

Contents

1. Introduction to the Bone, Cartilage and Tendon.....	1
The Bone	3
Formation of the Bone	3
The Cartilage	3
Basics about the Bone	4
Intramembranous Ossifications	7
Endochondral Ossifications	7
Formation of Typical Bone	8
Biomechanical Properties of Bone	9
Tendons	10
2. Injuries to Bones and Joints.....	15
Classification of Skeletal Injuries	16
Fat Embolism	48
Gas Gangrene	50
Tetanus (Lockjaw)	52
Delayed Healing and Non-Union of Fractures	54
3. Treatment of Fractures and Dislocations	65
General Considerations	66
Modalities of Support or Splints	69
Operative Treatment of Fractures	70
Materials Used for Preparing Internal Fixators	86
External Skeletal Fixation	88
Stress Fractures	90
Pathological Fracture (Spontaneous Fracture)	91
Intra-articular Fractures	91
Open (Compound) Fracture	92
Plastering and Traction	100
Traction in Orthopaedics	105
4. Rehabilitation of Injured Patients	111
Modalities of the Rehabilitative Procedures	113
Preventive Measures to Avoid Joint Stiffness	114
Mobilising Exercises of Joint	115
Gait Training	116
Orthotics in Fractures	123

5. Hand Injury	133
General Considerations	134
Needle Stick Injuries in Medical and Paramedical Community	136
Clinical Features and General Principles of Management of Hand Injuries	137
Fractures and Dislocations of Carpal Bones	138
Fracture Scaphoid	138
Fracture of Lunate	142
Fracture of Metacarpals	144
Injury of the Thumb	144
Injuries of Fingers	149
6. Injuries Around Wrist	157
Fractures of the Distal End of the Radius and Ulna	158
Common Injuries Around Wrist	161
Colles' Fracture	161
Smith's Fracture (Reverse Colles' Fracture)	169
Barton's Fracture	171
The Intra-articular Communicating Fractures of the Distal Region of Radius	172
Radiocarpal Dislocations	173
7. Fractures of Forearm Bones	175
Anatomical Considerations	176
Clinical Features	177
Fractures of the Forearm Bones in Children	177
Plastic Deformity in Children	186
Radioulnar Dislocation	187
Dislocations of the Distal Radioulnar Joint	187
Isolated Fractures of Forearm Bones	189
8. Compartment Syndrome and Volkmann's Ischaemic Contracture (VIC)	191
Introduction	192
Chronic Compartment Syndrome	199
Management of Established Volkmann's Ischaemic Contracture	199
9. Injuries Around Elbow	201
Anatomical Considerations	202
Fractures of Distal Humerus	205
Supracondylar Fracture	206
Complications of Supracondylar Fractures	219
Monteggia Fracture Dislocation	221
Galeazzi Fracture Dislocations	226
Side Sweep Fracture	227

Essex-Lopresti Injuries	227
The Floating Elbow	228
Fracture of Upper End of Radius	229
Fractures of Olecranon	231
Coronoid Fractures	236
Fracture of Lateral Condyle of Humerus	237
Fracture of Capitellum	239
Fracture of Medial Epicondyle of Humerus	241
Fracture of Medial Condyle of Humerus	244
Fractures of Distal Humeral Epiphysis	244
Dislocation of the Elbow	245
Assessment of the Results of Management of Elbow Problems	253
10. Fractures of Arm Bone (Humerus)	255
Anatomical Considerations	256
Management	258
Complications	261
11. Injuries Around Shoulder	265
Common Injuries	266
Fracture Clavicle	267
Injuries of Acromioclavicular Joint	277
Injuries of Sternoclavicular Joint	281
Floating Shoulder	283
Dislocations of Shoulder	284
Injuries (Fractures) around Proximal Humerus	304
Avulsion Fracture of Tuberosities	307
Fracture Surgical Neck of Humerus	307
Injuries around Proximal Humerus in Children	310
Fracture of the Scapula	311
Scapulothoracic Dislocation	313
12. Injuries of Foot	315
Injuries of the Hindfoot	319
Fracture Calcaneum	319
Fracture Talus	330
Dislocations of and around Talus	338
Osteochondritis Dessecans (Osteochondral Fractures) of Talus or Osteochondral Lesions of Talus (OCL of talus)	340
Injuries of Midfoot	341
Fracture of Tarsals (Other than Talus and Calcaneum)	342
Navicular Injuries	342
Cuboid Injuries and Injuries of Cuneiform Bones	343
Lisfranc's Joint Injuries	343
Injuries of the Forefoot	348
March Fracture (Stress Fracture of the Metatarsals)	350

