

Contents

Section One: General Bacteriology

1. Historical Development of Microbiology	3
• <i>Infection and Contagion</i> 3 • <i>Discovery of Microorganisms</i> 3 • <i>Conflict Over Spontaneous Generation</i> 4 • <i>Role of Microorganisms in Disease</i> 4 • <i>Scientific Development of Microbiology</i> 5	
• <i>Golden Era of Medical Bacteriology</i> 7 • <i>Paul Ehrlich (1854-1915)</i> 7 • <i>Golden Age of Microbiology (1854-1914)</i> 8 • <i>Discovery of Viruses</i> 8 • <i>Immunity and Immunization</i> 8 • <i>Serotherapy and Chemotherapy</i> 9 • <i>Development of Molecular Biology and Molecular Genetics</i> 10 • <i>Nobel Prizes Awarded for Research in Microbiology</i> 10	
2. Microscopy.....	13
• <i>Microscopy: Instruments</i> 13	
3. Morphology of Bacteria.....	18
• <i>Comparison of Prokaryotic Cells–Eukaryotic Cells</i> 18 • <i>Study of Bacteria</i> 18 • <i>Arrangement of Bacterial Cells</i> 19 • <i>Anatomy of the Bacterial Cell</i> 20 • <i>Pleomorphism and Involution Form</i> 30	
• <i>L-forms of Bacteria (Cell-wall-defective Organisms)</i> 30	
4. Physiology of Bacteria.....	32
• <i>Principles of Bacterial Growth</i> 32 • <i>Bacterial Nutrition</i> 34 • <i>Bacterial Metabolism</i> 36	
• <i>Oxidation-Reduction (O-R) Potential (Redox Potential)</i> 37	
5. Sterilization and Disinfection	39
• <i>Definitions of Frequently Used Terms</i> 39 • <i>Methods of Sterilization and Disinfection</i> 39	
• <i>Recommended Concentrations of Various Disinfectants</i> 51 • <i>Testing of Disinfectants</i> 51	
• <i>Sterilization of Prions</i> 53 • <i>Methods of Sterilization and Disinfection</i> 54	
6. Culture Media	55
• <i>Main Purposes of Bacterial Cultivation</i> 55 • <i>Common Ingredients of Culture Media</i> 55	
• <i>Classification of Media</i> 56	
7. Culture Methods.....	64
• <i>Methods of Bacterial Culture</i> 64 • <i>Aerobic Culture</i> 65 • <i>Anaerobic Culture Methods</i> 66 • <i>Methods of Anaerobiosis</i> 66 • <i>Methods of Isolating Pure Cultures</i> 68	
8. Identification of Bacteria.....	71
• <i>Methods Used to Identify Bacteria</i> 71	
9. Bacterial Taxonomy.....	82
• <i>Taxonomy</i> 82 • <i>Bacterial Classification</i> 82 • <i>Classification Systems</i> 83	
10. Bacterial Genetics.....	85
• <i>Structure and Functions of the Genetic Material</i> 85 • <i>Extrachromosomal Genetic Elements</i> 87	
• <i>Genotypic and Phenotypic Variations</i> 88 • <i>Transmission of Genetic Material (Gene Transfer)</i> 92	
• <i>Genetic Mechanisms of Drug Resistance in Bacteria</i> 97 • <i>Transposable Genetic Elements</i> 98	
• <i>Molecular Genetics</i> 99 • <i>Genetic Probes</i> 100 • <i>Blotting Techniques</i> 101 • <i>Polymerase Chain Reaction (PCR)</i> 102 • <i>Gene Therapy</i> 104	
11. Infection	107
• <i>Microorganisms and Host</i> 107 • <i>Infection and Infectious Disease</i> 107 • <i>Classification of Infections</i> 108	
• <i>Sources of Infection</i> 108 • <i>Modes of Transmission of Infection</i> 109 • <i>Factors Predisposing to Microbial Pathogenicity</i> 111 • <i>Types of Infectious Diseases</i> 114 • <i>Epidemiological Terminology</i> 115	

