

Contents

Section - 1 Understanding ART—Embryologist Outlook

- 1. Development of Gonads and Germ Cells 3**
Rima Dada
Endocrine and Paracrine Mechanism in Sexual Differentiation 4; Disorders of Gonadal Differentiation and Sex Determination 5; Gametogenesis 6; Capacitation 12; Phases of Fertilization 13; Cleavage 13; Spontaneous Abortions 13
- 2. Sperm Preparation Techniques 15**
Sarabpreet Singh
Sample Collection 15; Reduction of Visco-elasticity of the Ejaculate 15; Sperm Separation Techniques 16; Improvement of Sperm Concentration in the Fertilization Well 18; Immunological Infertility and ART 18; In Vitro Treatment of Spermatozoa 19; Selection of Live Spermatozoa from a Completely Immotile Sperm Population Prior to ICSI 21
- 3. Setting up of an ART Center 25**
Surveen Ghumman
Location of the Laboratory 25; Basic Infrastructure 26; Ancillary Laboratory Facilities 29; Laboratory Personnel 30; Equipment 330; Consumables 333; Culture Media 333; Protocols in the Laboratory 34
- 4. Classical CO₂ Incubator— Heart and Soul of An IVF Laboratory 36**
Dilip Patil
Temperature Control 36; Humidity Control 38; Carbon Dioxide Control 38; Role of Oxygen Tension in an Incubator 39; Contamination Control in the Incubator 40; Factors to be Considered in Choosing a CO₂ Incubator 41; Practical Tips to Ensure Proper Functioning of CO₂ Incubators 42; Incubator of the Future 43
- 5. Media in ART 44**
Shobha Gupta
History 44; Human Embryo Culture Media 45; Culture System 54; Cold Chain Maintenance and Shelf Life 56
- 6. Gametogenesis and Microscopic Structure of Gametes and Early Embryo 58**
MS Ahuja
Spermatogenesis and Structure of Spermatozoa 58; Spermatozoa 62; Sertoli Cells 64; Spermatogenic Cycle 65; Ovarian Follicles and Oogenesis 65; Fertilization 69; Development of the Early Embryo 71
- 7. Tuberculosis and Laboratory Perspective 75**
Sonia Sharma
Conventional Tests 75
- 8. The Importance of Water Quality in IVF Laboratories 78**
Estelle Riché, Stéphane Mabic
Water Contaminants 78; Laboratory Water Types 79; Water in the IVF Laboratory 79; Water Purification 81; Quality Control 84
- 9. Oxidative Stress and ART 86**
Monis Bilal Shamsi, Rima Dada
Free Radicals 86; Antioxidants and their Role in Redox Regulation 88; Reactive Oxygen Species in Endometrial Cycle 89; Free Radicals and Fallopian Tube 89; Redox and Early Embryo Development 90; Reactive Oxygen Species and the Follicle 90; Oxidative Stress and Unexplained Infertility 90; Placental Oxidative Stress 90; Oxidative Stress and Recurrent Pregnancy Loss 91; Future Prospects and Conclusion 91
- 10. ICMR Guidelines 94**
RS Sharma
Salient Features of the Draft of “ART Bill” 96; Future Challenges 101
- 11. Troubleshooting in ART: Laboratory Perspective 102**
Vijay Mangoli, Ranjana Mangoli
Contamination/Infection 103; Poor Oocyte Recovery/Quality 103; Poor sperm Recovery/Grade 104; Poor Fertilization 104; Poor Cleavage 105; Low Pregnancy Rate with Good Embryos 106; Multiple Pregnancies 106; Chromosomal Abnormality 106

12. Optics and ART	108
<i>Prosenjit Ganguli</i>	
Historical Background 108 ; Timeline: History of Microscopes 109 ; Types of Microscopes 109 ; Types of Microscopy 111 ; Principles of Microscopy 114 ; Compound Microscope 115 ; Optical Components 118 ; Microscope Problems: Trouble- shooting 120	

