

Contents

Section 1: Principles, Techniques and Instrumentation in Vitrectomy

- 1. Wide-Angle Viewing Systems for Vitreoretinal Surgery** 3
Lisa J Faia, Tarek S Hassan
Overview of Available Systems 4
Comparison of Contact Lens Systems 5
Comparison of Noncontact Wide-angle Systems 5
Adjuncts to Viewing 7
- 2. Illumination Considerations for Vitreous Surgery** 8
Colin A McCannel
Illumination Strategies 8
The Light Source 10
- 3. Vitreoretinal Instrumentation** 15
Steve Charles
Surgical Fluidics 15
The Alcon Constellation Vision System 19
Management of Epiretinal Membranes 22
Exchanges and Subretinal Fluid Drainage 25
Interface Vitrectomy 31
- 4. 20-Gauge Pars Plana Vitrectomy** 33
Andreas Ebnetter, Rajeev Jain, Jagjit Singh Gilhotra
Indications for 20-Gauge Vitrectomy 34
Basic Concepts 35
Surgical Technique 37
Complications 43
Future or Emerging Trends 44
- 5. 23-Gauge Pars Plana Vitrectomy** 47
Gary KY Lee, Timothy YY Lai
Operative Techniques 47
Indications of 23-Gauge Vitrectomy 52
Contraindications of 23-Gauge Vitrectomy 52
Advantages of 23-Gauge Vitrectomy 52
Disadvantages of 23-Gauge Vitrectomy 54
Complications of 23-Gauge Vitrectomy 54
- 6. The Use of Silicone Oil in Vitreoretinal Surgery** 56
Lawrence P Chong
- 7. Long-term Intraocular Tamponade with Silicone Oil** 62
Wico W Lai, Widad Yusof, Amy Lo, Ian Y Wong, David Wong
Chemical Properties of Silicone Oil 64
Physical Properties of Silicone Oil 65
Physical Properties of Tamponade 65
Clinical Indications 67
Surgical Techniques in the Use of Silicone Oil 70
- 8. Intraocular Gases in Vitreoretinal Surgery** 84
Shaheeda Mohamed, Timothy YY Lai
Intraocular Gases and Kinetics 84
Techniques of Fluid-Air Exchange and Intraocular Gas Injection 85
Uses of Intraocular Gases 87
Postoperative Positioning and Duration of Positioning 89
Contraindications for Intraocular Gas 90
Complications of Intraocular Gases 91
- 9. Perfluorocarbon Liquids and Vitreoretinal Surgery** 94
Anna Gabrielian, Seenu M Hariprasad
Chemical and Physical Properties 94
Indications for Use 95
Drawbacks of PFCL Use 98
- 10. Chromovitrectomy** 101
Milton Nunes de Moraes-Filho, Eduardo Buchele Rodrigues, Carsten H Meyer, Mauricio Maia, Eduardo Dib, Elaine de Paula Fiod Costa, Michel Eid Farah
Use of Vital Dyes for Internal Limiting Membrane 101
Vital Dyes for Epiretinal Membranes 104
Subretinal Vital Dye for Facilitation of Retinal Breaks Visualization 106
Vital Dyes for Vitreous 106
Surgical Techniques for Dye Application during Vitreoretinal Surgery 107
- 11. Endophotocoagulation and Safe Intravitreal Injection Technique** 114
Carsten H Meyer, Anne Fung, Neha Sinha, Sandeep Saxena
Principle 114
Parts of Endolaser 114

Endophotocoagulation with
 Indirect Ophthalmoscopy 117
 Microendoscope Endophotocoagulation 117
 Safe Intravitreal Injection Technique 117
 Intravitreal Drug Delivery 118
 The Injection Procedure and
 Recommended Technique 118
 Ocular Complications 120

Section 2: Retinal Detachment

12. Scleral Buckling 125

Hermann D Schubert

Who is a Potential Candidate for Scleral Buckles? 125
 A Brief History of Scleral Buckling 125
 Orbital Issues 126
 Topographic Considerations 126
 Preoperative Examination 127
 Practical Considerations: Nuts and Bolts 128
 Attention to Detail 130
 Expected Outcomes 130
 Obstacles to Teaching the Lost Art
 of Scleral Buckling 131

