## Section I: Regional Signs and Symptoms

<b>1. Orbit .....</b>	<b>3</b>			
• <i>Pseudoproptosis (Appearance of Exophthalmos)</i> 3	• <i>Exophthalmos</i> 4	• <i>Syndromes and Diseases Associated with Exophthalmos</i> 6	• <i>Specific Exophthalmos</i> 8	• <i>Enophthalmos</i> 11
• <i>Intraorbital Calcifications On X-Ray</i> 12	• <i>Orbital Bruit (Noise Heard Over Orbit with Stethoscope)</i> 12	• <i>Orbital Emphysema (Air Found in Orbital Tissues and Adnexa Usually Demonstrable by Palpation)</i> 13	• <i>Orbital Pain</i> 13	• <i>Shallow Orbit or Diminished Orbital Volume (Illusion of Proptosis or Glaucoma)</i> 14
• <i>Pseudohypertelorism (Illusion of Increased Distance Between Bony Orbita and Increased Interpupillary Distance)</i> 14	• <i>Hypertelorism (Increased Distance Between Bony Orbita and Increased Interpupillary Distance)</i> 14	• <i>Hypotelorism (Decreased Distance Between Bony Orbita and Decreased Interpupillary Distance)</i> 16	• <i>Deep-Set Eyes</i> 17	• <i>Prominent Supraorbital Ridges</i> 17
• <i>Osteolysis of Bony Orbit on X-Ray</i> 17	• <i>Fossa Formation of Orbit (Local Expansion of Bony Orbital Wall Caused by Persistent Pressure; Bony Cortex is Intact)</i> 18	• <i>Subperiosteal Orbital Hemorrhage</i> 18	• <i>Orbital Hemorrhage</i> 18	• <i>Expansion of Orbital Margins (Usually Associated with Benign Tumors of the Orbit)</i> 18
• <i>Hypertrophy of Orbital Bones (Hyperostosis or Sclerosis or Both)</i> 19	• <i>Expansion of Optic Canal</i> 19	• <i>Small Optic Canals</i> 19	• <i>Erosion of Optic Canal</i> 20	• <i>Enlargement of Superior Orbital Fissure</i> 20
• <i>Narrowing of Superior Orbital Fissure</i> 20	• <i>Small Orbit</i> 20	• <i>Large Orbit</i> 21	• <i>Hematic Orbital Cysts (Blood Cyst of Orbit)</i> 21	
<b>2. Lids .....</b>	<b>22</b>			
• <i>Mongoloid Palpebral Fissure (Temporal Canthus Higher than Nasal Canthus)</i> 23				
• <i>Antimongoloid Palpebral Fissure (Downward Displacement of Temporal Canthus)</i> 23				
• <i>Pseudoptosis</i> 24	• <i>Blepharoptosis (Ptosis), Droopy Upper Lid; Weak Levator Palpebrae Superioris Muscle</i> 25	• <i>Comprehensive Ptosis Classification</i> 28	• <i>Syndromes and Diseases Associated with Ptosis</i> 48	• <i>Specific Blepharoptosis (Ptosis)</i> 50
• <i>Horner Syndrome</i> 53				
• <i>Ptosis of Lower Lid (Uncommon Drooping of Lower Lid so that Lid Margin is Adjacent to Globe But Below Limbus)</i> 55	• <i>Lagophthalmos (Inability to Close Eyelids Voluntarily)</i> 55			
• <i>Pseudo-Lid Retraction</i> 55	• <i>Lid Retraction</i> 55	• <i>Lid Lag</i> 57	• <i>Blepharospasm (Spasmodic Eyelid Closure)</i> 57	• <i>Facial Palsy (Bell's Palsy)</i> 59
• <i>Infrequent Blinking</i> 60				• <i>Frequent Blinking</i> 61
• <i>Lid Edema (Puffiness or Bagginess of Lids)</i> 61				• <i>Lid Bleeding</i> 71
• <i>Ectropion (Lid Margin Turned Outward from the Eyeball)</i> 73	• <i>Entropion (Inversion of Lid Margin)</i> 74	• <i>Epicanthus (Fold of Skin Over Inner Canthus of Eye)</i> 74	• <i>Hypopigmentation (Depigmentation of Eyelids)</i> 76	• <i>Hyperpigmentation (Discoloration of Lids)</i> 77
• <i>Tumors of Eyelids</i> 79				• <i>Xanthelasma (Smooth Yellow Deposits in the Eyelid, Especially the Superior Nasal and Inferior Nasal Areas)</i> 80
• <i>Chronic Blepharitis (Inflammation of Lids)</i> 81				