Section - 2
Burning Issues in Human Embryology—Revisited

13. Multifetal Pregnancy Reduction	125
<i>Sonia Malik, Vinita Sherwal, Rashmi Sharma</i>	
Methods 126 ; Complications of Pregnancy Reduction 129 ; Ethical Issues 129	
14. Setting up of a Viable Cryobank	132
<i>Praveen Pandaredattil, Alex Deroubaix</i>	
Straws 132 ; Ampoules 133 ; Semen Cryopreservation 133 ; Embryo Freezing Laboratory 135 ; Equipment Quality Control 140	
15. Blastocyst Culture	143
<i>Natachandra Chimote, Meena Chimote</i>	
Choosing a Blastocyst Culture Medium 144 ; Blastocyst Culture and Transfer: A Step toward Improved IVF Outcome 144 ; Embryo Culture 146 ; Two Different Blastocyst-Grading Systems 147 ; Optimal Inner Cell Mass Size and Shape 151 ; Low- Oxygen Compared with High-Oxygen Atmosphere in Blastocyst Culture 151 ; Clinical Predictors of Blastocyst Forma- tion 152 ; Toward a Single Blastocyst Transfer 153 ; Assisted Hatching of Blastocyst 153 ; Cryopreservation of Blastocyst by Vitrification or Slow Freezing 154 ; Blastocyst Embryo Transfer and Sex Ratio Imbalance in Favor of Male Offspring 156	
16. Introduction to Study of Semen Analysis	161
<i>Shubhangi Gangal, Ved Prakash</i>	
Method of Semen Analysis 162	
17. A Randomized Controlled Study of Human Day 3 Embryo Cryopreservation by Slow Freezing or Vitrification	166
<i>B Balaban</i>	
Materials and Methods 167 ; Laboratory Study 167 ; Discussion 170 ; Funding 171	
18. Comparison of Open and Closed Methods for Vitrification	174
<i>Masashige Kuwayama</i>	
Materials and Methods 175 ; Evaluation Methods 177 ; Statistics 177 ; Results 177 ; Discussion 177	
19. Safe Cryobanking	181
<i>Alain Ehram</i>	
A Brief History of Cryobanking 181 ; An Overview of Safe Cryobanking 182 ; Cryobiology Basics 183 ; Specimen Identifi- cation 190 ; Selecting the Ideal Packaging System 192 ; Cryo Bio System High Security Straws 197 ; Step by Step Protocols for Using Hemophilus Somnus Straws 200 ; Simplified Procedure Chart for Using HS Straws for Sperm 203 ; Simplified Procedure Chart for Using HS Straws for Embryos 203 ; Cryo Bio System High Security Vitrification Kit 203 ; Step by Step Protocol for Using the High Security Vitrification Kit 207 ; Simplified Procedure Chart for Using the High Security Vitri- fication Kit 210 ; Resources 210 ; Cryoprotectants 210	
20. Cytogenetics of Male Infertility	233
<i>Amit Patki, Manisha Joshi</i>	
Etiology of Male Infertility 233 ; Genetic Evaluation of the Infertile Male 233 ; Sex Chromosome Abnormalities 234 ; Cystic fibrosis and infertility 235 ; Sex Chromosomal Reciprocal Translocations 235 ; Abnormalities of Autosomal Chromosomes 235 ; Treatment 235	
21. Ultrasound Assessment of Endometrial Receptivity, Oocyte and Embryo Quality.....	237
<i>Ashok Khurana</i>	
Physiological and Biochemical Basis of Implantation 237 ; Lessons from IVF and Ovum Donation Cycles 238 ; Gray Scale, Power Doppler and 3D Ultrasound 238 ; Oocyte and Embryo Quality 241	

