reproductive System 238**
Functional Anatomy 238; Spermatogenesis 239; Semen 241; Functions of Testosterone 243
- **Female Reproductive System 244**
Functional Anatomy 244; The Menstrual Cycle 244; Ovarian Hormones 247; Menopause 248
- **Pregnancy 248**
Fertilization 248; Implantation 249; The Pregnant vs Non-pregnant Uterus 249; The Placenta 250; Parturition 252
- **Lactation 253**
Secretion and Ejection of Milk 253; Milk Ejection Reflex 253; Lactational Amenorrhea 253
- **Contraception 254**
Contraceptives for Men 254; Contraceptives for Women 255

13. PHYSIOLOGY OF LOCOMOTION

257

- **Functional Anatomy of Skeletal Muscle 258**
Muscle Fiber 258
- **Resting Membrane Potential 259**
- **Two Steps to Activation 260**
- **Action Potential 260**
Ionic Basis of Action Potential 260

- **Neuromuscular Transmission 260**

Functional Anatomy of the Neuromuscular Junction 261; Physiology of Neuromuscular Transmission 261; Pharmacology of Neuromuscular Transmission 262

- **Contraction of Skeletal Muscle 264**

Stimulus–response Relationship in Skeletal Muscle 266; Effect of Frequency of Stimulation on Contraction 266; Regulation of Force of Contraction in the Body 267; Isometric and Isotonic Contraction 267; Length–tension Relationship in Isometric Contraction 267

- **Electromyography 269**

- **Smooth Muscle 269**

Structure of Smooth Muscle 269; Classification 269; Electrophysiology 270; Action Potential 271; Modes of Stimulation of Smooth Muscle 271; Excitation–Contraction Coupling 271; Contractile Process 272

- **Physiology of Nerve Fibers 272**

Conduction of the Nerve Impulse 273; Compound Action Potential 274; Classification of Nerve Fibers 274; Response of Nerve Fibers to Injury 275

14. NERVOUS SYSTEM: GENERAL CONCEPTS

277

- **Coordination Needs Communication 277**

- **Reflex Arc and Reflexes 278**

- **Cerebrospinal Fluid 280**

Functional Anatomy 280; Formation of CSF 281; Circulation of CSF 281; Absorption of CSF 281; Functions of CSF 281; Clinical Physiology of CSF 281; Blood Brain Barrier 283

- **Synaptic Transmission 283**

Structure of a Synapse 283; The Process of Synaptic Transmission 283

15. NERVOUS SYSTEM: SENSORY FUNCTIONS

288

- **Skin 288**

- **Transduction 289**

Receptor Potential 290

- **Action Potential 291**

- **Adaptation 291**

- **From Periphery to Center 291**

Dorsal Column System 292; Anterolateral System 292; Thalamus 292; The Cerebral Cortex 293

- **Descending Fibers of the Sensory System 296**

- **Pain 296**

Pain Pathways 296; Modulation of Pain 297; Referred Pain 300; Life Without Pain 300

- **Vision 301**
Functional Anatomy 301; Aqueous Humor 302; Optics of Vision 303; Retinal Function 306; Visual Pathways 309; Visual Reflexes 310; Eye Movements 312; Visual Perception 312
- **Hearing 313**
The External Ear 313; The Middle Ear 314; The Inner Ear 315; Auditory Pathways 320; Descending Auditory Pathways 323; Perception of Different Characteristics of Sound 324; Interpretation of Speech 325; Hearing Defects 326; Evaluation of Auditory Function 326
- **Taste 329**
Taste Receptors 329; Taste Pathways 330; The Four Basic Tastes 330; Transduction, Coding and Perception of Gustatory Stimuli 330
- **Smell 331**
Olfactory Receptors 331; Olfactory Pathways 331; The Primary Odors 331; Transduction, Coding and Perception of Olfactory Stimuli 331

