

Contents

Part One: INTRODUCTORY CHAPTERS

1. Biomechanics of the Ilizarov External Fixator	3
2. Ilizarov Frame Assemblage	7
3. Biomechanics of the Ilizarov Method	9
4. Biomechanic Considerations for the Fracture Treatment	13
5. Basics of the Method of Distraction Osteogenesis	15
6. Basics of the Method of Compression Osteogenesis	17
7. Criteria of Bone Healing and Fixator Removal	19

Part Two: ASSEMBLY OF THE CIRCULAR FIXATOR

8. Rings and Arches	23
Half-Ring	25
Five-Eighths Ring	34
Half-Ring With Curved Ends	36
Arches	37
9. Ring Connections	39
Bolts and Nuts	39
Rods and Plates	49
Threaded Sockets and Bushings	58
Supports and Posts, and Half-Hinges	60
Wire-Fixation Bolts	64
Wire-Fixation Buckles	66
Washers	68
Wrenches	69
10. Frame Assemblage	71
General Considerations	71
Ring Positioning	73
Ring Level	74
Ring Inclination	76
Space Between Skin and Ring	80

Technical Hint: Two-Fingers Breadth Rule	81
Ring Positioning at Osteotomy/Corticotomy, Nonunion and/or Fracture Sites	82
Ring Orientation	83
11. Wires: Types and Utilization	85
General Considerations	85
Technique of K-Wire Introduction	89
Wire Positioning on the Same Ring	97
Offset Wire Positioning	100
Proper Distance of Wires From Joints, and Direction of Introduction	101
Wires With Stoppers	103
Wire Tensioning	104
Affixing Wire to Ring	109
Technical Hint: Wire Tensioning	111
Reducing (Correcting) Wire	112
Wire Retensioning Technique	114
Wire Cutting and Bending	114
Guidewire	115
Pulling or Traction Wire	117
Bone Fixation With Half-Pins	118

Part Three: CLINICAL TECHNIQUES

12. Ilizarov Corticotomy (Compactotomy) Technique	125
Anatomic and Physiologic Considerations	125
Corticotomy Technique	126
Level of Corticotomy	136
Monofocal and Bifocal Corticotomy	137
Radial Bone Cut and Fibula Resection	137
Corticotomy or Osteotomy for Partial Bone Defect Replacement	138
S-Shaped Osteotomy for Purulent Osteomyelitic Cavities	139
Corticotomy for Transverse Shifting and Bone Widening	140
13. Hinges	143
Positioning of Hinges	145
Opening Wedge Hinge	150
Distraction Hinge	151
Compression Hinge	152
Translation Hinge	153
Translation Correction Device	154
Rotation Correction Device	156
Derotation Maneuver	156
Derotation Combined With Lengthening	157
Speed of Correction with Hinges (Rule of Triangles)	158
Two-Axis Hinges	159

14. General Principles of Ilizarov Technique	161
Technique of Bone Distraction	161
Technique of Bone Compression	165
Correction of Joint Contractures	169
Case Illustrations	173
15. Segmental Bone Transport in Large Bone Loss and in Severe Infection	187
General Considerations	187
External Bone Transport Technique	187
Internal Bone Transport Technique	188
Combined External-Internal Transport Technique	190
Advantages and Disadvantages of the Techniques	191
Special Considerations in Segmental Bone Transport Techniques	191
Biomechanics of Ilizarov External Fixator Relating to Frame Construction in	
Large Bone Loss and Distraction and to Anatomic Factors	191
Technique of Segmental Bone Deviation Correction	194
Combined Distraction With Correction of Incongruency and Rotation Deformity	197
Case Illustrations	198
16. Ilizarov Fracture Management; Treatment of Foot and Hand; and Arthrodesis	207
Indications for Ilizarov Fracture Treatment	210
Ilizarov Technique for Correcting Foot Deformities	218
Ilizarov Technique for Corrective Hand Procedures	225
Ilizarov Technique for Compressive Arthrodesis	227
Ilizarov Technique for Stump Lengthening	229
Case Illustrations	230
17. Fixator Removal and Complications of Ilizarov Technique	233
Criteria for Fixator Removal	233
Technique of Ilizarov Fixator Removal	235
Complications	236

Part Four: THE NEW DEVELOPMENT OF THE METHOD

18. The New Modifications of the Ilizarov Technique	243
The Conclusion	251
<i>Selected Bibliography</i>	253
<i>Index</i>	255
