

CONTENTS

1. Introduction to Psychology	1
• History and Origin of Psychology	1
• Gestalt Psychology	4
• Psychoanalysis/ Psychoanalytic Theory	5
• Scope of Psychology	13
• Psychology and Nursing	15
• Summary Points	21
2. Biological Basis of Psychology	23
• Mind – Body Relationship	23
• Patterns of Inheritance	33
• Brain and Behavior	35
• Nervous System and Behavior	44
• Sensation and Behavior	45
• Sense of Taste	54
• Glands and Nursing Perceptive	60
3. Cognition, Attention, Perception, Learning, Memory, Thinking, Intelligence	63
• Attention	63
• Determinants of Attention	63
• Perception	66
• Principles of Perception	67
• Perceptual Errors	70
• Learning	72
• Characteristics of Learning	78
• Learning Process	79
• Classical Conditioning Theory	86
• Memory	93
• Thinking	104
• Intelligence and Aptitude	112
• Classification of Intelligence	115
• Three Dimensional/or SI Model	121
• Test Yourself	126

4. Aptitude	127
• Aptitude	127
• Test Yourself	131
5. Motivation and Emotional Processes	132
• Concepts of Motivation	134
• Unconscious Motives	146
• Conflicts and Frustration	147
• Alternations in Emotions	163

• Prenatal Stage	198
• Infancy (Birth – 2 Years)	199
• Social and Emotional Development	200
• Early Childhood Stage (2 - 6 Years)	201
• Physical Development	201
• Cognitive Development	201
• Social and Emotional Development	201

• Middle Childhood Phase (6 -12 Years)	202
• Physical Development	202
• Cognitive Development	202
• Social and Emotional Development	202
• Adolescence Stage	203
• Physical Development	203
• Cognitive Development	203
• Sexual Development	203
• Emotional Development	203
• Early Adulthood Stage	204
• Physical Development	204
• Cognitive Development	204
• Social and Emotional Family Development	204
• Middle Adulthood Stage	204
• Physical Development	204
• Cognitive Development	205
• Social And Emotional Development	205
• Late Adulthood/Old Age (60 Years – Death)	
Physical Development	205
• Cognitive Development	205
• Social and Emotional Development	206
• Vulnerable Groups and Challenges	206
• Sick People	206
• Challenged People	206
• Women	207
• Psychology of Groups	207
• Chapter Summary	207
• Prenatal Development	207
• Postnatal Development	208
• Adolescence	208
• Adulthood	208
• Review Questions	209
9. Mental Health and Mental Hygiene	210
• Concepts	210
• Implication of Defense Mechanisms	221
• Characteristics of Guidance	226
• Principles of Guidance	226
• Guidance and Counseling	227

• Basic Assumptions of Guidance	228
• Functions of Guidance	228
• Scope of Guidance	228
• Need for Guidance Service in Educational Institutions	229
• Nursing Perceptives	230
• Review Questions	230

10. Psychological Assessment and Tests **231**

• Characteristics of A Good Psychological Test	234
• Principles	236
• Uses of Tests	237
• Interpretation of Tests	238
• Nursing Perceptives	239
• Summary Points	239
• Review Questions	239
• Reader's Opinion	241