Section Two: Immunology

12.	Immunity	119
• Classification 119 • Measurement of Immunity 126 • Local Immunity 127 • Herd Immunity 127		
13.	Antigens	128
• Types of Antigen 128 • Antigenic Determinant or Epitome 128 • Determinants of Antigenicity 129		
• Tolerogens 131 • Biological Classes of Antigens 131 • Superantigens 131		
14.	Antibodies—Immunoglobulins	133
• Antibody Structure 133 • Immunoglobulin Classes 135 • Antigenic Determinants on Immunoglobulins 139		
15.	The Complement System.....	141
• Principle Pathways of Complement Activation 142 • Quantitation of Complement (C) and its Components 145 • Biosynthesis of Complement 145 • Complement Deficiencies 145		
16.	Antigen-Antibody Reactions	147
• Antigen-Antibody Interactions 147 • General Characteristics of Antigen-Antibody Reactions 148		
• Antigen and Antibody Measurement 148 • Parameters of Serological Tests 148 • Serological Reactions 148 • Uses of ELISA 162		
17.	Structures and Functions of the Immune System.....	165
• Types of Immune Response 165 • Organs and Tissues of the Immune System 165 • Cells of the Lymphoreticular System 168 • Major Histocompatibility Complex 173		
18.	Immune Response.....	177
• Type of Immune Response 177 • Humoral Immunity 177 • Fate of Antigen in Tissues 179		
• Production of Antibodies 179 • Cell-mediated Immune Responses 183 • Cytokines 184		
• Immunological Tolerance 187 • Theories of Immune Response 188		
19.	Immunodeficiency Diseases.....	191
• Classification of Immunodeficiency Diseases 191 • Primary Immunodeficiencies 191 • Disorders of Specific Immunity 191 • Disorders of Complement 195 • Disorders of Phagocytosis 195 • Secondary Immunodeficiencies 196		
20.	Hypersensitivity Reactions	198
• Classification of Hypersensitivity Reactions 198 • Type I Hypersensitivity (IgE Dependent) 199		
• Type II Hypersensitivity: Cytolytic and Cytotoxic 203 • Type III Hypersensitivity—Immune Complex-mediated 204 • Type IV Hypersensitivity—Delayed Hypersensitivity 206 • Shwartzman Reaction 207		
21.	Autoimmunity.....	209
• Features of Diseases of Autoimmune Origin 209 • Mechanisms of Autoimmunity 209 • Classification of Autoimmune Diseases 211		
22.	Immunology of Transplantation and Malignancy	216
• Types of Transplants 216 • Allograft Reaction 217 • Histocompatibility Testing 218 • Fetus as Allograft 219 • Graft-versus-host Reaction 219 • Immunology of Malignancy 219 • Tumor Antigens 220 • Immune Response in Malignancy 220 • Immunological Surveillance 221		
• Immunotherapy of Cancer 221 • Strategies for Vaccination Against Cancer 222		
23.	Immunohematology.....	223
• Other Blood Group Systems 224 • Medical Applications of Blood Groups 224 • Complications of Blood Transfusion 225 • Hemolytic Disease of the Newborn 225		

