

Contents

1. Introduction to Research	1
Scientific method	
Research	
Nursing research	
Classification of research	
Roles of nurse in research	
Qualities of a good researcher	
2. Research Process	15
Research process in quantitative studies	
Research process in qualitative studies	
3. Research Problem	23
Sources of research problem	
Criteria of a good research problem	
Steps in the formulation of a research problem	
Components of a research problem	
Formats of formatting problem	
Evaluating research problem	
4. Review of Literature	33
Purposes of literature review	
Functions	
Types of literature review	
Criteria of a literature review	
Databases for literature review	
Sources of literature review	
Steps of literature review	
Advantages of literature review	
5. Conceptual Framework	47
Qualities of a conceptual framework	
Steps of construction of conceptual framework	
Key elements of conceptual framework	
Major concepts of conceptual framework in nursing	

6. Hypothesis and Variables 55

Variables
Formulation of hypothesis

7. Research Design..... 67

Characteristics of a good research design
Purposes of research design
Factors influencing the choice of research design
Classification of research design
Quantitative research designs
Qualitative study designs
Advantages of research design

8. Sampling..... 91

Population
Sample
Sampling process
Methods of sampling
Factors influencing sampling
Sampling bias
Sampling and non-sampling errors
Advantages of sampling
Limitations of sampling

9. Ethics in Research 103

Need for ethics in research
Need for ethics in nursing research
Potential benefits and risks of research
Human rights
Ways to protect human rights in research
Ethics Committees

10. Data Collection 113

Data
Data collection

11. Pilot Study..... 131

Reasons for conducting pilot study
Objective of pilot study

Procedure
Advantages of pilot study
Problems of pilot studies

12. Computer in Research.....137

Computer
Internet
Computer and research
Internet and research
Computer in different research phases

**13. Processing, Analysis, Interpretation and151
Presentation of Data**

Processing of data
Analysis of data
Interpretation of data
Presentation of data

14. Communicating Research.....163

Strategies for communication of research
Writing a research proposal
Writing a research report
Manuscript preparation of scientific article or paper

15. Research Utilization177

Research utilization
Guidelines for critique of research article

Glossary185