- Acute Blepharitis (*Inflammation of Lids with Rapid Onset*) 87 • Thickened Eyelids 92
- Blepharophimosis (*Short Palpebral Fissure*) 92 • Euryblepharon 92 • Lid Coloboma 93
- Necrosis of Eyelids 93 • Poliosis (*Whitening of Hair, Eyebrows, and Eyelashes*) 93
- Trichomegaly (*Long Lashes*) 94 • Madarosis (*Loss of Eyelashes*) 94 • Distichiasis (*Accessory Row of Lashes Growing From Openings of Meibomian Gland*) 97 • Coarse Eyebrows 97 • Synophrys (*Confluent Eyebrows Extending to Midline*) 98 • Hertogh Sign (*Lack of Outer Third of Eyebrows*) 98 • Lid Myokymia (*Spontaneous Fasicular Eyelid Tremor Without Muscular Atrophy or Weakness*) 98 • Preseptal Cellulitis of Eyelid 98 • Telecanthus (*Disproportionate Increase in Distance Between Medial Canthus; Measurements in Infants are 18 to 22 mm*) 99 • Ankyloblepharon (*Partial or Complete Fusion of Upper to Lower Eyelids*) 99 • Flaring of Nasal Part of Eyebrow 99
- High Arched Brow 100 • Absent Brow Hair 100 • Trichiasis (*Inward Turning Lashes*) 100 • Apraxia of Lid (*Atypical Blepharospasm*) 100

### **3. Lacrimal System ..... 101**

- Dacryoadenitis (*Inflammation of Lacrimal Gland*) 101 • Bloody Tears 102
- Excessive Tears (*Epiphoria, Tearing*) 102 • Drugs Found In Tears 106 • Dry Eye (*Paucity or Absence of Tears*) 107 • Dacryocystitis (*Infection of the Lacrimal Sac*) 109

### **4. Extraocular Muscles ..... 111**

- Pseudoesotropia (*Ocular Appearance of Esotropia when no Manifest Deviation of Visual Axis is Present*) 112 • Esophoria and Esotropia (*Visual Axis Deviated Inward; may be Latent or Manifest*) 112 • Pseudoexotropia (*Ocular Appearance of Exotropia when no Manifested Deviation of Visual Axis is Present*) 113 • Exophoria and Exotropia (*Visual Axis is Deviated Outward; may be Latent or Manifested*) 113 • Pseudohypertropia 114
- Hyperphoria and Hypertropia (*Visual Axis Deviated Upward; may be Manifested or Latent*) 114 • Brown Superior Oblique Tendon Sheath Syndrome (*Limitation of Elevation in Adduction that Resembles an Underaction of Inferior Oblique Muscle*) 115 • Duane Syndrome 116 • Oculomotor Apraxia 116 • Monocular Limitation of Elevation of Adducted Eye with Forced Duction Test (*In Elevation and Adduction Strabismus with Restricted Motility*) 117 • Cyclic, Recurrent, Repetitive, Episodic Disorders of Extraocular Muscles 117 • Syndromes and Diseases Associated with Strabismus 118 • Horizontal Gaze Palsy 121 • Oscillations of Eyes (*Involuntary, Rapid, to-and-Fro Movement of Eyes having no Rhythm or Regularity*) 121 • Cogwheel Eye Movements (*Jerky Inaccurate Pursuit Movements*) 122 • Pendular Nystagmus 123 • Horizontal Jerk Nystagmus (*Horizontal Oscillatory Movement of Eyes with a Fast and Slow Phase*) 124 • Vertical Nystagmus (*Spontaneous Vertical Oscillations of Eyes*) 124 • Rotary Nystagmus (*Rotary Oscillatory Movement of Eyes*) 125 • See-Saw Nystagmus 125 • Retraction Nystagmus 126
- Monocular Nystagmus 126 • Periodic Alternating Nystagmus 126 • Positional Nystagmus 127 • Optokinetic Nystagmus 129 • Syndromes and Diseases Associated with Nystagmus 130 • Oculogyric Crisis (*Spasmodic and Involuntary Deviation of Eyes, Usually Upward, Lasting from a Few Minutes to Several Hours*) 133
- Ocular Bobbing 134 • Paralysis of Third Nerve (*Oculomotor Nerve*) 134
- Childhood Causes of Third Nerve (*Oculomotor*) Palsy 136 • Paralysis of Fourth Nerve (*Trochlear Nerve*) 136 • Childhood Causes of Fourth Nerve (*Trochlear*) Palsy 137
- Pseudoabducens Palsy 137 • Paralysis of Sixth Nerve (*Abducens Palsy*) 138

- Childhood Causes of Sixth Nerve (*Abducens*) Palsy 139 • Childhood Causes of Third, Fourth and Sixth Nerve Palsy 140 • Acute Ophthalmoplegia (Acute Onset of Extraocular Muscle Palsy) 140 • Chronic Progressive External Ophthalmoplegia (CPEO): Slow Onset of Extraocular Muscle Palsy 143 • Bilateral Complete Ophthalmoplegia (Bilateral Palsy of Ocular Muscles, Ptosis, with Pupil and Accommodation Involvement) 143 • External Ophthalmoplegia (Paralysis of Ocular Muscles Including Ptosis with Sparing of Pupil and Accommodation) 144 • Internuclear Ophthalmoplegia 145 • Painful Ophthalmoplegia (Palsy of Ocular Muscles with Pain) 145 • Transient Ophthalmoplegia (Extraocular Muscle Paralysis of Short Duration) 146 • Painful Ocular Movements (Pain with Movement of the Eyes) 146 • Poor Convergence (Inability of both Eyes to Fix Simultaneously on a Near Object) 147 • Spasm of Convergence 148 • Divergence Paralysis 148 • Oculocardiac Reflex 148 • Retraction of the Globe (On Horizontal Conjugate Gaze) 149 • Forced Duction Test 149 • Double Elevator Palsy (Monocular Elevation Deficiency)—Apparent Paralysis of Globe Elevators, Superior Rectus and Inferior Oblique Muscles 150 • Ocular Neuromyotonia (Paroxysmal Monocular Deviations Ascribable to Involuntary Contraction of Muscles Innervated by Third, Fourth or Sixth Cranial Nerves) 150 • Extraocular Muscle Enlargement on Orbital Computerized and Tomographic Scan 150