- 22. Introduction to Sperm Morphology** 247
Shubhangi Gangal, Ved Prakash
 What is a Normal Spermatozoon? 247; Computer-assisted Methods of Sperm morphology Evaluation 250
- 23. Preimplantation Genetic Testing—Clinical Applications** 253
Satish Kumar Adiga, Girisha KM, Guruprasad Kalthur, Pratap Kumar
 Indications for Preimplantation Testing 253; Single Gene Disorders 253; Chromosomal Abnormalities 254; Biopsy 254; Genetic Analysis of Biopsied Cells 255; Technical Limitations and Challenges 256; Counseling the Couple for Preimplantation Genetic Testing 256; Pregnancy Outcome after Preimplantation Genetic Testing 256; Ethical Considerations 256
- 24. Sperm Preparation for IVF and ICSI** 258
Kuldeep Jain
 Methods 258; Learning Points 261
- 25. Anesthesia and Assisted Reproductive Technologies** 262
Shaloo Garg
 Anesthetic Technique for Transvaginal Oocyte retrieval 262; Anesthetic Drugs Commonly Used 264; Alternative Therapy 266
- 26. Male Infertility—Is it Difficult to Conquer?** 268
Prakash Trivedi, Maya Prasad, Neha Rani
 The Burden of Male Infertility 268; Causes of Infertility 269; Drugs which can Cause Male Infertility 270; Nutritional Considerations 270; Reactive Oxygen Species and Male Infertility 271; Male Sexual Dysfunction and Infertility 271; Sperm Preparation and Selection 272; Extended Semen Analysis 273; Sperm Function Test 274; Sperm DNA Integrity Test 274; Tunel 274; Nonsurgical Treatment of Male Infertility 275; Surgical Intervention in Male Infertility 277; Surgical Sperm Retrieval (TESA, PESA, TESE, MESA) – ICSI 278
- 27. Fertility Preservation in Female Cancer Patients—A Review** 281
Pankaj Talwar, Jagat Prakash Arya
 Indications for Offering Fertility Preservation 281; Vulnerability of the Reproductive System to Cancer Treatment 282; Mode of Action of Gonadotoxic Agents 282; Assessment of Ovarian Reserve 283; Fertility Preservation Options 283; Novel Options of Fertility Preservation 287
- 28. Human Embryonic Stem Cells—Role in Regenerative Medicine** 289
Pankaj Talwar, Jagat Prakash Arya
 ESCs and Regenerative Medicine 289; Surface Antigen Markers of hESCs 291; Evidence Supporting the Potential of ESCs for use in Regenerative Medicine 291; Cryopreservation of Human ESCs 291; Steps of hESC Culture 297; Composition of Media 299
- 29. Single Embryo Transfer** 301
Nandita Palshetkar
 Selection of Patients for SET 302; Selection of Excellent Quality Embryo for SET 302; Role of Cryopreservation in Set 302; SET in Oocyte Donation Cycles 303; Role of Preimplantation Genetic Diagnosis in SET Cycles 303
- 30. Spindle View** 305
Cathy Boutin
 Overview 305; QPLM Using Polscope Technology 306; Birefringence 306; Azimuth 307; The Spindle Apparatus 308; Looking to the Inner Zona: Mean Retardance as a Predictor 311; Determining Cryodamage in Oocytes Post-thaw 311
- 31. Analysis of Fertilization and Embryo/Blastocyst Grading** 314
Sujatha R, Ashraf CM
 Analysis of Fertilization 314; Assessment of Early Cleavage 318; Fragmentation and Multinucleation 321; Day Four Embryo Check 322; Blastocyst Scoring 322
- 32. Preimplantation Genetic Diagnosis** 327
Satish Sharma, Rajvi Sharma
 History 327; Indications for PGD 328; Conditions Diagnosed 328; Mechanics of PGD 329; Ethical Issues 332
- 33. Utilization of High-Security Straws for Embryo Freezing in an In Vitro Fertilization** 334
Basak Balaban, Kayhan Yakin, Ayca Isiklar, Bulent Urman
 Materials and Methods 335; Results 337; Discussion 337