Section Three: Systemic Bacteriology

24.	Staphylococcus.....	229
•	<i>Staphylococcus aureus</i> 229 • Other Coagulase-positive Staphylococci 236 • Micrococci 238	
•	<i>Stomatococcus</i> 238 • <i>Alloiococcus</i> 238	
25.	Streptococcus and Enterococcus	240
•	<i>Classification</i> 240 • <i>Streptococcus pyogenes</i> 242 • <i>Laboratory Diagnosis</i> 248 • Other Streptococci Pathogenic for Humans 249 • <i>Enterococcus</i> 250 • <i>Viridans Streptococci</i> 251	
26.	Pneumococcus (<i>Diplococcus pneumoniae</i>: <i>Str. pneumoniae</i>)	254
•	<i>Pneumococci</i> (<i>Diplococcus pneumoniae</i> , <i>Streptococcus pneumoniae</i>) 254	
27.	Neisseria and Moraxella	260
•	<i>Neisseria meningitidis</i> (<i>Meningococcus</i> ; <i>Diplococcus Intracellularis Meningitidis</i>) 260	
•	<i>Morphology</i> 260 • <i>Neisseria gonorrhoeae</i> (<i>Gonococcus</i>) 264 • Nongonococcal (Nonspecific Urethritis 268 • Commensal Neisseriae 268 • <i>Moraxella</i> 269 • <i>Moraxella lacunata</i> (<i>Morax-Axenfeld Bacillus</i>) 269 • <i>Kingella</i> 270	
28.	Corynebacterium	272
•	<i>Corynebacterium</i> 272 • <i>Corynebacterium diphtheriae</i> 272 • Other Medically Important Corynebacteria 279 • <i>Diphtheroids</i> 280 • Other Coryneform Genera 280	
29.	Bacillus	282
•	General Characteristics of <i>Bacillus</i> 282 • Species 282 • <i>Bacillus anthracis</i> 282 • Anthracoid Bacilli 287 • Other <i>Bacillus</i> Species 288	
30.	Clostridium.....	290
•	General Features of Clostridia 290 • Classification 291 • <i>Clostridium perfringens</i> 291 • <i>Clostridium tetani</i> 296 • <i>Clostridium botulinum</i> 299 • <i>Clostridium difficile</i> 301	
31.	Nonsporing Anaerobes	303
•	<i>Classification</i> 303 • Anaerobic cocci 303 • Gram-negative Anaerobic Coccii 304 • Anaerobic, Nonspore-forming, Gram-positive Bacilli 304 • Anaerobic Gram-negative Bacilli 305 • Anaerobic Infections 306	
•	Treatment of Anaerobic Infections 308	
32.	Mycobacterium tuberculosis	309
•	<i>M. tuberculosis</i> Complex (MTC) 309 • <i>Mycobacterium tuberculosis</i> 310	
33.	Mycobacterium leprae	325
•	<i>Mycobacterium leprae</i> 325 • <i>Mycobacterium lepraeumurium</i> 333	
34.	Nontuberculous Mycobacteria	335
•	<i>Classification</i> 336 • Saprophytic Mycobacteria 338 • Pathogenesis 338 • Pulmonary Disease 339	
•	Disseminated Disease 339 • Laboratory Diagnosis 339 • Epidemiology 340	
35.	Actinomycetes, Nocardia	342
•	<i>Actinomyces</i> 342 • <i>Nocardia</i> 344 • Actinomycotic Mycetoma 345	
36.	Enterobacteriaceae: Escherichia, Klebsiella, Proteus and Other Genera	347
•	Characteristics of the Family Enterobacteriaceae 347 • Classification of Enterobacteriaceae 347	
•	Classification of Enterobacteriaceae by Tribes 348 • <i>Escherichia coli</i> 348 • <i>Edwardsiella</i> 357	
•	<i>Citrobacter</i> 357 • <i>Klebsiella</i> 357 • <i>Klebsiella pneumoniae</i> 358 • <i>Enterobacter</i> 359 • <i>Hafnia</i> 359	
•	<i>Serratia</i> 360	
37.	Tribe Proteae: Proteus, Morganella and Providentia	362
•	<i>Classification</i> 362 • <i>Proteus</i> 362 • <i>Morganella</i> 364 • <i>Erwinia</i> 364	
38.	Shigella.....	366
•	<i>Shigella</i> 366	