## 5. Conjunctiva..... 152

- Cellular Responses 152 • Purulent Conjunctivitis 154 • Acute Mucopurulent Conjunctivitis 154 • Chronic Mucopurulent Conjunctivitis (Mucopurulent Discharge, Moderate Hyperemia with a Chronic Course) 155 • Membranous Conjunctivitis 155
- Pseudomembranous Conjunctivitis 155 • Ophthalmia Neonatorum (Conjunctivitis Occurring in Newborns) 160 • Acute Follicular Conjunctivitis Lymphoid Follicles (Cobblestoning) of Conjunctiva with Rapid Onset (Conjunctivitis Giant Papillary) 161
- Chronic Follicular Conjunctivitis Lymphoid Follicles (Cobblestoning) of Conjunctiva with Long-Term Course (Conjunctivitis Giant Papillary) 162 • Cicatricial Conjunctivitis (Cicatricial Pemphigoid) Scarring of Conjunctiva 162 • Angular Conjunctivitis (Inflammation at Angle of Eye, Usually Lateral) 163 • Conjunctival Disorders Associated with Dermatologic Disorders 163 • Conjunctival Disorders Associated with Genital Disorders 164 • Congestion of Conjunctiva (Noninfectious Hyperemia of the Conjunctiva) 164 • Ciliary Flush 170 • Conjunctival Aneurysms, Varicosities, Tortuosity and Telangiectasis 170 • Conjunctival Sludging and Segmentation 171
- Conjunctival Edema (Chemosis) 171 • Conjunctival Xerosis (Dryness of Conjunctiva) 175
- Bitot Spots 176 • Subconjunctival Hemorrhage (Blood Under Conjunctiva) 176
- Tumors of the Conjunctiva 182 • Conjunctival Cysts 183 • Limbal Mass 184
- Large, Flat, Fleshy Lesions of Palpebral Conjunctiva 184 • Chronic or Recurrent Ulcers of the Conjunctiva 184 • Phlyctenular Keratoconjunctivitis 185 • Pigmentation of the Conjunctiva (See Pigment Spots of Sclera and Episclera) 185 • Discoloration of Conjunctiva 187 • Symblepharon 188 • Conjunctival Concretions 189 • Lesions of Caruncle 189

## 6. Globe ..... 190

- Microphthalmia (Small Globe) 190 • Buphthalmos (Large Globe) 191
- Pseudoendophthalmitis (Conditions that Simulate Endophthalmitis) 192
- Endophthalmitis (Intraocular Infection) 192 • Intraocular Cartilage 193