16. NERVOUS SYSTEM: MOTOR FUNCTIONS 336

- **Spinal Motor Mechanisms 337**
Stretch Reflex 337; Inhibitory Interneurons 341; Golgi Tendon Organs 341; Renshaw Cells 343; Flexion Reflex 343; Crossed Extension Reflex 343
- **Brain Stem Motor Mechanisms 344**
Vestibular and Neck Reflexes 344; Reticular Formation 346; Decerebrate Rigidity 346
- **Cortical Motor Mechanisms 346**
Posterior Parietal Cortex 346; Premotor Cortical Areas 347; Primary Motor Cortex 347; Overview of Cortical Motor Mechanisms 348
- **The Cerebellum 348**
Functional Anatomy of the Cerebellum 348; Functions of the Cerebellum 350; Effects of Cerebellar Lesions 351
- **Basal Ganglia 351**
Structure 352; Functions 353; Parkinson's Disease 354

17. NERVOUS SYSTEM: VISCERAL FUNCTIONS AND MOTIVATION 355

- **Autonomic Functions 355**
Functional Anatomy 356; Neurotransmitters in ANS 356; Physiological Role of ANS 358; Higher Neural Regulation of ANS 360
- **Limbic System 361**
Functional Anatomy 362; Functions 363; Kluver-Bucy Syndrome 364
- **Hypothalamus 364**
Functional Anatomy 365; Functions of Hypothalamus 367

18. NERVOUS SYSTEM: SLEEP-WAKEFULNESS AND HIGHER FUNCTIONS	373
• Reticular Formation 373	
<i>Anatomy 373; Functions 374</i>	
• Electroencephalography 374	
<i>Physiological Basis of EEG 375; EEG Waveforms 375</i>	
• Sleep-wakefulness 376	
<i>Architecture of Sleep 376; Slow Wave Sleep 376; REM Sleep 377; Neural Structures Involved in Sleep-wakefulness 378; Circadian Nature of the Sleep-wakefulness Cycle 379; Neurotransmitters Involved in Sleep-wakefulness 379; Sleep Producing Substances 380</i>	
• Speech 380	
<i>Broca's Area 380; Wernicke's Area 380; Mechanism of Speech 380; Aphasias 381</i>	
• Learning 381	
<i>Classical Conditioning 381; Operant Conditioning 382; Biological Basis of Learning 383</i>	
• Memory 384	
<i>Neural Substrate of Memory 384; Cellular and Molecular Basis of Memory 384</i>	
19. VITAL REGULATIONS	386
• Physiology of Exercise 386	
<i>Cardiovascular Responses to Exercise 386; Respiratory Responses to Exercise 389; Endocrine Responses to Exercise 391; Metabolic Adjustments in Exercise 391; Fatigue 392</i>	
• Physiology of Fluid Balance 393	
<i>Fluid Compartments of the Body 393; Regulation of Blood Volume and the Volume of Other Body Fluids 393</i>	
• Regulation of Acid-base Balance 396	
<i>Physiological Buffers 396; Respiration and Acid-base Balance 398; Kidneys and Acid-base Balance 399; Relative Importance of Different Mechanisms 400; Disturbances of Acid-base Balance 400</i>	
20. YOGA	402
• What is Yoga 402	
• Schools of Yoga 402	
<i>Hatha Yoga 403; Raja Yoga 403; The Triple Path: The Yoga of the Gita 404; Integral Yoga 405</i>	
• The Yogic Attitude 405	
<i>Dealing with the Ego 406; Dealing with Desires 406; Surrender 407; Universal Love 407; Sincerity 407</i>	

- **The Yogic Practices 407**
Asanas 407; Pranayama 408; Meditation 408
- **Physiological Effects of Yoga 414**
*Physical Endurance 414; Cardiovascular Effects 414; Respiratory Effects 414;
Metabolic Rate 415; Effects on the Nervous System 415; Endocrine Changes 415;
Other Biochemical Changes 416*
- **Yoga in Health and Disease 416**
*Orthopedic Problems 416; Hypertension 416; Coronary Heart Disease 416;
Diabetes 416; Bronchial Asthma 416; Psychological Problems 416*
- **Mechanisms Underlying Effects of Yoga 416**
