

Section 1 Examination of Thyroid

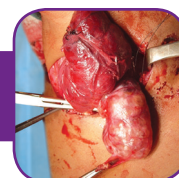

- ❖ Examination of Thyroid 1; ❖ Clinical Examination of Thyroid: Lahey's Method 3;
- ❖ Crile's Method 4; ❖ General Examination Specific to Thyroid Diseases 5;
- ❖ Examination of Thyroid: Palpation 7; ❖ Consistency 8; ❖ Palpation 9; ❖ Careful!
- A Cystic Swelling of Thyroid may Feel Firm 10; ❖ Careful! Hard Nodule is not Always
- Malignant 11; ❖ Mobility 12; ❖ Palpation of Trachea 13; ❖ Retrosternal
- Extension 14; ❖ Percussion of Manubrium 15; ❖ Pemberton's Sign 16; ❖ Berry's
- Sign 17; ❖ Kocher's Test 18; ❖ Horner's Syndrome 19; ❖ Thrill 20; ❖ Thyroid
- Ophthalmopathy 21; ❖ Von Graefe's Sign 22; ❖ Dalrymple's Sign 23;
- ❖ Conjunctival Edema 24; ❖ Exophthalmometry 25; ❖ Goffroy's Sign 26;
- ❖ Griffith's Sign 27; ❖ Möbius' Sign 28; ❖ Nafziger's Test 29

Section 2 Benign Thyroid Diseases

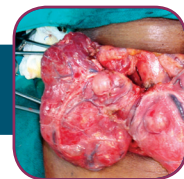

- ❖ Benign Thyroid Diseases 31; ❖ Lingual Thyroid 33; ❖ Management 34;
- ❖ Thyroglossal Cyst: Clinical Features 35; ❖ Etiology 36; ❖ Thyroglossal Fistula 37;
- ❖ Evaluation 38; ❖ Sistrunk's Operation 39; ❖ Congenital Hypothyroidism: Causes 40;
- ❖ Management 41; ❖ Graves' Disease: Diagnosis 42; ❖ Ancillary Test 43;
- ❖ Indications of Surgery 44; ❖ Adolescent Graves' Disease 49; ❖ Treatment 50;
- ❖ Nodular Toxic Goiter 52; ❖ Diagnosis 54; ❖ Management 55; ❖ Toxic Nodule 57;
- ❖ Management 58; ❖ Solitary Thyroid Nodule 60; ❖ FNAC 61; ❖ Thyroid Function
- Test 62; ❖ Ultrasonography 63; ❖ USG Characteristics 64;
- ❖ Large Thyroid Nodules 65; ❖ USG Microcalcification: Papillary Carcinoma 66;
- ❖ Lateral Lymph Node 67; ❖ Ultrasonography 68; ❖ Papillary Carcinoma 69;
- ❖ Thyroid Scan 70; ❖ X-ray Neck: To Look for Tracheal Deviation/Compression 71;
- ❖ X-ray Neck 72; ❖ Management 73; ❖ Thyroiditis 75 ❖ Sub-acute Thyroiditis 76;
- ❖ Hashimoto's Thyroiditis 79; ❖ Histopathology 82; ❖ Euthyroid Multinodular
- Goiter 83; ❖ Pathology 84; ❖ Clinical Findings 85; ❖ Evaluation 87;
- ❖ Potential Complications/Indication for Surgery: 5 Cs 89; ❖ Treatment Issues 94;
- ❖ Does Postoperative TSH Suppression Reduce Recurrence Rate? 98

Section 3 Retrosternal Goiter

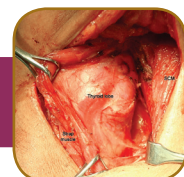

- ❖ Retrosternal Goiter: Definition 101; ❖ Classification 102;
- ❖ Clinical Presentation 104; ❖ Evaluation: Plain X-ray 108;
- ❖ Contrast-enhanced Computed Tomography 109; ❖ Lung Function Studies 110;
- ❖ Treatment Options 111; ❖ Surgical Technique 112