• Intraorbital Calcifications on X-Ray 193	• Intraocular Adipose Tissue 194
• Soft Globe (Decreased Intraocular Pressure) 194	• Phthisis Bulbi (Degenerative Shrinkage of Eyeball with Hypotony) 197
Shrinkage of Eyeball with Hypotony) 197	• Clinical Anophthalmos (Apparent Absence of Globe) 197
• Oculodigital Stimulation 198	• Anterior Segment Ischemia 198
<b>7. Sclera .....</b>	<b>199</b>
• Blue Sclera 199	• Dilated Episcleral Vessels 200
Episclera 200	• Pigment Spots of Sclera and Episclera 200
• Episcleritis 201	• Scleritis 202
Scleritis 202	• Staphyloma (Stretching and Thinning of the Sclera with Incarceration of Uveal Tissue) 203
• Episcleral and Scleral Tumors 204	
<b>8. Cornea .....</b>	<b>205</b>
• Crystals of the Cornea (Deposition of Crystalline Substances in the Cornea) 206	
• Anesthesia of the Cornea (Hypesthesia or Diminished Corneal Sensation in Trigeminal Distribution) 207	• Hyperplastic Corneal Nerves 208
Hyperplastic Corneal Nerves 208	• Increased Visibility of Corneal Nerves 208
• Pigmentation of the Cornea 209	• Corneal Edema 211
Corneal Edema 211	• Corneal Hydrops (Ruptures of Descemet Membrane with Cornea Intralamellar Dissection and Collection of Aqueous Humor) 213
Corneal Hydrops (Ruptures of Descemet Membrane with Cornea Intralamellar Dissection and Collection of Aqueous Humor) 213	• Microcornea (Cornea with a Horizontal Diameter of Less than 10 mm) 213
Microcornea (Cornea with a Horizontal Diameter of Less than 10 mm) 213	• Megalocornea (Cornea Having a Horizontal Diameter of More than 14 mm) 214
Megalocornea (Cornea Having a Horizontal Diameter of More than 14 mm) 214	• Corneal Opacification in Infancy 215
Corneal Opacification in Infancy 215	• Band-Shaped Keratopathy 215
Band-Shaped Keratopathy 215	• Corneal Keloids 216
Corneal Keloids 216	• Punctate Keratitis or Keratopathy 216
Punctate Keratitis or Keratopathy 216	• Morphologic Classification of Punctate Corneal Lesions (Classification by Anatomic Location) 221
Morphologic Classification of Punctate Corneal Lesions (Classification by Anatomic Location) 221	• Sicca Keratitis (Dry Eye with Secondary Corneal Changes) 222
Sicca Keratitis (Dry Eye with Secondary Corneal Changes) 222	• White Rings of the Cornea (Coats Disease) 223
White Rings of the Cornea (Coats Disease) 223	• Dry Spots of the Cornea (Pre Corneal Tear Film Drying in Spot-Wise Fashion) 223
Dry Spots of the Cornea (Pre Corneal Tear Film Drying in Spot-Wise Fashion) 223	• Anterior Embryotoxon (Arcus) 223
Anterior Embryotoxon (Arcus) 223	• Bowman Membrane Folds 224
Bowman Membrane Folds 224	• Delayed Corneal Wound Healing 224
Delayed Corneal Wound Healing 224	• Anterior Corneal Mosaic 225
Anterior Corneal Mosaic 225	• Linear Opacity in Superficial Corneal Stroma 225
Linear Opacity in Superficial Corneal Stroma 225	• Superficial Vertical Corneal Striations—Epithelial Wrinkles can be Accentuated with Fluorescein 225
Superficial Vertical Corneal Striations—Epithelial Wrinkles can be Accentuated with Fluorescein 225	• Dendritic Corneal Lesions (Area of Staining of Cornea in a Branching Pattern) 225
Dendritic Corneal Lesions (Area of Staining of Cornea in a Branching Pattern) 225	• Bullous Keratopathy (Terminal Stages of Severe or Prolonged Epithelial Edema Secondary to Endothelial Damage) 226
Bullous Keratopathy (Terminal Stages of Severe or Prolonged Epithelial Edema Secondary to Endothelial Damage) 226	• Nummular Keratitis (Coin-Shaped Lesions of Cornea) 226
Nummular Keratitis (Coin-Shaped Lesions of Cornea) 226	• Deep Keratitis 226
Deep Keratitis 226	• Interstitial Keratitis (Corneal Stromal Inflammation, not Primarily on Anterior or Posterior Surfaces of Stroma) 226
Interstitial Keratitis (Corneal Stromal Inflammation, not Primarily on Anterior or Posterior Surfaces of Stroma) 226	• Pannus (Superficial Vascular Invasion Confined to a Segment of the Cornea or Extending around the Entire Limbus) 227
Pannus (Superficial Vascular Invasion Confined to a Segment of the Cornea or Extending around the Entire Limbus) 227	• Corneal Opacity-Diffuse 228
Corneal Opacity-Diffuse 228	• Corneal Opacity—Localized, Congenital 229
Corneal Opacity—Localized, Congenital 229	• Deep Corneal Stromal Deposits 229
Deep Corneal Stromal Deposits 229	• Intracorneal Hemorrhage 229
Intracorneal Hemorrhage 229	• Central Posterior Stromal Corneal Deposits 230
Central Posterior Stromal Corneal Deposits 230	• Dellen 230
Dellen 230	• Phlyctenular Keratoconjunctivitis 230
Phlyctenular Keratoconjunctivitis 230	• Corneal Ring Lesion 230
Corneal Ring Lesion 230	• Corneoscleral Keratitis 231
Corneoscleral Keratitis 231	• Central Corneal Ulcer 231
Central Corneal Ulcer 231	• Marginal Corneal Ulcers (Peripheral Corneal Thinning) 232
Marginal Corneal Ulcers (Peripheral Corneal Thinning) 232	• Descemet Membrane Folds (Usually Following Hypotony) 233
Descemet Membrane Folds (Usually Following Hypotony) 233	• Descemet Membrane Tears (Haab Striae) 233
Descemet Membrane Tears (Haab Striae) 233	• Descemet Membrane Thickening 233
Descemet Membrane Thickening 233	• Retrocorneal Pigmentation 234
Retrocorneal Pigmentation 234	• Low Endothelial Cell Count (Diminished Number of Corneal Endothelial Cells) 234
Low Endothelial Cell Count (Diminished Number of Corneal Endothelial Cells) 234	• Snail Tracks of Cornea 234
Snail Tracks of Cornea 234	• Keratoconus (Conical Cornea) 234
Keratoconus (Conical Cornea) 234	• Cornea Plana (Decreased Corneal Curvature) 235
Cornea Plana (Decreased Corneal Curvature) 235	• Staphyloma of Cornea (Corneal Stretching with Incarceration of Uveal Tissue) 235
Staphyloma of Cornea (Corneal Stretching with Incarceration of Uveal Tissue) 235	• Whorl-Like Corneal Lesions 235
Whorl-Like Corneal Lesions 235	• Corneal Dermoids 236
Corneal Dermoids 236	• Corneal Problems