39. Enterobacteriaceae III: Salmonella	372
• <i>Salmonella</i> 372 • <i>Diagnosis of Carriers</i> 383 • <i>Prophylaxis</i> 383 • <i>Treatment</i> 384 • <i>Drug Resistance</i> 384 • <i>Salmonella Gastroenteritis</i> 384 • <i>Salmonella Septicemia</i> 385 • <i>Multiresistant Salmonellae</i> 385 • <i>Epidemiology</i> 385	
40. Vibrio, Aeromonas and Plesiomonas	387
• <i>Vibrio</i> 387 • <i>Vibrio cholerae</i> 387 • <i>Resistance</i> 389 • <i>Halophilic Vibrios</i> 396 • <i>Aeromonas</i> 397 • <i>Plesiomonas</i> 398	
41. Campylobacter and Helicobacter	400
• <i>Campylobacter</i> 400 • <i>Campylobacter jejuni and Campylobacter coli</i> 400 • <i>Helicobacter</i> 402 • <i>Helicobacter cinaedi</i> 404 • <i>Helicobacter fennelliae</i> 404	
42. Pseudomonas, Stenotrophomonas, Burkholderia	405
• <i>Pseudomonas aeruginosa</i> 405 • <i>Antigenic Characteristics</i> 406 • <i>Stenotrophomonas maltophilia</i> (Formerly <i>Pseudomonas Maltophilia</i>) 408 • <i>Burkholderia Cepacia</i> (Formerly <i>Pseudomonas cepacia</i>) 409 • <i>Burkholderia mallei</i> (formerly <i>Pseudomonas mallei</i>) 409 • <i>Burkholderia pseudomallei</i> 410 • <i>Glucose Nonfermenters</i> 411	
43. Legionella.....	413
• <i>Legionella pneumophila</i> 413	
44. Yersinia, Pasteurella, Francisella.....	416
• <i>Yersinia pestis</i> (Formerly <i>Pasteurella pestis</i>) 416 • <i>Yersiniosis</i> 421 • <i>Pasteurella multocida</i> (Formerly <i>Pasteurella septica</i>) 422 • <i>Francisella tularensis</i> (<i>Pasteurella tularensis</i> , <i>Brucella tularensis</i>) 423	
45. Haemophilus	426
• <i>Species</i> 426 • <i>Haemophilus influenzae</i> 426 • <i>Haemophili other than H. influenzae</i> 430	
46. Bordetella	433
• <i>Species</i> 433 • <i>Bordetella pertussis</i> (<i>Bordet-Gengou bacillus</i> ; Formerly <i>Haemophilus pertussis</i>) 433 • <i>Bordetella parapertussis</i> 437	
47. Brucella.....	439
• <i>Brucella</i> 439 • <i>Epidemiology</i> 445	
48. Spirochetes.....	446
• <i>Description</i> 446 • <i>Classification</i> 447 • <i>Treponema</i> 447 • <i>Nonvenereal Treponematoses</i> 455 • <i>Nonpathogenic treponeme</i> 456 • <i>Borrelia</i> 456 • <i>Leptospira</i> 460 • <i>Treatment</i> 463	
49. Mycoplasma and Ureaplasma.....	465
• <i>Classification</i> 465 • <i>Mycoplasma as Cell Culture Contaminants</i> 471 • <i>Mycoplasmas and L Forms of Bacteria</i> 471 • <i>Atypical Pneumonia</i> 472	
50. Miscellaneous Bacteria.....	474
• <i>Listeria monocytogenes</i> 474 • <i>Erysipelothrix rhusiopathiae</i> 475 • <i>Alcaligenes faecalis</i> 476 • <i>Chromobacterium violaceum</i> 476 • <i>Flavobacterium meningosepticum</i> 477 • <i>Donovania granulomatis</i> (<i>Calymmatobacterium granulomatis</i>) or <i>Klebsiella granulomatis</i> 477 • <i>Acinetobacter</i> (<i>Mima polymorpha</i>); <i>Bacterium anitratum</i> 477 • <i>Rat Bite Fever</i> (<i>Streptobacillus moniliformis</i> and <i>Spirillum minus</i>) 478 • <i>Eikenella corrodens</i> 479 • <i>Cardiobacterium hominis</i> 479 • <i>Capnocytophaga</i> 479 • <i>Gardnerella vaginalis</i> 480	
51. Rickettsiaceae, Bartonellaceae and Coxiella	481
• <i>Genus Rickettsia</i> 481 • <i>Classification</i> 481 • <i>Genus Ehrlichia</i> 486 • <i>Genus Coxiella: Q fever</i> 487 • <i>Bartonella</i> 488	
52. Chlamydia and Chlamydophila	492
• <i>Classification</i> 492 • <i>Chlamydia Species</i> 492	