34. Cloning and ART	341
<i>Rajvi H Mehta</i>	
Embryo Splitting 342 ; Technical Lessons: Embryo Splitting in Farm Animals 343 ; Embryo Splitting in Humans: Potential Application 343 ; Concerns about the Use of Embryo Splitting 343 ; Somatic Cell Nuclear Transfer: Therapeutic or Reproductive Cloning 343 ; Stages of Nuclear Transfer 344 ; Efficacy of Somatic Cell Nuclear Transfer 346 ; Limitation of Somatic Cell Nuclear Transfer 346 ; Application of Nuclear Transfer Technology 347 ; Extension from Animals to Humans 347 ; Clone: Not Essentially Identical 347 ; Ethics of Cloning 347 ; Indian Perspective to Cloning 348	
35. Embryo Transfer Simplified	350
<i>Prakash Trivedi, Anil Chittake, Maya Prasad, Priti Trivedi</i>	
Mock or Trial Embryo Transfer 350 ; Grading and Scoring of the Embryos 350 ; Timing of Embryo Transfer 352 ; Cleaning the Cervix: Removing Cervical Mucus before ET 353 ; Uterine Relaxants 353 ; Types of Catheters 355 ; Luteal Support Post ET Procedures 357	
36. Embryo Culture—New Strategies	360
<i>Suresh Kattera</i>	
Culture Media and Stage of Embryos 360 ; When to Transfer Embryos? 361 ; Culture System 361 ; Implementing a Good Freezing Program 362	
37. Embryo and Blastocyst Culture	364
<i>Ved Prakash, Shubhangi Gangal</i>	
Culture Medium 365 ; Embryo Culture System 367 ; Egg Retrieval and Identification 368 ; Fertilization Assessment 369 ; Evaluation of Embryo Quality 370 ; Blastocyst Culture 371 ; Embryo Transfer 372	
38. Embryo Transfer	374
<i>Hrishikesh D Pai, Nandita Palshetkar, Rishma Dhillon Pai</i>	
Procedure of Embryo Transfer 374 ; Steps Involved in Embryo Transfer 381 ; Preventing an Ectopic Pregnancy following ET 383 ; Variations of ET Technique 384	
39. Physiology and Culture of the Human Blastocyst	386
<i>David K Gardener</i>	
Human Embryo Physiology 386 ; Nutrient Requirements and Energy Metabolism 387 ; Nutrients Available to the Embryo 388 ; Culture Systems for the Human Embryo 389 ; What is the Rate-limiting Factor at Implantation: The Embryo or the Endometrium? 391 ; Blastocyst Transfer: A Panacea for All Ills? 391	
40. Single Blastocyst Transfer: A Prospective Randomized Trial	395
<i>David K Gardener</i>	
Materials and Methods 396	
41. Intracytoplasmic Sperm Injection: Revisited	400
<i>Shushma Vaid</i>	
Clinical Application 401 ; Intracytoplasmic Sperm Injection Laboratory 402	
42. Karyotyping and ART	408
<i>Manisha Vajpeyee</i>	
Chromosome Classification 409 ; Relationship between Cytogenetic Abnormalities and Gestational Age 410 ; Indications for Prenatal Cytogenetic Diagnosis 411 ; Lab Set-up and Equipments for Peripheral Blood Karyotyping 412 ; Amniotic Fluid Culture 413 ; Future Prospects 414	
43. Oocyte and Maternal Inheritance	416
<i>Sohani Verma</i>	
Oogenesis 416 ; Structure of mtDNA 419 ; Clinical Implications in Reproduction 421 ; Human Cloning 422	
44. In Vitro Maturation—Current Scenario	424
<i>Nalini Mahajan, Sarabpreet Singh</i>	
Oocyte Maturation 424 ; Oocyte Maturation, Follicular Size and Developmental Competence 426 ; Techniques for Oocyte Maturation 426 ; Protocols, Monitoring and Procedure 428 ; Clinical Outcome 431 ; Clinical Application 432	
45. Y Chromosome and Its Role in Male Infertility	436
<i>Ashish Fauzdar, RN Makroo, Mohit Chowdhry</i>	
Y Chromosome 436 ; Chromosome Abnormalities 438 ; Y Chromosome DNA Microdeletion 439 ; Cystic Fibrosis Panel for Congenital Bilateral Absence of the Vas Deferens 441	

- 46. FISH and ART** 443
Manisha Vajpeyee
 Concept 443; Role of Fish in Reproductive Biology 444; Cleavage-stage Embryo Biopsy 449; Genetic Testing 449
- 47. The Role of Sperm in Normal Embryogenesis** 453
Douglas T Carrell, Dinesh K Ahirwar
 Chromosomal Aneuploidy and Telomere Defects 454; Demographical Effect 458; Lifestyle Factors 458
- 48. TUNEL Assay for the Assessment of Sperm Chromatin Damage** 465
Rakesh K Sharma, Ashok Agarwal
 Etiology of DNA Damage 466; Mechanisms of Sperm DNA Damage 466; Measuring Sperm DNA Damage 467; Equipment and Reagents 470; Reference Range of Sperm DNA Damage 471; Factors Affecting the Assay Results 472; Association of Sperm DNA Damage with Semen Parameters and ART Outcome 472
- 49. ICSI—An Overview** 479
Soumya Ramesh, Goral Gandhi
 Patient Selection 480; Collection of Semen for ICSI 481; Sperm Preparation Techniques for ICSI 482; Oocyte Preparation 483; Collection of Oocytes 483; Preparation of Oocytes for ICSI 485; Preparation of the ICSI Plate 487; Assessment of Fertilization Post-ICSI 490; Complications of ICSI 492; IVF Versus ICSI 492; Genetic Testing 492; Newer Advances 493