13. Pneumatic Retinopexy 133

Paul E Tornambe

The Philosophy of Pneumatic Retinopexy 133
 Results: Data Analysis 140
 Complications 141
 Discussion 141
 Prognostic Indicators 143
 Optimal Case Selection Combined with
 the Most Effective Surgical Technique 143
 Follow-up Recommendations 144
 Quality and Cost-effective Measurements 144
 The Learning Curve 144
 Comparison with Other Surgical Techniques 145

14. Primary Vitrectomy for Retinal Detachment 148

Heinrich Heimann

Evolution of Primary Vitrectomy 148
 Techniques and Variations of Primary Vitrectomy 149
 Clinical Studies and Results of
 Primary Vitrectomy 151
 Comparison to Other Methods 151
 Advantages of Primary Vitrectomy 153
 Disadvantages of Primary Vitrectomy 154
 Indications and Contraindications 154

15. Proliferative Vitreoretinopathy 158

Ryan M Tarantola

Clinical Aspects and Classification 158

Risk Factors 163
 Pathogenesis 163
 Surgical Management 163
 Postoperative Care or Complications 167
 Surgical Outcomes 168
 Future Directions 170

16. Giant Retinal Tears 174

Kamalesh J Ramaiya, Kevin J Blinder

Classification, Risk Factors and Etiology 175
 Pathogenesis 175
 Preoperative Evaluation 176
 Surgical Techniques for Repair 176
 Complications 180
 Prognosis 181

Section 3: Diabetic Retinopathy

17. Proliferative Diabetic Retinopathy: Surgical Considerations 189

Nakhleh E Abu-Yaghi, Sophie J Bakri

Pathophysiology 189
 Surgical Indications 190
 Surgical Objectives and Techniques 194
 Intraoperative Issues 194
 Postoperative Care 197

18. Anti-Vascular Endothelial Growth Factor Therapy for Diabetic Macular Edema 201

David M Wu, Dean Elliott

Pegaptanib 202
 Bevacizumab 202
 Ranibizumab 204

19. Surgery for Diabetic Macular Edema 208

Ulrike Stolba, Susanne Binder

Pathogenesis 208
 Indications and Outcome 209
 Surgical Methods 209
 Prognostic Factors 209
 Future Aspects 212

20. Laser in Diabetic Retinopathy 215

Ranjana Mathur

Principles of Laser 215
 Light-tissue Interaction 215
 Equipment 216
 Factors Influencing Laser Output 217
 Complications of Laser Photocoagulation 218
 Pattern Scan Laser Photocoagulation
 (Pascal Laser) 219
 Clinical Applications in Diabetic Retinopathy 219
 Diabetic Macular Edema (DME) 221

Section 4: Other Retinal Vascular Disorders and Inflammation

- 21. Surgical Management of Retinal Vein Occlusion** 227
Jose Garcia-Arumi, Miguel Zapata, Jose Badal
 Central Retinal Vein Occlusion 227
 Branch Retinal Vein Occlusion 232
- 22. Vitreoretinal Surgery in Eales' Disease** 238
Sandeep Saxena
 Clinical Features 239
 Fluorescein Angiography 240
 Management 240
- 23. Vitrectomy in Uveitis** 246
Ozay Oz, Ebru Nevin Cetin, Levent Akduman
 Vitrectomy in Patients with Uveitis for Diagnostic Purposes 246
 Vitrectomy for Therapeutic Purposes in Patients with Uveitis 248

Section 5: Macular Surgery

- 24. Macular Epiretinal Membrane Removal** 257
Paolo Lanzetta, Daniele Veritti, Gloria Dal Mas, Valentina Sarao
 Epidemiology 257
 Etiology 257
 Pathogenesis 258
 Classification 259
 Symptoms 259
 Diagnosis 259
 Differential Diagnosis 265
 Treatment 266
 Management of Coexisting Cataract 269
 Outcome 269
 Complications 272
- 25. Vitrectomy for Macular Hole** 276
Alain Gaudric, Ramin Tadayoni
 Optical Coherence Tomography of Macular Hole 276
 Differential Diagnosis 283
 Secondary Macular Holes 286
 Principles and Technique of Macular Hole Surgery 288
 Process of Macular Hole Closure and Prognostic Factors 293
 Complications of Macular Hole Surgery 294
- 26. Vitreoretinal Surgery for Myopic Foveoschisis** 299
Yasushi Ikuno
 Clinical Manifestations of Myopic Foveoschisis 299

