<i>Preface</i>	ix
<i>Introduction</i>	xv

## Section 1: Where did We Come From?

<b>1. History</b>	<b>3</b>
<i>Daniel W Skupski</i>	
• Distant History	3
• Fetal Diagnosis and Therapy	5
– Laser Therapy	7
• Collaboration	11

## Section 2: Why does TTTS Occur?

<b>2. The Hidden Costs of Monochorionicity</b>	<b>19</b>
<i>Issac Blickstein</i>	
• The Magnitude of the Problem	19
• Apparent and Hidden Costs of Monochorionic Twins	20
– Mode of Conception	20
– Diagnosis	20
– Fetal Growth	21
– Twin-to-Twin Transfusion Syndrome	21
– Single Fetal Death	21
– Cerebral Palsy	22
– Natural History of Monochorionic Pregnancies	22
– Preterm Birth	22

<b>3. Placentation</b>	<b>24</b>
<i>Daniel W Skupski</i>	
• Placental Anatomy	24
– Early Placental Development	25
– Chorionic Plate Architecture	26

• A Hypothesis Regarding Zygosity, Chorionicity, The Intertwin Membrane and Vascular Connections	27
– Vascular Connections Throughout Gestation	28
<b>4. Pathophysiology</b>	<b>30</b>
<i>David Danon, Nicholas M Fisk</i>	
• Placental Pathophysiology	30
– Arteriovenous Anastomoses	30
– Superficial Anastomoses	32
– Intertwin Transfusion	33
– Early Development	34
• Fetal Pathophysiology	35
– Renovascular System	35
– Cardiovascular System	36
– Peripheral Doppler Abnormalities	38
– Endocrine Markers	38
<b>5. Color Injection and Digital Angiography</b>	<b>44</b>
<i>Brigit Arabin, Ahmet Baschat</i>	
• Explaining Clinical Symptoms of Monochorionic Twins through Postnatal Correlation with the Placenta	44
• Correlating Prenatal Sonographic and Intrauterine Laser Findings of Monochorionic Twins with the Placental Vasculature by Color Injections	47
– Computer Angiography of Placental Vessels in Monochorionic Multiples	48

## Section 3: What is TTTS?

<b>6. Natural History</b>	<b>59</b>
<i>Daniel W Skupski</i>	
• Missteps	59
• Determining the Natural History of Twin-to-Twin Transfusion Syndrome	61
<b>7. Clinical Effects</b>	<b>64</b>
<i>Birgit Arabin, Ahmet Baschat</i>	
• The Monochorionic Placenta	64
– Signs and Effects of Volume Imbalance	65
– Signs and Effects of Nutrient Imbalance—Fetal Growth Discordance	77
– Discordant Fetal Anomalies	78
• Clinical Evolution and Implications for Surveillance and Risk Assessment	79

<b>8. Diagnosis</b>	<b>86</b>
<i>Marieke Sueters, Kenneth J Moise Jr</i>	
• Diagnosis of Chorionicity	86
– First Trimester Ultrasound Examination	86
– Second Trimester Ultrasound Examination	86
– Risk Stratification for Monochorionic Twins	87
• Ultrasound Surveillance of the Monochorionic Twin Gestation	88
• Diagnosis of Twin-to-Twin Transfusion Syndrome	89
<b>9. Maternal Nutrition</b>	<b>94</b>
<i>JE De Lia, Cresta W Jones</i>	
• Methods	94
• Results	95
• Consequences	96
<b>10. The Cervix</b>	<b>100</b>
<i>Shirlee Jaffe-Lifshitz, Daniel W Skupski</i>	
• Risk of Spontaneous Preterm Birth in Twins	100
– Cervical Length and the Risk of Preterm Birth	100
• Interventions to Prevent Preterm Birth in the Setting of a Short Cervix	101
– Interventions for Short Cervix in the Setting of TTTS	102
– Pessary	103

## Section 4: When does TTTS Occur?

<b>11. Acute Twin-to-Twin Transfusion Syndrome</b>	<b>107</b>
<i>Daniel W Skupski</i>	
• Etiology	107
• Incidence	109
• Literature Review	109
• Hypotheses	112
• Management	112
<b>12. Triplets</b>	<b>114</b>
<i>Inna Landres, Daniel W Skupski</i>	
• Prevalence of Feto-Fetal Transfusion Syndrome (FFTS) in Triplets	114
– FFTS in Dichorionic vs Monochorionic Triplets	114
• Outcomes with No Treatment	114
• Treatment Options	115
– Amnioreduction	115
– Laser Therapy	115

• Neonatal Follow-up	117
• Counseling and Ethical Considerations	117
• Unanswered Questions	117

## Section 5: How do We Treat TTTS?

<b>13. Therapy</b>	<b>121</b>
<i>GE Chalouhi, MA Marangoni, Y Ville</i>	
• Treatment Options	121
– Amnioreduction	121
– Septostomy	122
– Laser Treatment	122
• Anesthesia	122
• Abdominal Entry	122
• Technique	122
• Operative Time	124
• Learning Curve	125
• Perioperative Care and Follow-up	125
• Surgical Failure	125
• Complications	126
<b>14. Neonatal Outcomes</b>	<b>130</b>
<i>Enrico Lopriore, Jeanine van Klink, Dick Oepkes</i>	
• Neonatal Mortality	130
• Neonatal Morbidity	130
– Neurologic Morbidity	130
– Cardiovascular Morbidity and Right Ventricular Outflow Tract Obstruction	135
– Renal Morbidity	135
– Hematologic Morbidity	136
– Antenatal Hypoxic-Ischemic Lesions	137
– Amniotic Band Syndrome	137
<b>15. Monitoring of Disease</b>	<b>142</b>
<i>Dick Oepkes, Femke Slaghekke, Enrico Lopriore</i>	
• Monitoring Stage I TTTS	142
– Monitoring TTTS Pregnancies Following Laser Surgery	143
• Complications: What to Look for	144
– Preterm Prelabor Rupture of Membranes	144
– Chorioamnion Separation	144
– Ruptured Intertwin Membrane	145

• Single Fetal Death: What to Do?	145
– Fetal Brain Damage and the Role of MRI	146
– Limb Reduction and Amniotic Bands	146
– Vasa Previa	147
– Residual Anastomoses after Lasr	147
<b>16. Ethical Dimensions</b>	<b>153</b>
<i>Laurence B McCullough, Frank A Chervenak</i>	
• The Ethics of Non-Directive and Directive Counseling in the Informed Consent Process	153
– Ethically Justified Decision-Making Pathway	153
<b>Section 6: What's Next?</b>	
<b>17. The Future</b>	<b>159</b>
<i>Daniel W Skupski</i>	

## Section 6: What's Next?

<b>17. The Future</b>	<b>159</b>
<i>Daniel W Skupski</i>