Associated with Keratotic Skin Lesions 236 • Corneal Problems Associated with Lid Excrescences 236 • Corneal Disease Associated with Lenticular Problems 237 • Corneal Disease Associated With Retinal Problems 239 • Corneal Diseases Associated with Deafness 241 • Trigger Mechanisms for Recurrent Herpes Simplex Keratitis 241 • Predisposing Factors in Keratomycosis 242 • Sclerocornea 242 • Postoperative Corneal Melt 242 • Corneal Mucous Plaques 243	
<b>9. Intraocular Pressure.....</b>	<b>244</b>
• Glaucoma Suspect; an Infant 244 • Conditions Simulating Congenital Glaucoma 244 • Syndromes and Diseases Associated with Glaucoma 245 • Glaucoma Suspect; an Adult 249 • Elevated Intraocular Pressure Measurement with Normal Appearing Optic Disk 249 • Secondary Open-Angle Glaucoma 250 • Unilateral Glaucoma 251 • Glaucoma Associated with Displaced Lens 252 • Glaucoma and Elevated Episcleral Venous Pressure 252 • Glaucoma Associated with Shallow Anterior Chamber 253 • Glaucoma in Aphakia or Pseudophakia 253 • Medications and Chemicals that may Cause Elevated Intraocular Pressure 254 • Primary Low-Tension Glaucoma 255 • Neovascular Glaucoma 256 • Hypotony 257 • Glaucoma Associated with Uveitis 258 • Glaucoma Associated with Intraocular Tumors 258 • Glaucoma, Comprehensive Developmental Classification 259 • Pseudo-Developmental Glaucoma: Classification 261 • Pseudo-Developmental Glaucoma: Appearance of Developmental Glaucoma 261 • Secondary Congenital Glaucoma 263	
<b>10. Anterior Chamber .....</b>	<b>265</b>
• Hypopyon (Pus in Anterior Chamber) 265 • Hyphema (Bleeding into the Anterior Chamber) 267 • Spontaneous Hyphema 267 • Spontaneous Hyphema in Infants 268 • Plasmoid Aqueous (Aqueous with a High Protein Content) 268 • Cholesterolosis of the Anterior Chamber 268 • Gas Bubbles in the Anterior Chamber 269 • Pigmentation of Trabecular Meshwork 269 • Pigment Liberation into the Anterior Chamber with Dilatation of Pupil 269 • Grading of Anterior Chamber Angle Width (Usually Determined by Gonioscopy) 269 • Blood in Schlemm Canal (Reversal of Normal Pressure Gradient) 270 • Deep Anterior Chamber Angle 270 • Narrow Anterior Chamber Angle (may be Capable of Angle Closure Glaucoma) 270 • Irregular Depth of the Anterior Chamber 271 • Peripheral Anterior Synechiae (Adhesion of Iris Tissue Across Anterior Chamber Structures in Variable Amounts Noted with Gonioscopy) 271 • Neovascularization of Anterior Chamber Angle (Newly Formed Vessels Extend into the Trabecular Meshwork) 272 • Iris Processes (Pectinate Ligaments in Anterior Chamber Angle) 272 • White Mass in Anterior Chamber 273	
<b>11. Pupil .....</b>	<b>274</b>
• Mydriasis (Dilated Pupil, Usually Greater than 5 mm) 274 • Relative Fixed, Dilated Pupil 279 • Miosis (Small Pupil Usually Less than 2 mm) 280 • Paradoxical Pupillary Reaction 283 • Absence or Decrease of Pupillary Reaction to Light 283 • Anisocoria (Inequality of Pupils of Greater than or Equal to 1 mm) 286 • Irregularity of Pupil (Including Oval or Peaked Pupil) 287 • Hippus 287 • Tonohaptic Pupil 288 • Leukokoria 288 • Long Ciliary Processes Extending to Dilated Pupillary Space 291	