Section - 3 Pelvic and Reproductive Disorders—Embryology Outcome

- 50. Immunology and Reproductive Disorders** 501
SS Chawla
 Pre-eclampsia 501; Pathogenesis of Pre-eclampsia 502; Immunology and Pregnancy Loss 505; Immunological Infertility 508; How to Boost Your Immune System? 510
- 51. Polycystic Ovary Syndrome** 514
Bhupesh K Goyal
 Definition of Polycystic Ovary Syndrome 514; Clinical Features 515; Evaluation 516; Management of PCOS 516; PCOS and IVF-ET 518
- 52. Ovarian Hyperstimulation Syndrome** 521
Anjali Tempe, Nancy Kumar
 Definition, Incidence, Classification 521; Etiopathology 522; Prevention 522; Investigations and Monitoring in a Case of OHSS 523; Treatment of Severe OHSS 523; Complications of OHSS 524
- 53. Laparoscopy and Fertility Enhancement** 527
BS Duggal, Sandeep K, Nikita Naredi
 Types of Endoscopic Procedures 527; Laparoscopic Surgeries 527; Hysteroscopy 532; Newer Advances in Endoscopic Surgeries 533
- 54. Endometrium in ART** 537
Mala Arora, Surveen Ghumman
 Histological Changes 538; Biochemical and Molecular Changes 538; Immunological Aspects of Endometrial Implantation 540; Endometrial Vascular Changes 541; Newer Molecules Identified in Endometrial Implantation 541; Current Strategies to Assess Endometrial Receptivity 542; Treatment of Poor Uterine Receptivity 543; Medical Treatment of Endometritis 544
- 55. Genital Tuberculosis** 547
Ashok Rajput, Vivek marwah
 Epidemiology 547; Genital Tuberculosis in Infertile Women 547
- 56. Endoscopic Complications in ART** 556
Nutan Jain, Priyanka Sahni
 Risk Factors 556; Contraindications 557; Complications 557; Venous Gas Embolism 557; Veress Needle Related 558; Injury to Vessel and Viscera 559; Primary Trocar Related 559; Accessory Trocar Related Injury 560; Ureteric Injury 563; Postoperative Course and Checklist for Detection of Complications 563