Section 4 Surgical Anatomy

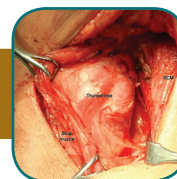

- ❖ Blood Supply: Venous Drainage 119; ❖ External Branch of SLN 120; ❖ Recurrent Laryngeal Nerve: Toothpaste Sign 121; ❖ Position in the Neck 122; ❖ Variation in Size 123; ❖ Relationship with Inferior Thyroid Artery 124; ❖ Variation—RLN may Cross the ITA Anteriorly!! 127; ❖ Relationship with Inferior Constrictor at Laryngeal Entry Point 128; ❖ Extralaryngeal Branching 129; ❖ Relation with Superior Parathyroid 131; ❖ Relation with Inferior Parathyroid 132; ❖ Relationship with Berry's Ligament 133; ❖ Relationship with Tubercle of Zuckerkandl 135; ❖ Non-recurrent Laryngeal Nerve 137; ❖ Parathyroid 139; ❖ Blood Supply of Superior Parathyroid Glands 141; ❖ Parathyroid Changes Color 142; ❖ Pyramidal Lobe 143; ❖ Recurrence in Pyramidal Lobe after Total Thyroidectomy 145; ❖ Detached Thyroid Nodule 146; ❖ Neck Dissection: Contents of Carotid Sheath 147

Section 5 Technique of Thyroidectomy

- ❖ Skin Marking 151; ❖ Raising Flaps by Cutting Platysma 152; ❖ Raising the Flaps 153; ❖ Ligation in Continuity of the Anterior Jugular Veins 154; ❖ Finding and Dissecting the Midline 155; ❖ Separating the Strap Muscles 157; ❖ Cutting the Strap Muscles 158; ❖ Surgical Technique 159; ❖ Ligating the Middle Thyroid Vein(s) 160; ❖ Multiple Middle Thyroid Veins 161; ❖ Delivering the Thyroid Lobe 162; ❖ Superior Pole: Creating Medial Space 163; ❖ Attempting to Identify the EBSLN 165; ❖ Neuromonitoring of EBSLN 166; ❖ Ligation of Superior Pedicle 167; ❖ Sutureless Thyroidectomy 168; ❖ Identifying the Superior Parathyroid Gland 169; ❖ Dissecting the Superior Parathyroid Gland 170; ❖ Identifying the Superior Parathyroid Gland 171; ❖ Surgical Technique: Preserving the Blood Supply of Parathyroid Gland 172; ❖ Saving the Superior Parathyroid Gland 173; ❖ Finding the Recurrent Laryngeal Nerve 174; ❖ Palpating for the RLN Near the Inferior Pole of Thyroid 175; ❖ Finding the RLN: Lateral Approach 176; ❖ Finding the RLN: Superior Approach 178; ❖ Finding the RLN: Inferior Approach 179; ❖ Recurrent Laryngeal Nerve: Exposure and Dissection 180; ❖ Dissection 182; ❖ Blunt Dissection Started 183; ❖ Finding the Recurrent Laryngeal Nerve 184; ❖ Blunt Dissection 185; ❖ More Dissection 186; ❖ Berry's Ligament is not Always Avascular! 188; ❖ Recurrent Laryngeal Nerve 189; ❖ Identifying the Inferior Parathyroid Gland 190; ❖ Dissecting the Inferior Parathyroid Gland 193; ❖ Saving the Inferior Parathyroid Gland 196; ❖ Dissecting the Inferior Parathyroid Gland 197; ❖ Saving the Inferior Parathyroid Gland 198; ❖ Identifying the Tubercle of Zuckerkandl, if Present 199; ❖ Importance of TZ 200; ❖ Tying the Berry's Ligament... 201; ❖ Ligating the Inferior Thyroid Vein 203; ❖ Separating the Thyroid Lobe from the Trachea 204; ❖ Suturing the Strap Muscles Leaving a Gap in the Inferiormost Portion 206; ❖ Skin Closure: Subcuticular Stitch 207; ❖ Glue 208; ❖ Subcuticular Stitch 209

Section 6 Special Situations

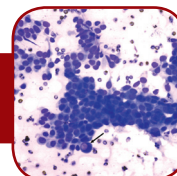

- ❖ Complete Thyroidectomy: Work-up 213; ❖ Technique of Re-do Surgery 214;
- ❖ Carcinoma Thyroid with Extrathyroidal Extension to Strap Muscles 217;
- ❖ Large Goiters 218; ❖ Recurrent Goiters 220; ❖ Small Incision Thyroidectomy 221;
- ❖ Dissecting and Saving RLN Apparently Invaded by Metastatic LN in MTC 222

