## ORAL MEDICINE

|                                                                           |         |
|---------------------------------------------------------------------------|---------|
| 1. Case History and Investigation in Dentistry .....                      | 3-5     |
| 2. Keratotic and Nonkeratotic White Lesions .....                         | 6-8     |
| 3. Oral Premalignant Lesions and Conditions .....                         | 9-15    |
| 4. Cyst of Jaws. ....                                                     | 16-20   |
| 5. Tumors—Odontogenic, Benign , Malignant Tumor .....                     | 21-31   |
| 6. Vesicular, Bullous and Ulcerative Lesions .....                        | 32-38   |
| 7. Salivary Gland Disorders .....                                         | 39-45   |
| 8. Temporomandibular Joint Disorder .....                                 | 46-51   |
| 9. Disease of Bone Manifested in the Jaws And Fibro Osseous Lesions ..... | 52-57   |
| 10. Bacterial, Viral, Fungal Infections .....                             | 58-66   |
| 11. Orofacial Pain .....                                                  | 67-71   |
| 12. Developmental Disorders of Teeth and Jaws .....                       | 72-74   |
| 13. Infections of Oral Cavity and Oral Sepsis .....                       | 75-80   |
| 14. Disease of Tongue .....                                               | 81-85   |
| 15. Disease of Dental Pulp .....                                          | 86-88   |
| 16. Gingival and Periodontal Disease .....                                | 89-89   |
| 17. Oral Pigmentation .....                                               | 90-92   |
| 18. Disorders of Maxillary Sinus .....                                    | 93-94   |
| 19. Specific System Disorders .....                                       | 95-96   |
| 20. Endocrine Disorders .....                                             | 97-100  |
| 21. Blood and Metabolic Disorders .....                                   | 101-110 |
| 22. Forensic Odontology .....                                             | 111-112 |
| 23. Drugs Used in Dentistry .....                                         | 113-114 |
| 24. Miscellaneous .....                                                   | 115-132 |

## ORAL RADIOLOGY

|                                            |         |
|--------------------------------------------|---------|
| 1. Property and Production of X-Ray .....  | 135-138 |
| 2. Radiation Biology .....                 | 139-142 |
| 3. Radiation Protection .....              | 143-147 |
| 4. Ideal Radiograph .....                  | 148-149 |
| 5. Faulty Radiograph .....                 | 150-152 |
| 6. X-Ray Film and Accessories .....        | 153-156 |
| 7. Processing .....                        | 157-160 |
| 8. Intraoral Radiographic Techniques ..... | 161-166 |
| 9. Extraoral Radiographic Techniques ..... | 167-170 |
| 10. Panoramic Radiography .....            | 171-173 |

|                                                                   |         |
|-------------------------------------------------------------------|---------|
| 11. Specialized Radiographic Techniques and Recent Advances ..... | 174-177 |
| 12. Digital Radiography .....                                     | 178-179 |
| 13. Miscellaneous .....                                           | 180-185 |

## PERIODONTICS

|                                                                              |         |
|------------------------------------------------------------------------------|---------|
| 1. The Normal Periodontium .....                                             | 189-200 |
| 2. Dental Plaque, Calculus, and Plaque Control .....                         | 201-208 |
| 3. Defence Mechanism of Gingiva .....                                        | 209-210 |
| 4. Gingival Inflammation and Clinical Features of Gingivitis .....           | 211-216 |
| 5. Gingival Enlargements .....                                               | 217-221 |
| 6. Acute Gingival Infections .....                                           | 222-226 |
| 7. Desquamative Gingivitis .....                                             | 227-228 |
| 8. Periodontal Pocket .....                                                  | 229-232 |
| 9. Periodontitis .....                                                       | 233-240 |
| 10. Trauma from Occlusion .....                                              | 241-244 |
| 11. Bone Loss and Patterns of Bone Destruction .....                         | 245-246 |
| 12. Role of Systemic Diseases and Some Factors in Periodontal Diseases ..... | 247-251 |
| 13. Diagnosis, Prognosis, and Treatment Plan .....                           | 252-256 |
| 14. Rationale Periodontal Treatment .....                                    | 257-258 |
| 15. Oral Malodor .....                                                       | 259-260 |
| 16. Principle of Instrumentation .....                                       | 261-262 |
| 17. Periodontal Instruments .....                                            | 263-266 |
| 18. Periodontal Surgery .....                                                | 267-289 |
| – General Principles of Periodontal Surgery .....                            |         |
| – Gingival Curettage .....                                                   |         |
| – Gingivectomy .....                                                         |         |
| – Periodontal Flap .....                                                     |         |
| – Osseous Surgery .....                                                      |         |
| – Mucogingival Surgery .....                                                 |         |
| – Furcation: Involvement and Treatment .....                                 |         |
| – Splints .....                                                              |         |
| 19. Drugs used in Periodontics .....                                         | 290-296 |
| 20. Multiple Choice Questions .....                                          | 297-311 |

