

Contents

1. Orbit—Introduction and Basics	1
■ Anatomy of orbits	1
■ Contents of fissures, canals and foramina	1
■ Imaging modalities	2
■ Normal CT and MRI scans	3
■ Orbital disorders	8
2. Congenital Structural Lesions	11
■ Malformations	11
■ Hamartomas	12
■ Choristoma	13
■ Orbital teratomas	14
■ Congenital cystic eye and microphthalmos with cyst	15
■ Craniosynostosis syndromes	20
■ Mandibulofacial dysostosis	22
■ Capillary hemangioma	25
■ Cavernous hemangioma	31
■ Arterio venous malformations (AVMs)	37
■ Lymphangioma	39
■ Orbital varices	40
■ Dermoid and epidermoid cysts	43
■ Orbital teratomas	51
3. Acquired Structural Lesions	53
■ Mucoceles	54
■ Implantation cysts	61
■ Hematic cysts	62
■ Lacrimal ductal cysts	63
4. Inflammatory Lesions	65
■ Acute inflammatory disorders	65
■ Chronic inflammatory disorders	66
■ Pyogenic inflammation	69

■ Parasitic infestations	82
■ Chronic inflammatory disorders	94
■ Noninfective granulomas	102
■ Nongranulomatous inflammation	104
■ Idiopathic inflammatory orbital disease	116

5. Neoplastic Lesions 121

■ Mesenchymal tumors	127
■ Muscle neoplasia	129
■ Neurogenic neoplasia	131
■ Primary bone tumors	149
■ Lymphoproliferative disorders	157
■ Lacrimal gland tumors	169
■ Melanocytic lesions	180

6. Secondary Orbital Tumors 183

■ Orbital extension from sinus and nasopharyngeal lesions	186
■ Secondary orbital tumors from eyelids	195
■ Orbital extension from conjunctival tumors	202
■ Orbital extension from tumors of eyeball	205
■ Orbital extension from intracranial disease	210
■ Orbital metastases from distant sites	214
