

CONTENTS

1. Introduction	1
2. Osteonecrosis of the Femoral Head: An Introduction	4
Vascular Anatomy of Femoral Head	4
Historical Perspective (Bullough 1997)	5
Natural History of Osteonecrosis	7
Present Status: Conclusion	9
3. Mechanism of Disease and Pathophysiology of Osteonecrosis	13
Etiopathology	13
Mechanism of Disease	13
Histology/Biopsy	16
4. Coagulopathies and Associated Conditions Causing Osteonecrosis	26
Intravascular Coagulation	26
Lipid Storage Disorders	26
Sickle Cell Hemoglobinopathy	26
5. Classification: Staging of Osteonecrosis	30
Types of Osteonecrosis	30
Factors Associated with High Risk	30
6. Early Diagnosis	37
7. Imaging Modalities	41
Imaging of Osteonecrosis	41
Radiography	41
Magnetic Resonance Imaging	45
Determination: Lesion Size in Osteonecrosis of the Femoral Head	51
Imaging Studies in Brief	55
8. Bone Marrow Edema Syndrome and Osteonecrosis	59
Pathogenesis	59
9. Pregnancy and Osteonecrosis	63
10. Transient Osteoporosis and Osteonecrosis	67
11. Treatment: Conservative and Surgical	74
Pharmaceutical Treatment	74
Lipid-Lowering Agents	75
Operative Treatment	77

12. Role of Core Decompression and Bone Grafting	88
Role of Core Decompression	88
Various Bone Grafting Procedures	88
13. Core Decompression and Free Fibular Grafting	95
14. Core Decompression and TFL Muscle Pedicle Grafting	103
Material and Methods	107
Operative Technique	110
Postoperative Protocol	111
15. Treatment by Core Decompression and Vascular Pedicle Grafting	121
Material and Methods	122
16. Place of Osteotomy in Osteonecrosis	135
Types of Osteotomy	135
Osteotomy	136
17. Osteonecrosis and Joint Replacement Arthroplasty	141
18. Osteonecrosis of the Humeral Head	151
Epidemiology	151
Classification	154
Observations	156
19. Osteonecrosis of Vertebral End Plates	167
Clinical Features	167
Radiographic Features	167
Etiopathology of Osteonecrosis	169
20. Osteonecrosis of the Knee	174
Secondary Osteonecrosis	174
Spontaneous Osteonecrosis of the Knee	182
Postarthroscopic Osteonecrosis	189
Key Concepts in Knee Osteonecrosis	192
21. Sickle Cell Disease and Osteonecrosis of the Femoral Head	196
Clinical Material and Method	198
Etiopathology	200
Early Diagnosis	201
Radiography	202
History and Clinical Examination	202
Radiology	202
Noninvasive Technique	205
Perioperative Management	218

22. Osteonecrosis of Talus	228
Treatment Options	235
Salvage Procedures: Arthrodesis	237

23. Hand-Foot Syndrome	241
Observations	241
Clinical Features	243
Radiology	244
Management	244