Section - 4

ART Step by Step—Beginner's Guide

- 57. Culture Media 569**
Pankaj Talwar, Manju Dagar
 Buffer System 569; Hepes 570; MOPS 570; Quality of Water 570; Incubator Handling 570; Physiology and Sequential Culture Media⁴ 572; Embryo Handling Guidelines 576; Media Preparation and Pre-equilibration 578; Quality Control Testing for the Culture Media⁵ 578; Common Prerelease Specifications Recommended for the IVF Culture Media 580; Measuring pH of the Culture Media¹ 580; Precautions to be Taken While Dispensing Media and Opening the Media Bottles 581; Storage of the Media 583; Shelf-life and Packaging 583
- 58. Air in the Laboratory 584**
Pankaj Talwar, Yogita Parashar
 Modalities of Air Filtrations 585; Procedure of Air Purification 585; Air Composition 586; Volatile Compounds in the Air 587; Air Filtration Systems 587; Quality Check of Air in the ART Laboratory 588; Quality of Air in the Clean Rooms 589; Quality of Air in the Incubators 590; Quality of Air in the Biological Safety Cabinets 590; Biological Safety Cabinet Classes 590; Quality Control of Air in the ART Laboratory 593; Air Handling Unit of an ART Center 593
- 59. Disposables in ART 597**
VDS Jamwal, Pankaj Talwar
 Quality Control Tests 597; Material Used in IVF Laboratories 599; Types of Disposables 600
- 60. Ovum Pick-up 606**
Pankaj Talwar, Neeti Chhabra
 Brief History 606; Relevant Issues Regarding Ovum Pick-up 606; Ovum Pick-up Step by Step 611; Common Problems Encountered during Ovum Pick-up 613; Complications 614; The Learning Curve 614
- 61. Insemination and IVF 616**
Pankaj Talwar, Priyanka Bagai
 Sperm Concentration 616; Media for Sperm Preparation and Insemination 616; Duration of Insemination 616; Method of Insemination 616; Tips for Denudation 618
- 62. Semen Preparation in IVF 619**
Pankaj Talwar, Suvarna Kumar
 Essentials of Sperm Preparation 619; Comparative Nomenclature of WHO Referral Values as Cited Below 620; Techniques of Semen Preparation 620; Basis of Centrifugation 622; Improvement of Motility and Sperm Function 623; The Ideal Sperm Separation Technique 624
- 63. Analysis of Fertilization 625**
Pankaj Talwar, Vrunda Appanagari
 The Oocyte 625; Assessment Of Fertilization 628; Pronuclear Scoring Systems 630; The Centrosome in Fertilization 630; Embryo Assessment 630
- 64. Embryo Culture 636**
Pankaj Talwar, Pooja Sinha
 Preparing the Culture System 638; Principles of Embryo Culture 639; Tips for Embryo Culture 639; Step by Step Fertilization Assessment on Day 1 640; Step by Step Scoring of Human Pronuclear Embryos 642; Embryo Assessment on Day 2 642; Step by Step: Embryo Assessment on Day 3 643; Step by Step: Embryo Assessment on Day 5 (Blastocyst Culture) 644; Blastocyst Scoring 644
- 65. Intracytoplasmic Sperm Injection 646**
Pankaj Talwar
 ICSI Media and Pipettes 646; Preparation of ICSI Dishes 647; Denudation 650; Manipulation of Spermatozoa 650; Manipulation of Oocytes 651; Microinjection of Oocytes With Mature Spermatozoa 652; Difficult ICSI Cases 654; Points to Remember 655
- 66. Semen Banking 656**
Pankaj Talwar
 Background of Sperm Banking 656; Principles of Cryobiology 657; Indications of Semen Cryopreservation 657; Outline of Cryoprotectants 657; Essentials of Freeze-thaw Cycle 659; Effects of Cryofreeze/Thaw Cycle 663; Legislation Pertaining

to The Semen Banking **663**; Donor Screening Prior to Semen Banking **663**; Cross-infection in The Semen Banks **664**; Security of the Semen Bank **664**; The Future of Semen Cryopreservation **664**; Emerging Role of Semen Banking in Onco-ART **665**

67. Embryo Transfer Step by Step **668**
Pankaj Talwar
 Factors Affecting Embryo Transfer **668**; Embryo Transfer Step by Step **672**

68. Brief View of Cryobiology **678**
Pankaj Talwar
 Basic Definitions **679**; Thermodynamics **679**; Physics **679**; Concept of Latent Heat **679**; Biology of Cryofreezing **680**; Cryoprotectants **680**; Principles of Cryobiology **681**; Steps of Cryopreservation **681**; Events during Freezing **683**; Freeze Injuries **684**; Events during Thawing **684**; Thaw Injuries **684**; Risk of Storing Biological Materials at Low Temperatures **684**

69. Embryo Slow Freezing **686**
Pankaj Talwar
 Historical Background **686**; Indications **686**; Principles of Cryofreezing of Human Embryos **687**; Cryofreezing: Grading and Selection of Embryos **687**; Embryo Freezing Simplified **688**

70. Embryo Thawing **697**
Pankaj Talwar
 Mode of Injuries **697**; Cryoprotective Agents: Two Types **697**; Principles of Embryo Thawing **698**; The Potential Danger of Disease Transmission **703**

71. Oocyte Vitrification **705**
Pankaj Talwar
 Oocyte Cryopreservation Methods **705**

72. Oocyte Warming **715**
Pankaj Talwar
 Background of Oocyte Freezing **715**; Warming Made Easy Using Medicult Devitrification Medium Using Cryoleaf **716**; Survival and Fertilization Rate **718**