## ORTHODONTICS

|                                                              |         |
|--------------------------------------------------------------|---------|
| 1. Introduction of Orthodontics .....                        | 315-316 |
| 2. Growth and Development .....                              | 317-322 |
| 3. Growth and Development of Cranial and Facial Region ..... | 323-326 |
| 4. Development of Dentition and Occlusion .....              | 327-332 |
| 5. Classification of Malocclusion .....                      | 333-336 |
| 6. Etiology of Malocclusion .....                            | 337-338 |
| 7. Habits .....                                              | 339-344 |

|                                                   |         |
|---------------------------------------------------|---------|
| 8. Orthodontic Diagnosis .....                    | 345-348 |
| 9. Cephalometrics .....                           | 349-357 |
| 10. Model Analysis .....                          | 358-361 |
| 11. Types of Tooth Movement .....                 | 362-365 |
| 12. Anchorage in Orthodontics .....               | 366-368 |
| 13. Preventive Orthodontics .....                 | 369-371 |
| 14. Interceptive Orthodontics .....               | 372-374 |
| 15. Method of Space Gaining .....                 | 375-379 |
| 16. Removable and Fixed Appliance .....           | 380-388 |
| 17. Myofunctional Appliances .....                | 389-395 |
| 18. Retention and Relapse .....                   | 396-398 |
| 19. Management of Some Common Malocclusions ..... | 399-405 |
| – Treatment Planning .....                        |         |
| – Midline Diastema .....                          |         |
| – Management of Deep Bite .....                   |         |
| – Management of Class I Malocclusions .....       |         |
| – Management of Class III Malocclusions .....     |         |
| 20. Miscellaneous .....                           | 406-418 |
| – Stainless Steel .....                           |         |
| – Lab Procedure .....                             |         |
| – Surgical Orthodontics .....                     |         |
| – Genetics in Orthodontics .....                  |         |
| – Computers in Orthodontics .....                 |         |
| – Multiple Choice Questions .....                 |         |

## PUBLIC HEALTH DENTISTRY

|                                                        |         |
|--------------------------------------------------------|---------|
| 1. Public Health Dentistry / Community Dentistry ..... | 421-423 |
| 2. Epidemiology .....                                  | 424-427 |
| 3. Dental Auxiliary .....                              | 428-429 |
| 4. Survey .....                                        | 430-432 |
| 5. Indices .....                                       | 433-442 |
| 6. Biostatistics and Dental Science .....              | 443-446 |
| 7. Fluoride in Preventive Dentistry .....              | 447-452 |
| 8. Plaque Control .....                                | 453-457 |
| 9. Pit and Fissure Sealants .....                      | 458-459 |
| 10. Finance in Dental Care .....                       | 460-461 |
| 11. Health Education .....                             | 462-465 |
| 12. School Dental Health .....                         | 466-467 |
| 13. Health Care Delivery Systems .....                 | 468-470 |
| 14. Environment and Health .....                       | 471-473 |
| 15. Nutrition in Health and Disease .....              | 474-474 |
| 16. Occupational Hazards and Infection Control .....   | 475-478 |
| 17. Ethical Issues .....                               | 479-480 |

|                                                      |         |
|------------------------------------------------------|---------|
| 18. Epidemiology and Prevention of Oral Disease..... | 481-488 |
| 19. Health Agencies and Association .....            | 489-490 |
| 20. Behavior Management .....                        | 491-492 |
| 21. Child Psychology .....                           | 493-494 |
| 22. Handicapped People .....                         | 495-495 |
| 23. Orthodontics .....                               | 496-496 |
| 24. Computer Application .....                       | 497-497 |
| 25. Miscellaneous .....                              | 498-506 |