Section Four: Virology

53. General Properties of Viruses.....	503
• Main Properties of Viruses 503 • Morphology of Viruses 503 • Structure and Chemical Composition of the Viruses 504 • Susceptibility to Physical and Chemical Agents 505 • Viral Hemagglutination 506	
• Viral Replication 507 • Eclipse Phase 508 • Abnormal Replicative Cycles 508 • Cultivation of Viruses 508 • Detection of Virus Growth in Cell Culture 510 • Viral Assay 511 • Viral Genetics 512	
• Nongenetic Interactions 513 • Classification of Viruses 513 • Viroids 516 • PRIONS 516	
54. Virus-Host Interactions: Viral Infections	517
• Interactions between Viruses and Host Cells 517 • Pathogenesis of Viral Diseases 518 • Transmission of Human Virus Infections 518 • Spread of Virus in the Body 519 • Significance of the Incubation Period 520 • Host Response to Virus Infections 520	
55. Laboratory Diagnosis, Prophylaxis and Chemotherapy of Viral Diseases.....	523
• Laboratory Diagnosis of Viral Infections 523 • Immunoprophylaxis of Viral Diseases 524	
• Chemoprophylaxis and Chemotherapy of Virus Diseases 526	
56. Bacteriophages	528
• Role of Bacteriophages 528 • Morphology 528 • Life Cycle 528 • Significance of Phages 530	
57. Poxviruses	532
• Classification 532 • Morphology 532 • Physical and Chemical Properties 533 • Antigenic Structure 533 • Cultivation and Host Range 533 • Variola and Vaccinia Viruses 533 • Control of Smallpox 534 • Other Poxvirus Diseases 534	
58. Herpesviruses.....	535
• Structure 535 • Classification 535 • Herpes Simplex Virus (HSV) 535 • Herpesvirus simiae: B virus 538 • Varicella-zoster Virus (VZV) 538 • Herpes Zoster (Shingles, Zona) 538 • Cytomegalovirus (CMV) 539 • Epstein-Barr Virus (EBV) 540 • Human Herpesviruses 6 (HHV6) 542 • Human Herpesvirus 7 (HHV7) 542 • Human Herpesvirus 8 (HHV8) 542 • Varicella in Pregnancy 542	
59. Adenoviruses.....	544
• Adenoviruses 544	
60. Papovaviruses	547
• Papillomaviruses 547 • Polyomaviruses 548	
61. Parvovirus	550
• Parvovirus 550 • Dependovirus 550 • Erythrovirus 550 • Parvovirus (B19) 550	
62. Picornaviruses	552
• Classification 552 • Important Properties of Picornaviruses 552 • Enteroviruses 552	
• Poliovirus 553 • Coxsackievirus 556 • Echoviruses 558 • Other Enterovirus Types 558 • Acute Hemorrhagic Conjunctivitis 558 • Rhinoviruses 559	
63. Orthomyxovirus.....	561
• Influenza Viruses 561	
64. Paramyxoviruses.....	569
• Morphology and Structural Proteins of Paramyxoviruses 569 • Classification 569 • Parainfluenza Viruses 570 • Genus Rubulavirus 571 • Genus Morbillivirus 572 • Nipah and Hendra viruses 574	
• Genus Pneumovirus 574 • Metapneumovirus 575 • Newcastle Disease Virus (NDV) 575	
65. Arboviruses	577
• Classification 577 • Properties 577 • Laboratory Diagnosis 577 • Pathogenesis 579 • Families of Arboviruses 579 • Ungrouped Arboviruses 587 • Arbovirus Known to be Prevalent in India 587	

66.	Rhabdoviruses	589
	• Rabies Virus 589 • Rabies Related Viruses 598	
67.	Hepatitis Viruses	600
	• Hepatitis A Virus (HAV)—Infectious Hepatitis 600 • Hepatitis B Virus (HBV)—Serum Hepatitis 602 • Hepatitis C Virus (HCV) 608 • Hepatitis D Virus (HDV) 609 • Hepatitis E Virus (HEV) (Enterically Transmitted NANB or Epidemic NANB Hepatitis) 610 • Hepatitis G Virus 610	
	• Indications for Vaccination 611	
68.	Retroviruses—Human Immunodeficiency Virus (HIV)	613
	• Retroviruses 613 • Human Immunodeficiency Virus (HIV) 613	
69.	Slow Virus and Prion Diseases	627
	• Characteristics of Slow Viruses 627 • Classification 627	
70.	Miscellaneous Viruses	631
	• Rubivirus 631 • Rubella (German Measles) 631 • Viral Hemorrhagic Fevers 632 • Arenaviruses 632	
	• Filoviruses 633 • Coronaviruses 633 • Reoviridae 634	
71.	Oncogenic Viruses	638
	• Oncogenic Viruses 638 • Properties of Cells Transformed by Viruses 638 • Types of Tumor Viruses 638 • Oncogenic Viruses 639 • Viruses Associated with Human Cancer 640 • Oncogenes 641	
	• Antioncogenes 641 • Mechanisms of Viral Oncogenesis 641	

Section Five: Medical Mycology

72.	General Properties, Classification and Laboratory Diagnosis of Fungi	645
	• Differences of Fungi from Bacteria 645 • General Properties of Fungi 645 • Classification of Fungi 646 • Reproduction and Sporulation 647 • Laboratory Diagnosis 647 • Classification of Mycoses 650	
73.	Superficial, Cutaneous and Subcutaneous Mycoses	652
	• Superficial Mycoses 652 • Cutaneous Mycoses 653 • Subcutaneous Mycoses 657	
74.	Systemic Mycoses.....	662
	• Blastomycosis 662 • Paracoccidioidomycosis 663 • Coccidioidomycosis 663 • Histoplasmosis 664	
75.	Opportunistic Mycoses	667
	• Opportunistic Fungi 667 • Yeast Like Fungi 667 • Filamentous Fungi 671 • Other Fungal Agents 674 • Other Opportunistic Fungi 675 • Otomycosis 675 • Mycotic Keratitis 675	
76.	Mycotoxicosis	677
	• Mycetism 677 • Mycotoxicosis 677 • Psychotropic Agents 677	

