

Contents

1. Nerve Blocks Around the Hand	1
• Materials	4
• Steps	4
– Finger Web Space Block	4
– Transthecal Technique (Through Flexor Tendon Sheath)	6
– Wrist Block-Median Nerve	6
– Wrist Block-Ulnar Nerve	7
– Wrist Block-Radial Nerve	8
2. The Evaluation and Management of Ankle Fractures: Reduction and Splinting Techniques.....	10
• Relevant Anatomy	10
• Presentation And Evaluation in The Emergency Room	12
• Radiographic Evaluation	13
• Ankle Fracture Reduction	16
– Splint Application	17
• Post-Reduction Care	24
3. Closed Reduction of Shoulder Dislocations.....	25
• Anterior Dislocation	26
– Scapular Manipulation Technique	26
– External Rotation Technique	27
– Stimson Technique	27
– Milch Technique	28
– Traction-Countertraction Technique	29
– Modified Hippocratic Technique	30
– Reduction Under Anesthesia	31
• Posterior Dislocations	31
• Inferior Dislocations	31
– Two-Step Approach	32
• Post-Reduction Care	32
4. Closed Reduction of Elbow Dislocations.....	34
• Anatomy of The Elbow	34
• Emergency Room Evaluation	35
• Radiographic Evaluation	36

• Reduction and Immobilization of a Simple Elbow Dislocation	36
- <i>Steps for Reduction</i>	37
- <i>Applications of Posterior Long Arm Splint</i>	39
5. Joint Aspiration and Injection Techniques.....	44
• Necessary Materials	44
• Shoulder Aspiration and Injection Technique	46
• Elbow Aspiration and Injection Technique	50
- <i>Steps</i>	50
• Wrist Aspiration and Injection Technique	52
- <i>Steps</i>	52
• Knee Aspiration and Injection Technique	54
- <i>Superolateral Approach</i>	55
- <i>Inferolateral Approach</i>	57
• Ankle Aspiration and Injection Technique	59
- <i>Steps</i>	59
6. Reduction of the Dislocated Total Hip Arthroplasty	62
• Clinical Evaluation	63
• Physical Examination	64
• Treatment	64
- <i>The Allis Method</i>	65
- <i>The Bigelow Maneuver</i>	66
- <i>The Reverse Bigelow Maneuver</i>	69
- <i>Stimson Technique (Gravity Method)</i>	69
• Post-Reduction Care	70
7. Insertion of Femoral and Tibial Traction Pins	72
• Materials Required	73
• Steps	73
- <i>Distal Femoral Pins</i>	73
- <i>Proximal Tibial Pins</i>	78
8. The Evaluation and Management of Nursemaid's Elbow	80
• Physical Examination	81
- <i>Reduction Maneuvers for Nursemaid's Elbow</i>	84
• Discharge Plans Following Successful Reduction	88
9. Closed Reduction of Distal Radius Fractures	90
• Introduction	90
• History And Physical Examination	91
- <i>Evaluation of Open Distal Radius Fractures</i>	91
• Post Reduction Care	100
10. Nail Bed Repair.....	104
• Emergency Room Evaluation	104

Contents

• Treatment of Nail Bed Injuries	106
– <i>Necessary Supplies for Nail Bed Repair</i>	106
11. Closed Reduction of Pediatric Forearm Fractures	114
• Mechanisms of Injury	114
• Presentation and Evaluation in The Emergency Room	115
– <i>Radiographic Evaluation and Classification</i>	115
• Reduction of Pediatric Forearm Fractures	116
– <i>Technique</i>	117
• Post-Reduction Care	123
12. Diagnosis of Compartment Syndrome.....	125
• Pathophysiology	125
• Pertinent Anatomy	126
– <i>Leg</i>	126
– <i>Thigh</i>	126
– <i>Forearm</i>	126
– <i>Arm</i>	127
• Diagnosis	127
13. Suturing Lacerations in the Emergency Room	133
• Anesthesia	134
• Supplies	134
• Materials	135
• Steps	135
– <i>Simple Interrupted Stitch</i>	135
– <i>Simple Running Suture</i>	136
– <i>Vertical Mattress Suture</i>	137
14. Pediatric and Adult Procedural Sedation and Analgesia.....	140
• Procedural Sedation and Analgesia	140
– <i>Requirements Prior to Procedural Sedation</i>	141
– <i>Techniques for Procedural Sedation and Anesthesia</i>	143
<i>Index</i>	151
