

## CONTENTS

### Section 1: General Microbiology

|                                           |    |
|-------------------------------------------|----|
| 1. Historical Development of Microbiology | 3  |
| 2. Morphology of Bacteria                 | 10 |
| 3. Physiology of Bacteria                 | 20 |
| 4. Sterilization and Disinfection         | 23 |
| 5. Culture Media                          | 33 |
| 6. Identification of Bacteria             | 39 |
| 7. Bacterial Genetics                     | 46 |
| 8. Infection                              | 59 |

### Section 2: Immunology-Final

|                                                   |     |
|---------------------------------------------------|-----|
| 9. Immunity                                       | 67  |
| 10. Antigens                                      | 72  |
| 11. Antibodies-Immunoglobulins                    | 75  |
| 12. The Complement System                         | 80  |
| 13. Antigen-Antibody Reactions                    | 84  |
| 14. Structures and Functions of the Immune System | 95  |
| 15. Immune Response                               | 99  |
| 16. Hypersensitivity Reactions                    | 106 |
| 17. Autoimmunity                                  | 112 |
| 18. Immunology of Transplantation and Malignancy  | 115 |

### Section 3: Systemic Bacteriology

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| 19. <i>Staphylococcus</i>                                                                                | 121 |
| 20. <i>Streptococcus</i> and <i>Enterococcus</i>                                                         | 127 |
| 21. <i>Pneumococcus</i> ( <i>Diplococcus pneumoniae</i> / <i>Streptococcus pneumoniae</i> )              | 135 |
| 22. <i>Neisseria</i> and <i>Moraxella</i>                                                                | 139 |
| 23. <i>Corynebacterium</i>                                                                               | 145 |
| 24. <i>Bacillus</i>                                                                                      | 152 |
| 25. <i>Clostridium</i>                                                                                   | 156 |
| 26. Nonsporing Anaerobes                                                                                 | 164 |
| 27. <i>Mycobacterium tuberculosis</i>                                                                    | 169 |
| 28. <i>Mycobacterium leprae</i>                                                                          | 177 |
| 29. Nontuberculous Mycobacteria                                                                          | 181 |
| 30. <i>Actinomyces</i> and <i>Nocardia</i>                                                               | 184 |
| 31. <i>Enterobacteriaceae</i> : <i>Escherichia</i> , <i>Klebsiella</i> , <i>Proteus</i> and other Genera | 187 |
| 32. <i>Shigella</i>                                                                                      | 195 |
| 33. <i>Enterobacteriaceae</i> III: <i>Salmonella</i>                                                     | 198 |
| 34. <i>Vibrio</i> , <i>Aeromonas</i> and <i>Plesiomonas</i>                                              | 206 |
| 35. <i>Campylobacter</i> and <i>Helicobacter</i>                                                         | 212 |
| 36. <i>Pseudomonas</i> , <i>Stenotrophomonas</i> and <i>Burkholderia</i>                                 | 215 |
| 37. <i>Legionella</i>                                                                                    | 219 |
| 38. <i>Yersinia</i> , <i>Pasteurella</i> and <i>Francisella</i>                                          | 221 |
| 39. <i>Haemophilus</i>                                                                                   | 225 |
| 40. <i>Bordetella</i>                                                                                    | 229 |
| 41. <i>Brucella</i>                                                                                      | 232 |
| 42. <i>Spirochaetes</i>                                                                                  | 236 |
| 43. <i>Mycoplasma</i> and <i>Ureaplasma</i>                                                              | 246 |
| 44. Miscellaneous Bacteria                                                                               | 250 |
| 45. <i>Rickettsiaceae</i> , <i>Bartonellaceae</i> and <i>Coxiella</i>                                    | 255 |
| 46. <i>Chlamydia</i> and <i>Chlamydomonas</i>                                                            | 260 |

**Section 4: Virology-BDS**

|                                                                          |     |
|--------------------------------------------------------------------------|-----|
| 47. General Properties of Viruses                                        | 267 |
| 48. Virus-host Interactions: Viral Infections                            | 274 |
| 49. Laboratory Diagnosis, Prophylaxis and Chemotherapy of Viral Diseases | 277 |
| 50. Bacteriophages                                                       | 282 |
| 51. DNA Viruses                                                          | 286 |
| 52. RNA Viruses                                                          | 294 |
| 53. Hepatitis Viruses                                                    | 304 |
| 54. Retroviruses—Human Immunodeficiency Virus                            | 311 |

**Section 5: Medical Mycology**

|                                                                          |     |
|--------------------------------------------------------------------------|-----|
| 55. General Properties, Classification and Laboratory Diagnosis of Fungi | 319 |
| 56. Superficial, Cutaneous and Subcutaneous Mycoses                      | 325 |
| 57. Systemic Mycoses                                                     | 330 |
| 58. Opportunistic Mycoses                                                | 334 |

**Section 6: Medical Mycology**

|                   |     |
|-------------------|-----|
| 59. Protozoology  | 345 |
| 60. Helminthology | 360 |

**Section 7: Oral Microbiology**

|                       |     |
|-----------------------|-----|
| 61. Oral Microbiology | 379 |
|-----------------------|-----|

**Section 8: Clinical Microbiology**

|                                                 |     |
|-------------------------------------------------|-----|
| 62. Infective Syndrome                          | 391 |
| 63. Laboratory Control of Antimicrobial Therapy | 398 |
| Index                                           | 401 |