Section 7 Complications of Thyroidectomy

- ❖ Chylous Fistula after Left Neck Dissection 227; ❖ Tracheomalacia 228;
- ❖ Hypocalcemia 229; ❖ RLN Injury: Common Sites of Damage 230;
- ❖ Overstretching!! 231; ❖ Beware!! It may be Pulled Up with the Thyroid Nodule 232

Section 8 Malignant Lesions of Thyroid

- ❖ Papillary Carcinoma 235; ❖ Clinical Presentation 236; ❖ Initial Investigations 239;
- ❖ Ultrasonography 240; ❖ Ancillary Investigations 243; ❖ Risk Stratification 245;
- ❖ Management 246; ❖ Extent of Thyroidectomy 247; ❖ Extent of Lymph Node Dissection 249;
- ❖ Histopathology 252; ❖ Postoperative RAI Remnant Ablation 258;
- ❖ Dose of ^{131}I Ablation 259; ❖ Suppressive Therapy with Thyroxine 260;
- ❖ Locally Invasive to Thyroid Cartilage 261; ❖ Locally Advanced Papillary Carcinoma: Strap Muscle Invasion 262;
- ❖ Esophageal Invasion 263; ❖ Management of Locally Invasive PTC 264; ❖ LN in PTC 265;
- ❖ PTC 266; ❖ Papillary Microcarcinoma 267; ❖ Multifocal Papillary Microcarcinoma Thyroid 269;
- ❖ Management 270; ❖ Variants of PTC 271; ❖ Follicular Variant of PTC (FVPTC) 272;
- ❖ Tall Cell Variant 273; ❖ Follicular Neoplasm/Carcinoma 274; ❖ Fine Needle Aspiration Cytology 275;
- ❖ Presentation 276; ❖ Follicular Neoplasm: Management 277; ❖ Clinical Presentation 280;
- ❖ FTC: Skeletal Metastases 283; ❖ Skull Metastases 284; ❖ Plain X-ray and CT Showing Destruction of Skull Bones 286;
- ❖ RAI Uptake in Skeletal Metastases 287; ❖ Metastatic Follicular Carcinoma: Detection 288;
- ❖ Management 289; ❖ Management of Paraparesis/Paraplegia 290; ❖ Long-term Prognosis 291;
- ❖ Hurthle Cell Neoplasm/Carcinoma 292; ❖ Clinical and Histological Characteristics 293;
- ❖ STN with a FNAC Diagnosis of Hurthle Cell Neoplasm: Surgical Management 294;
- ❖ Histopathology 295; ❖ Postoperative Management 296; ❖ Differences from FTC 297;
- ❖ Medullary Thyroid Cancer 298; ❖ Clinical Presentation 299;
- ❖ Some Features of Thyroid Nodule may Prompt Suspicion of MTC 301;
- ❖ Signs and Symptoms of Locally Invasive Tumor should be Looked for 302;
- ❖ Medullary Thyroid Cancer: Family Screening 303; ❖ Screen

for Involvement of Other Endocrine Glands 305; ❖ Multiple Endocrine Neoplasia IIA 306; ❖ FNAC 307; ❖ Serum Calcitonin 308; ❖ Evaluation to Rule out MEN II 309; ❖ USG and CT 310; ❖ Ancillary Investigations: CECT 311; ❖ Metastatic Work-up 312; ❖ Genetic Screening 313; ❖ Clinicopathological Correlation 314; ❖ Pattern of Locoregional and Metastatic Spread 315; ❖ Central Compartment Nodes Dissection 316; ❖ Pattern of Metastatic Spread 317; ❖ Behavior 318; ❖ Extent of Surgery 320; ❖ Histopathology 321; ❖ Special Stains 324; ❖ Immunohistochemistry 326; ❖ Surgical Approach 327; ❖ Postoperative Protocol 328; ❖ Prognosis 329; ❖ Prognostic Factors 330; ❖ Persistent Hypercalcitoninemia 331; ❖ Evaluation 332; ❖ Management Approaches 333; ❖ Can Present in Two Different Ways? 336; ❖ Anaplastic Transformation 337; ❖ Anaplastic Carcinoma 338; ❖ FNAC 340; ❖ Tru-cut Biopsy: Role 341; ❖ Management of ATC: Total Thyroidectomy 342; ❖ Role of Hyperfractionated Radiotherapy and Chemotherapy 345