<ul style="list-style-type: none"> <li>• Persistent Pupillary Membrane 291 • Decentered Pupillary Light Reflex 291</li> <li>• Pupillary Block Following Cataract Extraction 292 • Afferent Pupillary Defect 292</li> </ul>	293
<b>12. Iris .....</b>	<b>310</b>
<ul style="list-style-type: none"> <li>Aniridia (<i>Absence of Iris, Partial or Complete</i>) 293 • Coloboma of Iris 294</li> <li>• Rubeosis Iridis (<i>Neovascularization [Newly Formed Blood Vessels] on the Iris</i>) 295</li> <li>• Hyperemia of Iris (<i>Dilatation of Pre-Existing Vessels of the Iris</i>) 296 • Heterochromia (<i>Difference of Color Between Two Irides</i>) 296 • Iris Atrophy 300 • Iridodonesis (<i>Tremulous Iris</i>) 300 • Tumors Arising from Pigment Epithelium of Iris 301 • Pigmented Lesions of Iris 301 • Nonpigmented Lesions of Iris 302 • Conditions Simulating Posterior Uveitis or Choroiditis • 303 Syndromes and Diseases Associated with Iritis 304</li> <li>• Iritis (<i>Anterior Uveitis</i>) in Children 304 • Nongranulomatous Uveitis 305</li> <li>• Granulomatous Uveitis 307 • Pigmented Ciliary Body Lesions 308 • Neuroepithelial Tumors of Ciliary Body 308 • Internal Ophthalmoplegia 309 • Concave Peripheral Iris 309</li> </ul>	
<b>13. Lens .....</b>	<b>341</b>
<ul style="list-style-type: none"> <li>• Anterior Subcapsular Cataract 310 • Nuclear Cataracts 311 • Lamellar (Stellate, Zonular, Cortical, Coronary) Cataracts 312 • Punctate Cataracts (<i>Numerous Small Opacities</i>) 312 • Posterior Subcapsular Cataract 313 • Iridescent Crystalline Deposits in Lens 314 • Oil Droplet in Lens 315 • Lenticonus (<i>Conical Lens Surface Protuberance</i>) and Lentiglobus (<i>Globular Lens Surface Protuberance</i>) 315</li> <li>• Lens Absorption 316 Exfoliation of Lens Capsule 316 • Microphakia or Spherophakia or Microspherophakia (<i>Small Lens or Highly Spheric Lens</i>) 316 • Dislocated Lens 316</li> <li>• Aphakia (<i>Absence of Lens in Usual Position Behind the Iris</i>) 317 • Equatorial Lens Pigmentation 318 • Unilateral Cataracts 318 • Lenticular Disease Associated with Corneal Problems 318 • Drugs Associated with Cataracts 321 • Syndromes and Diseases Associated with Cataracts 323 • Lenticulocorneal Adherence (<i>Lens Adjacent to Endothelium of Cornea</i>) 328 • Spasm of Accommodation 328 • Paresis of Accommodation 328 • Comprehensive Classification of Pediatric Cataracts 331</li> </ul>	
<b>14. Vitreous .....</b>	<b>347</b>
<ul style="list-style-type: none"> <li>• Pseudodetachment of Vitreous (<i>Conditions Simulating Detachment of Vitreous</i>) 341</li> <li>• Anterior Vitreous Detachment 341 • Posterior Vitreous Detachment 342 • Vitreous Hemorrhage 342 • Vitreous Opacities 343 • Persistent Hyperplastic Primary Vitreous 344</li> <li>• Beads in Vitreous (<i>Snowballs in Vitreous</i>) 344 • Complications Following Operative Vitreous Loss 345 • Postoperative Vitreous Retraction 345 • Vitreous Cyst (<i>Cystic Structure in Vitreous Body</i>) 346 • Vitreous Liquefaction 346</li> </ul>	
<b>15. Retina .....</b>	<b>347</b>
<ul style="list-style-type: none"> <li>• Anatomic Classification of Macular Diseases 348 • Bilateral Macular Lesions 350</li> <li>• Pseudomacular Edema 351 • Macular Edema 351 • Absence of Foveal Reflex 354</li> <li>• Macular Pucker 354 • Macular Exudates and Hemorrhages 354 • Macular Star or Stellate Retinopathy (<i>Exudates in a Star Formation Radiating around Macula in the Nerve Fiber Layer</i>) 354 • Retinociliary Vein-Disappears from the Retina at Disc Margin without Connection to Central Retinal Vein 355 • Cherry-Red Spot In Macula (<i>Rule Out Macular Hemorrhage</i>) 355 • Macular Hemorrhage 356 • Parafoveal Telangiectasia 356</li> <li>• Microhemorrhagic Maculopathy—Small Monocular Macular Hemorrhage that is Punctate,</li> </ul>	