Metatarsal-Phalangeal Dislocation 354

Injuries of Phalanges 354

13. Injuries Around Ankle 359

Introduction 360

Main Types of Ankle Injuries 361

Sprain of Ankle Joint 362

Internal Derrangements of Ankle Joint 369

Pott's Fracture 371

Tibial Pilon/Or Pylon Fractures (Fractures of Tibial Plafond or Explosion Fracture) 383

Common Fractures Around Ankle in Children 385

Cycle Spoke Injury (In Lower Leg, Ankle and Foot Region) 386

Dislocations of Ankle 386

Epiphyseal Injuries of Lower Ends of Tibia and Fibula 390

Rupture of Tendons Around the Ankle 391

Tibialis Posterior Dysfunction 394

14. Fractures of Leg Bones 397

Tibial Fractures in Children 415

Fractures of Metaphyseal Regions of Tibia 415

Proximal Tibial Fractures 415

Fracture of Fibula 416

Stress Fracture of Leg Bones 417

15. Injuries Around Knee 419

Management of Important IDK Lesions 429

Anterior Cruciate Avulsion/Tear 431

Posterior Cruciate Tear 434

Collateral Ligament Tear 435

Fracture Patella 436

Dislocation of Patella 444

Traumatic Dislocation of Knee 445

Fibular Dislocation 448

Injuries of Distal Femur (Supracondylar, Intercondylar Fractures) 448

Floating Knee Injuries 460

Injuries of Proximal end of Tibia (Tibial Condyle, Tibial Plateau Fractures) 461

16. Fracture Shaft Femur 473

Anatomical Considerations 474

Operative Procedures 479

Antegrade (FAN or TAN) or Retrograde Femoral Nailing 481

Fracture Shaft Femur in Children 487

Open Reduction and Internal Fixation 490

17. Injuries Around Hip	495
Injuries in and around the Hip	496
Fracture Neck of Femur	498
Proximal Femoral Fractures in Children (Paediatric Femoral Neck Fractures)	531
Subtrochanteric Fractures	535
Dislocation of Hip	541
18. Pelvic Fractures	559
Anatomical Considerations	560
Open Reduction and Internal Fixation	570
Stress Fractures of Pubic or Ischial Ramus	570
19. Injuries of Spine	575
Relevant Gross Anatomy	577
Spinal Injuries	577
Principles of Managing Traumatic Quadriplegia or Paraplegia	585
Management of Cervical Injuries	603
20. Amputations	611
Indications	613
Types of Amputation	619
Lower Limb Amputations/Disarticulation	620
Hindfoot and Ankle Amputations	624
Upper Limb Amputations and Disarticulations	626
Basics of Amputation Surgery	626
Amputations in Children	632
Complications of Amputation	632
21. Peripheral Nerve Injuries	635
Classification of Nerve Injuries	636
Effects of Peripheral Nerve Injuries	639
Aetiology of Peripheral Nerve Injuries	642
General Considerations in the Management of Nerve Injuries	647
Features of Different Nerve Affections of the Upper Limb	647
22. Accidents and Emergency Services	673
Emergency (Accident) Services	676
Conventional Three Tier System	680
Role of Emergency Services During Major Disasters/Accidents	681
Post-traumatic Stress Disorder (PTSD)	687
Wartime Surgical Judgement	687
Multiple Injured	688

23. Neglected Trauma	693
Neglected Spinal Injuries	695
Neglected Injuries of Pelvis	696
Neglected Trochanteric Fractures	701
Neglected Femoral Neck Fractures	702
Neglected Internal Derangements of Knee (IDK)	707
Neglected Fractures of Leg Bones	710
Neglected Injuries of Ankle	711
Neglected Injuries of Tarsal Bones	714
Neglected Injuries of Talus	715
24. Sports Injuries	729
Development of Sports Medicine	730
Sports Likely to Cause Injuries	732
Classification of Sports Injuries	733
Assessment of, and Investigations for Sports Injuries and their Management	735
Management of Common Sports Injuries	737
25. The Divine Gift to Humanity—Suśruta	747