Optical Coherence Tomography Findings 299
 Pathogenesis 300
 Management of Myopic Foveoschisis 301
 Complications 302

- 27. Submacular Hemorrhage Removal and Pneumatic Displacement of Submacular Hemorrhage** 304
Osamu Sawada, Masahito Ohji
 Surgical Steps 305
- 28. Anti-VEGF Therapy for Neovascular Age-related Macular Degeneration** 309
Pearse A Keane, Srinivas R Sadda
 Angiogenesis and Vascular Endothelial Growth Factor 310
 Pathogenesis of Choroidal Neovascularization 310
 Pegaptanib 311
 Ranibizumab 312
 Bevacizumab 315
 Use of Anti-VEGF Therapies in Clinical Practice 317
 Future Directions and Conclusions 320

Section 6: Trauma

- 29. Vitrectomy in the Management of the Injured Eye** 329
Ferenc Kuhn, Nicholas Marchase
 Instrumentation 329
 Vitrectomy for Ocular Trauma: Conditions and Techniques 330

Section 7: Endophthalmitis

- 30. Vitreoretinal Surgery in Endophthalmitis** 343
Dimple Modi, Benjamin J Ernst, Stephen S Feman
 Clinical Presentation 343
 Infectious Endophthalmitis 343
 Exogenous Endophthalmitis 343
 Causes of Endogenous Endophthalmitis 347
 Management of Infectious Endophthalmitis 350

Section 8: Pediatric Vitreoretinal Surgery

- 31. Vitreoretinal Surgery for Retinopathy of Prematurity** 357
Michael T Trese
 Surgical Technique 357
 Discussion 360

Section 9: Surgical Techniques in Viral Retinitis

32. Surgical Management of Cytomegalovirus Related Retinal Detachment in Patients with AIDS 363

Humeyra Karacal, Eylem Yaman Pinarci, Levent Akduman

- Incidence of Retinal Detachment in Cytomegalovirus Retinitis 364
- Risk Factors for Retinal Detachment in CMV Retinitis 365
- Clinical Features of Retinal Detachment in CMV Retinitis 365
- Pathophysiology of CMV Related Retinal Detachments 365
- Management of Retinal Detachments in CMV Retinitis 366
- Retinal Detachment after Ganciclovir Implant 369
- Visual Outcome after Retinal Detachment in CMV Retinitis 370

Section 10: Miscellaneous

33. Management of Dislocated Lens, Lens Fragments and Intraocular Lens 377

Astha Jain, Sandeep Saxena

- Dislocated Crystalline Lens 377
- Dislocated Nucleus, Lens Fragments and Cortex 377
- Management of Dislocated Crystalline Lens, Dropped Nucleus and Lens Fragments 378
- Dislocated Intraocular Lens 379
- Management of Dislocated Intraocular Lens 379
- Role of Perfluorocarbon Liquid in the Management of Dislocated Crystalline Lens, Nucleus and IOL 381
- Results 382

34. Surgery for Optic Disc Pit with Retinal Detachment 384

Edmund YM Wong, Claudine E Pang

- Etiology 384
- Clinical Features 384
- Clinical Investigations 385
- Pathogenesis 386
- Natural History 390
- Management 390

35. Vitreoretinal Surgery for Parasitic Diseases 396

Ajit Babu Majji

- Pathogenesis 396
- Indications for Vitreous Surgery 398
- Surgical Procedure 400
- Results 401
- Complications 401

36. Surgery for Choroidal Coloboma and Retinal Detachment 404

Lingam Gopal

- Anatomical Considerations 404
- Clinical Presentation of the Retinal Detachment 405
- Management 405
- Results 406

Section 11: Oncology

37. Eye-conserving Surgical Treatment Methods in Intraocular Tumors 411

Kaan Gündüz

- Laser Photocoagulation 411
- Transpupillary Thermotherapy 412
- Photodynamic Therapy 414
- Cryotherapy 417
- Episcleral Plaque Radiotherapy (Brachytherapy) 418
- Surgical Resection 422
- Other Vitreoretinal Procedures 426
- Intravitreal Injections 427