- Round or Bilobed 356 • Macular Cyst 357 • Macular Hole 357 • Macular Coloboma 357  
• Elevated Macular Lesion 358 • Heterotopia of the Macula 358 • White or Yellow Flat Macular Lesion and Pigmentary Change 358 • Pigmentary Changes in Macula 359  
• Bull's-Eye Macular Lesion—Circular Area of Retinal Pigment Epithelium Atrophy Surrounding a Spared Fovea 361 • Macular Wisps and Foveolar Splinter 361  
• Macular Hypoplasia (Incomplete Macular Development Manifested by Decreased Vision) 361 • Premacular Subhyaloid Hemorrhage 362 • Retinal Vascular Tortuosity 362 • Retinal Venous Beading 363 • Ophthalmodynamometry 363  
• Pulsation of Retinal Arteriole (High Pulse Pressure) 363 • Retinal Artery Occlusion 363 • Localized Arterial Narrowing 365 • Generalized Arterial Narrowing 365 • Periarteritis Retinalis Segmentalis 366 • Frosted-Branch Angitis 367  
• Sheathing of Retinal Veins 367 • Absent Venous Pulsations (Spontaneous Venous Pulsations Absent at Venules on the Disc) 368 • Dilated Retinal Veins 368  
• Tortuosity of Retinal Veins and Hypoplasia of Optic Nerves 370 • Central Retinal Vein Occlusion 370 • Dilated Retinal Veins and Retinal Hemorrhages 371  
• Retinal Hemorrhages 372 • Large Hemorrhages in the Fundus of an Infant or Young Child 378 • Retinovitreal Hemorrhage in a Young Adult 378 • Retinal Hemorrhage with Central White Spot (Roth Spot) 378 • Microaneurysms of Retina (Punctate Red Spots Scattered Over Region of Posterior Pole) 379 • Retinal Arteriovenous Shunt at the Arteriovenous Crossing 379 • Macroaneurysms of Retinal Arteries 379 • Retinal Neovascularization (Growth of Abnormal New Blood Vessels into the Vitreous) 380  
• Predisposition to Rhegmatogenous Retinal Detachment 380 • Retinal Detachment (Location and Morphologic Classification) 380 • Syndromes and Diseases Associated with Retinal Detachment 381 • Retinal Folds 383 • Cotton-Wool Spots 384  
• Hard Exudates (Yellowish White Discrete Masses Deep in the Retina) 384  
• Retinal Exudate and Hemorrhage 385 • Retinitis or Pseudoretinitis Pigmentosa 385  
• Lesions Confused with Retinoblastoma 387 • Single White Lesion of Retina 390  
• Pale Fundus Lesions 390 • Medullated Nerve Fibers 391 • Pigmented Fundus Lesions 392 • Cholesterol Emboli of Retina (Hollenhorst Plaques) 393 • Retinal Microemboli 394 • Lipemia Retinalis (Arterioles and Venules Similar in Color and Appearing Orange-Yellow to White) 394 • Hemorrhagic or Serous Exudates Beneath Pigment Epithelium 394 • Retinal Vascular Tumors and Angiomatosis Retinae Syndromes 395 • Retinal Sea-Fans 395 • Retinal Vessels Displace Temporally 396  
• Retinal Vessels Displaced Nasally 396 • Peripheral Fundus Lesions 396 • Retinal Disease Associated with Corneal Problems 398 • Retinal Lesions Associated with Deafness 400 • Subretinal Fibrosis 401 • Epiretinal Membranes—Membranes that Grow on the Inner Surface of the Retina 401 • Linear Streaks Pattern in Fundus 401  
• Yellow-Orange Lesions of Subretinal Fundus 401 • Talc Retinopathy—Drug Addicts Who Inject Drugs Intravenously 401 • Crystalline Retinopathy 402 • Pulfrich Stereo-Illusion Phenomenon 402 • Parafoveal Telangiectasia 402 • Hereditary Pediatric Retinal Degenerations 402 • Reticular Pattern of Dark Lines in Fundus 403 • Retinal Pigment Epithelial Tears 403 • Retinal Pigment Epithelial Folds 403 • Peripapillary Subretinal Neovascularization 403 • Mizuo Phenomenon 404 • White-Dot Fovea 404

## 16. Choroid ..... 405

- Angioid Streaks 405 • Choroidal Folds 406 • Lesions Confused with Malignant Melanoma 406 • Choroidal Hemorrhage 407 • Choroidal Detachment 407

