Section One: Computed Tomography

1. Physical Principle of CT Scan Imaging	3
• .Developments in CT Technology	4
– Conventional Axial CT	4
– Spiral/Helical CT	4
– Electron Beam CT (EBCT)	4
– Multislice/Multidetector CT (MDCT)	5
– Dual Source CT	5
– Hounsfield Units	5
– Window Level (WL) and Window Width(WW)	6
– Image Reconstruction	8
– Three Dimensional Imaging	9
– CT Angiography	10
2. Clinical Illustrations	13
Head Paranasal Sinuses Face and Neck	
• Extradural or Epidural Hemorrhage	13
• Subdural Hematoma (SDH)	15
• Subarachnoid Hemorrhage	16
• Intracranial Bleed	18
• Infarction	19
• Tuberculoma Brain	21
• Temporal Lobe Abscess	23
• Glioblastoma Multiforme	24
• Metastasis from Lung	25
• Retinoblastoma	26
• Antrochoanal Polyp	27
• Ethmoidal Mucocele	29

• Ameloblastoma of Mandible	30
• Facial Fractures	31
• Fracture of Vertebral Body	32
Chest	33
• Miliary Tuberculosis	33
• Centrilobular Opacities in Pulmonary Koch's	35
• Fungal Ball	36
• Idiopathic Pulmonary Fibrosis	37
• Pulmonary Embolism	38
• Pulmonary Arterial Hypertension (PAH)	40
Mediastinum	41
• Thymoma	41
• Hodgkin's Lymphoma	42
• Neurofibroma	43
Heart	44
• Normal CT Coronary Angiography	44
• Redundant Tortuous Aorta	46
• Coarctation of Aorta	47
Abdomen	49
• Hepatic Trauma	49
• Simple Hepatic Cyst	50
• Hydatid Cyst Liver	51
• Hemangioma Liver	52
• Hepatic Cirrhosis	53
• Hepatocellular Carcinoma	54
• Hepatic Metastases	55
• Carcinoma Stomach	56
• Small Bowel Obstruction	57
• Superior Mesenteric Artery (SMA) Syndrome	58
• Appendicitis	59
• Sigmoid Diverticulitis	60

• Cholecystitis	61
• Cholelithiasis in Porcelain Gallbladder	62
• Pancreatic Duct Calcification	63
• Acute Pancreatitis	64
• Splenic Trauma	65
• Wilms' Tumor (Nephroblastoma) with Hepatic Metastasis	67
• Renal Cell Carcinoma with Pulmonary Metastases	68
• Ureteric Calculus	69
• Cystitis	70
• Carcinoma Urinary Bladder	71
• Intradiverticular Bladder Carcinoma	72
• Undescended Testicle (Cryptorchidism)	73
• Carcinoma Prostate	75
3. CT Guided Biopsy	77
CT Guided Precision Biopsy	77
4. Artifacts	79
• Artifacts	79
• Extrinsic Artifact	81
• Partial Volume Artifact	83
5. Xenon CT	85
6. CT Contrast Media	87
• Iodinated Intravascular Agents	87
• Oral Contrast	89
– Barium Sulphate	89
– Iodinated Agents	89
• Air	89
• Carbon Dioxide	90
7. Radiation Safety Measures	91
• Units of Radiation	91
• Effects of Radiation	92
• Average Effective Dose in Millisieverts (mSv)	93

• Benefit Risk Analysis	94
• Principles of Radiation Protection	94
• Radiation Protection Actions	94
• Shielding	94
– Source Shielding	95
– Structural Shielding	95
– Personnel Shielding	95
– Patient Shielding	96
• Recommended Dose Limits	96
• Detection of Radiation	97

Section Two: PET-CT Imaging

8. Introduction to PET-CT Imaging	101
9. PET-CT Gantry	103
10. Cyclotron	105
11. Clinical Illustrations	107
Normal PET Images	107
Lung Metastasis	109
Wilms' Tumor	110
Soft Tissue Sarcoma	111
Lymphoma	112

Section Three: Magnetic Resonance Imaging

12. Physical Principle of Magnetic Resonance Imaging	115
• Special Sequences	119
– Short Tau Inversion Recovery (STIR) Sequence	119
– Fluid Attenuated Inversion Recovery (FLAIR)	119
– Gradient Echo Sequence	120
– Diffusion-weighted Imaging	120
– MR Angiography	120

13. MRI Contrast	121
• MRI Contrast	121
– Intravenous Contrast Agents	121
– Oral Contrast Agents	122
• MRA	123
14. Clinical Illustrations	125
Acute Infarct	125
Pituitary Macroadenoma	127
Empty Sella Syndrome	129
Glioma	130
Neurocysticercosis	132
Tuberous Sclerosis	133
Neurofibromatosis Type 2 (NF2)	134
Germinal Matrix Hemorrhage–Grade IV	137
Periventricular Leukomalacia – Chronic	138
Spinal Lipoma—Intradural	
Extramedullary Lesion	139
Lumbar Disk Lesion	141
Pancoast Tumor	143
MR Cholangiopancreatography	144
Avascular Necrosis of Femoral Head	146
Rotator Cuff Tears	148
Carcinoma Urinary Bladder—MR Urography	149

Section Four: Ultrasonography

15. Ultrasonography (USG)	153
16. Ultrasound Contrast	157
17. Clinical Illustrations	159
Duodenal esophageal atresia	159
Gallbladder in Hepatitis	161
Epigastric Hernia	162
Obstructive Uropathy	163
Splenuculus	164

Multicystic Dysplastic Kidney Disease	165
Bladder Carcinoma	166
Lymph Nodes	167
Undescended Testicle (Cryptorchidism)	168
Bladder Outlet Obstruction	169
Retinal Detachment	170
Parotid Abscess	171
Tuberculous Orchitis	172
Hydrocele	173
Venous Thrombosis	174
Hepatic Hemangioma	175

Section Five: Clinical Illustrations Using Multiple Modalities

18. Clinical Illustrations Using Multiple Modalities	179
Spinal Dermoid	180
Mullerian Duct Cyst	181
Osteoid Osteoma	183

Section Six: Archival and Communication System

19. Picture Archiving and Communication System (PACS)	187
<i>Index</i>	191