Section Six: Miscellaneous

77.	Normal Microbial Flora of the Human Body.....	681
	• Role of Normal Microbial Flora 681 • Normal Microbial Flora of the Human Body 682	
78.	Infective Syndrome.....	685
	• Bacteremia and Septicemia 685 • Meningitis 688 • Urinary Tract Infections 691 • Sore Throat and Pneumonia 695 • Diarrhea and Dysentery 698 • Food Poisoning 701 • Sexually Transmitted Diseases (STDs) 701 • Wound Infection 705 • Pyrexia of Unknown Origin (PUO) 707	
79.	Hospital-Acquired Infection	709
	• Sources of Infections 709 • Factors Influencing Hospital-associated Infections 709 • Microorganisms Causing Hospital Infection 710 • Routes of Transmission 710 • Common Hospital-acquired Infection 711 • Diagnosis and Control of Hospital Infection 711 • Infection Control Policy 712	
	• Prevention 712 • Efficacy of Infection Control 713	

Contents

80.	Laboratory Control of Antimicrobial Therapy	714
	• <i>Antibiotic Sensitivity Tests</i> 714 • <i>Antibiotic Assays in Body Fluids</i> 720	
81.	Antimicrobial Chemotherapy	721
	• <i>Discovery of Antimicrobial Drugs</i> 721 • <i>Antibiotic</i> 721 • <i>Chemotherapeutic Agents</i> 721	
	• <i>Antibacterial Agents</i> 721 • <i>Mechanisms of Action of Antibacterial Drugs</i> 721 • <i>Antibiotic Resistance</i> 726 • <i>Acquisition of Resistance</i> 727	
82.	Immunoprophylaxis	729
	• <i>Vaccines</i> 729 • <i>Immunization</i> 730 • <i>Passive Immunization</i> 731 • <i>Individual Immunization</i> 732	
83.	Bacteriology of Water, Milk and Air	733
	• <i>Bacteriology of Water</i> 733 • <i>Bacterial Flora in Water</i> 733 • <i>Factors Determining the Number of Bacteria in Water</i> 733 • <i>Water-borne Pathogens</i> 734 • <i>Indicator Organisms</i> 734 • <i>Collection of Water Samples</i> 734 • <i>Bacteriological Examination of Water</i> 734 • <i>Bacteriology of Milk</i> 736 • <i>Bacteriology of Air</i> 737 • <i>Bacteriological Examination of Environmental Dust</i> 738	
84.	Hospital Waste Management	740
	• <i>Universal Precautions</i> 740 • <i>Definition of Biomedical Waste (BMW)</i> 740 • <i>Categories of Biomedical Waste</i> 741 • <i>Waste Segregation</i> 741 • <i>Treatment and Disposal Technologies for Health Care Waste</i> 741	
	• <i>Disposal</i> 744 • <i>Biomedical Waste Management in India</i> 744 • <i>Waste Management Program</i> 744	
85.	Vehicles and Vectors	746
	• <i>Vehicles and Vectors</i> 746	
86.	Emerging and Re-Emerging Infectious Diseases.....	748
	• <i>Re-emerging, or Resurging Diseases</i> 748 • <i>Factors Responsible for Emergence and Re-emergence of Infectious Diseases</i> 750	

Section Seven: Diagnostic Medical Microbiology

87.	Staining Methods	753
	• <i>Preparing Film or Smear for Staining</i> 753 • <i>Types of Stain</i> 753 • <i>Stained Preparations</i> 753	
	• <i>Simple Stains</i> 754 • <i>Differential Stains</i> 754 • <i>Reagents</i> 754 • <i>Fluorochrome Staining for Acid Fast Bacteria</i> 756 • <i>Special Stains for Corynebacterium Diphtheriae, (Stains to Demonstrate Metachromatic Granules)</i> 756 • <i>Staining of Volutin-containing Organisms</i> 756 • <i>Vital Staining</i> 757 • <i>Supervital Staining</i> 757 • <i>Capsule Stain</i> 757	
88.	Molecular Detection of Microorganisms.....	759
	• <i>Molecular Methods</i> 759 • <i>Non-nucleic Acid-based Analytic Methods</i> 761	
	<i>Index</i>	763