73. Oocyte Slow Freezing **720**
Pankaj Talwar
 Background **720**; Evaluation of Oocyte Quality **720**; Essential Principles of Controlled Rate Cooling **721**; Survival of Frozen-thawed Oocytes and Sucrose Concentrations **721**; Oocyte-denudation—To Do or Not? **722**; Factors Affecting the Clinical Efficiency of Oocyte Cryopreservation **722**; Procedure of Oocyte Freezing and Thawing **723**

74. Protein-free Media **730**
Jaffar Ali
 Background **730**; Disadvantages of the Present Day Embryo Culture Media **731**; Scenario in the 1980s **732**; Functions of Proteins in Culture **732**; Formulation of the Synthetic Protein-free Medium **733**; Summary of Overall Results of the PFM Study **733**; Protocols for the Use of PFM **734**

75. Ovarian Cortex Freezing **738**
Pankaj Talwar
 Vulnerability of the Reproductive System to Cancer Treatment **738**; Indications for Ovarian Cryopreservation **740**; Assessment of Ovarian Reserve **740**; Current Techniques of Fertility Preservation **741**; Ovarian Cortex Cryopreservation **741**

76. Fertility Issues in Gynecological Cancers **751**
Tony Jose
 Effects of Cancer Treatment on Fertility **751**; Options for Fertility Preservation **753**; Conservative Gynecologic Surgery **754**; Fertility Preservation Options in Individual Cancers **754**; Fertility Preservation in Ovarian Cancers **757**; Fertility Preservation in Endometrial Cancers **758**

77. Embryo Vitrification **761**
Pankaj Talwar
 Overview **761**; Principles of Vitrification **761**; Common Carrier Devices and Methods **762**; Superiority of Various Vitrification Methods **763**; Protocols for Embryo Vitrification Using Cryoloop and Vitrolife Vitrification Media **763**; Preventing Potential Contamination From LN₂ **768**

78. Embryo Reduction: Our Experience 773
Preeti Chauhan
Incidence of Multifetal Pregnancy (MFP) 773; Risks Associated with Multifetal Pregnancies 773; Prevention of Multifetal Pregnancies 774; Counseling 775; Options 775; Multifetal Pregnancy (Embryo) Reduction 775; Selective Termination Versus MFPR 775; Rationale 775; Time of Procedure 775; Various Approaches for Multifetal Pregnancy Reduction 775; Embryo Reduction 776; Selection of Gestation SAC/Fetuses for Reduction 776; Transvaginal Embryo Reduction Procedure 776; Complications of MFPR 778; Benefits of MFPR 778; Author's Experience 778

79. Testicular Tissue Preservation 781
Pankaj Talwar
Options 781; Indications 781; Spermatogenesis and Stem Cells 781; Safety of the Cryofreezing Procedures 782; Principles of Testicular Preservation 782; Freezing Technique Protocol 783; Ethical Issues 784

Section - 5
Challenges in ART—A Clinician's Perspective

80. Recurrent Implantation Failure 787
Surveen Ghumman
Genetic Cause of RIF 787; Immunological Causes and Thrombophilia 790; Altered Expression of Endometrial Molecules 791; Hormonal Cause 792; Infections 792; Anatomical Factors in Uterus 793; Endometrial Inadequacy 793; Thick Zona Pellucida 794; Culture Conditions Affecting Embryo 794; Compromised Ooplasm Component 795; Faulty Embryo Transfer Technique 795; Hydrosalpinx 795; Endometriosis 795; Ovarian Stimulation Protocol 796; Psychological Cause 796

81. Medical Management of Ectopic Pregnancy 801
Surender Mohan
Definition 801; Incidence 801; Risk Factors of Ectopic Pregnancy 801; Clinical Manifestations and Diagnosis 802; Management 803; Pregnancy of Unknown Location 804; Protocols 805; Role of Medical Management in Unusual Types of Ectopic Pregnancy 807

82. Hydrosalpinx in ART 811
Neeta Singh, Prerna Gupta
Diagnosis 811; Mechanism of Action 812; Treatment Options 812

83. Ejaculation and its Dysfunction 815
SC Basu
Physiology of Ejaculation 815; Chronology of Events 816; Ejaculatory Dysfunctions 819

Appendices 833

Index 891