<ul style="list-style-type: none"> <li>• Conditions Simulating Posterior Uveitis or Choroiditis 408</li> <li>• Choroiditis (Posterior Uveitis) 409</li> <li>• Conditions Simulating Posterior Uveitis in Children 409</li> <li>• Choroiditis (Posterior Uveitis) in Children 410</li> <li>• Syndromes and Diseases Associated with Uveitis 410</li> <li>• Chorioretinitis Juxtapapillaris 418</li> <li>• Choroidal Neovascularization 418</li> <li>• Ischemic Infarcts of Choroid (Elschnig Spots) 419</li> <li>• Chorioretinal and Choriovitreal Neovascularization 419</li> <li>• Uveal Effusion 419</li> <li>• Choroid Coloboma 419</li> <li>• Choroidal Ischemia 420</li> <li>• Pars Planitis (Peripheral Uveitis) 420</li> </ul>	422
<b>17. Optic Nerve.....</b>	<b>422</b>
<ul style="list-style-type: none"> <li>• Ciliooptic Vein 422</li> <li>• Drusen of Optic Nerve 422</li> <li>• Fluid Enlargement of Retrobulbar Optic Nerve or Sheath (Demonstrated by Computed Tomographic Scanning and Echography) 423</li> <li>• Hyperemia of Optic Disc 423</li> <li>• Ischemic Optic Neuropathy 423</li> <li>• Linear Hemorrhage on Optic Disc 424</li> <li>• Neovascularization of Optic Disc (Growth of Blood Vessels Onto Optic Disc) 424</li> <li>• Neuroretinitis (Inflammation of Optic Nerve and Adjacent Retina) 425</li> <li>• Optic-Nerve Atrophy 426</li> <li>• Optic-Nerve Atrophy and Deafness 431</li> <li>• Syndromes and Diseases Associated with Optic Atrophy 432</li> <li>• Optic-Nerve Hypoplasia 438</li> <li>• Optic Neuritis (Papillitis and Retrobulbar Neuritis) 439</li> <li>• Pseudooptic Neuritis (Lesions that Mimic Optic Neuritis) 444</li> <li>• Optociliary Shunts (Tortuous Ectatic Channels From Optic Nerve to Choroid) 444</li> <li>• Papilledema (Swelling of Optic Disc) 445</li> <li>• Pseudopapilledema (May be Mistaken for Swelling of Optic Nerve) 451</li> <li>• Peripapillary Subretinal Neovascularization 452</li> <li>• Pigmented Tumors of Optic Disc 452</li> <li>• Pseudoglucomatus Atrophy of Optic Disc 452</li> <li>• Temporally Displaced Disc (Dragged Disc) 452</li> <li>• Optic Neuritis, Childhood 453</li> </ul>	422
<b>18. Visual-Field Defects .....</b>	<b>454</b>
<ul style="list-style-type: none"> <li>• Pseudo-Visual Field Defects 454</li> <li>• Bilateral Central Scotomas 455</li> <li>• Arcuate (Cuneate) Scotoma 457</li> <li>• Unilateral Sector-Shaped Defects 457</li> <li>• Peripheral-Field Contraction 458</li> <li>• Altitudinal Hemianopia 459</li> <li>• Binasal Hemianopia 460</li> <li>• Bitemporal Hemianopia 460</li> <li>• Homonymous Quadrantanopia 461</li> <li>• Crossed Quadrantanopia 461</li> <li>• Homonymous Hemianopia 462</li> <li>• Spiral-Field Defects 463</li> <li>• Double Homonymous Hemianopia 463</li> </ul>	454

## Section II: General Signs and Symptoms

<b>19. Visual Disturbance.....</b>	<b>467</b>
<ul style="list-style-type: none"> <li>• Acquired Myopia 467</li> <li>• Acquired Hyperopia 470</li> <li>• Dysmegalopsia-Optical Illusions of Size 471</li> <li>• Bilateral Transient Loss of Vision (Transient Darkening of Vision) 472</li> <li>• Amaurosis Fugax (Transient Monocular Blackout of Vision) 472</li> <li>• Sudden Painless Loss of Visual Acuity in one Eye 473</li> <li>• Post-Traumatic Loss of Vision 473</li> <li>• Decreased Visual Acuity 474</li> <li>• Bilateral Blurring of Vision 480</li> <li>• Cortical Blindness (Cerebral Blindness) 481</li> <li>• Blindness in Childhood 482</li> <li>• Binocular Diplopia (Double Vision Using Both Eyes) 483</li> <li>• Binocular Triplopia (Unicocular Diplopia) 484</li> <li>• Diplopia Following Head Trauma 485</li> <li>• Eccentric Vision 485</li> <li>• Decreased Dark Adaptation (Nyctalopia; Night Blindness) 485</li> <li>• Astigmatism 486</li> <li>• Visual Allesthesia 486</li> <li>• Visual Acuity Loss after Glaucoma</li> </ul>	467

Surgery 486 • Sudden Painful Loss of Vision 487 • Sudden Painless Loss of Visual Acuity in one Eye 487 • Gradual Painless Loss of Vision 487	
<b>20. Visual Complaint.....</b>	<b>488</b>
• Photopsia (Scintillations, Sparks or Flashes of Light Before the Eyes) 488	
• Hallucinations (Formed Images) 489 • “Spots” Before Eyes (Dots or Filaments that Move with Movement of Eye) 493 • Colored Halos Around Lights (Blue and Violet are Next to the Stimulating Light and Red Outermost) 493 • Light Streaks 494	
• Photophobia (Painful Intolerance of the Eyes to Light) 495 • Astenopia (Uncomfortable Ocular Sensation or Eye Ache) 498 • Dazzling or Glare Discomfort 498 • Chromatopsia (Colored Vision, Objects are Abnormally Colored) 498 • Heightened Color Perception 502	
• Nyctalopia (Night Blindness) 502 • Hemeralopia 503 • Oscillopsia 504	
• Color Blindness 504 • Palinopsia 508 • Vertical Reading (Patient Reads from Above Downward) 508 • Visual Agnosia 508 • Ocular Lateropulsion 509 • Pain in and About Eye 509 • Headache 509 • Pulfrich Phenomenon 510	
<b>21. Head Position .....</b>	<b>511</b>
• Head Turn (Face Turn) 511 • Head Tilt (Head Tilted Toward Either Shoulder or around an Anteroposterior Axis) 512 • Chin Elevation 512 • Chin Depression 512	
• Head Nodding 513 • Head Tremor 513 • Head Thrust 513	
<i>Subject Index.....</i>	515
