

Contents

1. Guidelines for Clinical Transfusion Procedures	1
Clinical Decisions on Transfusion 1 • Assessing the Need for Transfusion 1 • Checklist for Clinicians Prescribing Blood 2	
• Requisition for Blood/Blood Components 2 • Informing the Patient 3 • Ordering Blood 3 • Blood Samples 5 • Donor 6	
• Protocol for Apheresis Donor 7 • Cross-Match of Blood 7	
• Issue of Blood Units 8 • Collecting Blood/Products Prior to Transfusion 9 • Components 9 • Dose/Outcome of Blood/Blood Components 9 • Storing Blood Products Prior to Transfusion 9	
• Administering Blood Products 11 • Time Limits for Infusion 13	
• Disposable Equipment for Transfusion 13 • Blood Warming 13	
• Pressure Devices for Rapid Infusion 14 • Recording the Transfusion 14 • Monitoring the Transfused Patients 15 • Acute Transfusion Reactions 16 • Protocol for Adverse Reaction of Blood Transfusion 16	
2. Blood Components and its Uses	17
Packed Red Blood Cells 18 • Leukoreduced Red Cells 19	
• Platelets 20 • Fresh Frozen Plasma 22 • Cryoprecipitate 24	
• Granulocytes 25 • Irradiated Red Cells 25 • Cryopreserved Red Cells 26	
3. Apheresis	29
Applications 29 • Separation Techniques 30 • Donor Aspects 32	
• Apheresis Components 34 • Therapeutic Apheresis 38	
• Therapeutic Plasmapheresis (Plasma Exchange) 39 • Peripheral Blood Stem Cells 39	
4. Transfusion Practices in Clinical Medicine	42
Massive Transfusion 42 • Disseminated Intravascular Coagulation 43 • Multi-Transfused Patients 45 • Sickle Cell Anemia 46	
• Thalassemia 48 • Hemophilia 50 • von Willebrand's Disease 54	
• Disorders of Vitamin K-Dependent Coagulation Factors 55	
• Malaria 56 • Autoimmune Hemolytic Anemia 56 • Anemia 57	
• Severe (Decompensated) Anemia 59 • Glucose-6-Phosphate Dehydrogenase Deficiency 60 • Bone Marrow Failure 60 • Gastrointestinal Bleeding 61	
5. Transfusion Practice in Obstetrics	62
Blood Loss during Delivery 62 • Transfusion Guidelines for Chronic Anemia in Pregnancy 63 • Major Obstetric Hemorrhage 63 • Disseminated Intravascular Coagulation 65	
• Hemolytic Disease of The Newborn 65	

6. Neonatal and Pediatric Transfusion Practice	66
Neonatal Transfusion 66 • Hemolytic Disease of Newborn 67	
• RhD Hemolytic Disease of Newborn 67 Exchange	
Transfusion 70 • ABO Hemolytic Disease of the Newborn 74	
• Indirect Hyperbilirubinemia 75 • Pediatric Anemia 76	
• Bleeding and Clotting Disorders in Pediatrics 77 • Acquired	
Bleeding and Clotting Disorders 77 • Thrombocytopenia 78	
• Red Cell Transfusion 78 • Neonatal Alloimmune	
Thrombocytopenia 79 • Fresh Frozen Plasma in Pediatrics 79	
7. Transfusion Practice in Surgery and Hemorrhage	81
Red Blood Cell Transfusion in Anemia 82 • Anemia and	
Surgery 83 • Recombinant Activated Factor VII 84 • Surgery and	
Coagulation Disorders 85 • Anticoagulants: Warfarin, Heparin 86	
• Management of a Bleeding Patient who has Received	
Fibrinolytics or Platelet Inhibitors 86 • Transfusion in Elective	
Surgery 90	
8. Approach to a Patient of Trauma and Burns	92
Phase I: Assessment and Resuscitation 93 • Phase II:	
Reassessment 96 • Phase III: Definitive Management 96	
• Pediatric Patients 96 • Approach to a Patient of Burns 98	
9. Transfusion in Cardio-Pulmonary Bypass Surgery	101
Thromboelastography 103	
10. Transfusion in Transplantation	105
Transfusion in Bone Marrow Transplantation 105 • Transfusion in	
Solid Organ Transplantation 107	
11. Transfusion Transmitted Infections	109
Window Period 110 • HBV 111 • HCV 112 • HIV 112	
• Syphilis 115 • Malaria 116 • Viral Inactivation 117	
• Pathogen Inactivation 117 • Role of the Clinicians 117	
• Prevalence of TTIs 118 • How Safe is Transfusion? 118	
• Nucleic Acid Testing 120	
12. Transfusion Reactions—Protocol	121
Classification of TRs 121 • Acute/Immediate Reactions 121	
• Delayed Transfusion Reactions 122 • Management and	
Investigations 123 • Lab Studies 127 • Transfusion Transmitted	
Infections—Delayed Complications of Transfusion 128 • Errors	
in Transfusion Process 131 • Prevention of TRs 131 • SHOT UK	
Report 1996-2009 133	
13. Autologous Transfusion	135
Types of Autologous Transfusion 135	

14. Fresh Blood	139
15. Blood Group Choice	141
16. Umbilical Cord Blood	144
17. Hospital Transfusion Committee	149
18. Plasma Derivatives and Plasma Substitutes	152
<i>BL Bhardwaj, Aastha Miranpuri</i>	
Plasma Protein Solutions 152 • Factor VIII Concentrate 153	
• Factor IX Containing Plasma Derivatives 154 • Immunoglobulin Preparations 154 • Plasma Substitutes 155	
19. Alternatives to Transfusion	159
<i>BL Bhardwaj, Aastha Miranpuri</i>	
Pharmacological Agents 159 • Recombinant Hematopoietic Growth Factors 160 • Red Cell Substitutes 161 • Platelet-Derived Products 164	
20. Recent Advances in Transfusion	166
Proteomics 166 • Gene Therapy 167 • Pathogen Inactivation System 167 • Adoptive Immunotherapy 168 • Recent Advances in Apheresis 168	
21. Frequently Asked Questions about Transfusion	170
<i>BL Bhardwaj, Aastha Miranpuri</i>	
Abbreviations	187
Glossary	193
Appendices	215
I. Blood Requisition Form 215	
II. Informing Patients 217	
III. Consent Form for the Transfusion of Blood/Blood Components 218	
IV. Donor Form 220	
V. Transfusion Reaction Form 222	
VI. Transfusion Reaction Protocol for Clinicians 223	
VII. Good Transfusion Practices 224	
VIII. Normal Hematological Values in Adults 225	
IX. Normal Hematological Values in Children 226	
X. Criteria for Anemia 227	
XI. Directed Donation 228	
XII. Patients who do not Accept Transfusions 230
