

Contents

Section 1: Normal Growth

- 1. Introduction to Orthodontics** **3**
Gurkeerat Singh
 - What is Orthodontics? 3 • Branches of Orthodontics 4 • Aims of Orthodontic Treatment 4
 - Scope of Orthodontics 5 • History of Orthodontics 5
- 2. Basic Principles of Growth** **7**
Navjot Singh, Tapasya Juneja Kapoor
 - Methods of Studying Physical Growth 8 • Methods of Collecting Growth Data 9
 - Basic Tenets of Growth—Pattern, Variability, Timing 9 • Rhythm and Growth Spurts 11
 - Factors Affecting Physical Growth 11 • Terminology Related to Growth 11 • Growth Control 14
 - Theories of Skull Growth Control 14 • Architectural Analysis of the Skull 17
 - Internal Construction of Bone 19
- 3. Prenatal Growth of Cranium, Facial and Oral Structures** **21**
Navjot Singh
 - Prenatal Growth Phases 21 • Prenatal Growth Proper 21 • Development of the Skull 22
 - The Calvaria 22 • The Cranial Base 24 • The Facial Skeleton 25
- 4. Postnatal Growth of the Craniofacial Complex** **28**
Navjot Singh
 - The Cranial Vault 28 • The Cranial Base 29 • The Nasomaxillary Complex 30
 - The Mandible 32 • Rotation of Jaws during Growth 33
- 5. Development of Dentition** **35**
Tapasya Juneja Kapoor, Gurkeerat Singh
 - Evolution 35 • Theories of Origin of Mammalian Teeth 35
 - Characteristics of Human Dentition 35 • Prenatal Development of Dentition 36
 - Development of Dentition from Birth to Complete Deciduous Dentition 36
 - Mixed Dentition Stage 41 • Permanent Dentition 45 • Eruption 45
 - Dimensional Changes in the Dental Arches 46 • Developmental Disturbances Affecting the Teeth 47
- 6. Occlusion in Orthodontics** **49**
Manoj Varma, Gurkeerat Singh
 - Understanding Frequently used Terms 49 • Concepts of Occlusion 50
 - Classifications of Occlusion 51 • Relating Centric Relation to Centric Occlusion 53
 - Importance of Centric Relation in Orthodontics 54 • Compensatory Curvatures 54
 - Andrews Six Keys to Normal Occlusion 55

Section 2: Diagnosis

- 7. Diagnostic Aids: Case History and Clinical Examination** **61**
Tapasya Juneja Kapoor, Gurkeerat Singh
 - Essential Diagnostic Aids 61 • Nonessential or Supplemental Diagnostic Aids 61
 - Case History 61 • Clinical Examination 63 • Functional Examination 70

8. Orthodontic Study Models	73
<i>Tapasya Juneja Kapoor, Gurkeerat Singh</i>	
• Ideal Requirements of Orthodontic Study Models 73 • Why we Make Study Models? 73 • Uses of Study Models 73 • Parts of the Study Models 74 • Study Model Fabrication and Trimming 74 • Model Analysis 79	
9. Cephalometrics: Landmarks and Analyses	90
<i>Gurkeerat Singh</i>	
• History of Cephalometrics 90 • Uses of Cephalometrics 91 • Obtaining the Cephalogram 91 • Tracing Technique 92 • Anatomic Structures in the Cephalogram 93 • Points and Landmarks 94 • Down's Analysis 103 • Steiner Analysis 108 • Tweed Analysis 113 • Wits Appraisal of Jaw Disharmony 114	
10. Diagnostic Radiographs and Photographs	117
<i>Gurkeerat Singh</i>	
• Why Radiographs? 117 • Orthopantomogram 117 • Intraoral Radiographs 121 • Parallax (Buccal Object Rule) 122 • Facial Photographs 122	
11. Maturity Indicators	126
<i>Sudhanshu Kansal, Gurkeerat Singh</i>	
• Requirements for an Ideal Maturity Indicator 126 • Clinical Importance 126 • Late and Early Development 127 • Maturity Indicators 127 • Radiological Methods of Assessment and Prediction of Skeletal Growth 130	
12. Computerized Diagnostic Systems	138
<i>Siddarth Shetty, Gurkeerat Singh</i>	
• The Digital Image 138 • Various Methods of Digital Radiography 140 • Digital Cephalometrics 141 • Video-Cephalometry 144 • Digital Photography 145 • Three-Dimensional Imaging 147 • Digital Study Models 148	
13. Cone Beam Computed Tomography in Orthodontics	152
<i>PG Makhija</i>	
• General Uses of Cone Beam Computed Tomography 160 • Future of CBCT 169	
14. Classification of Malocclusion	171
<i>Gurkeerat Singh</i>	
• Individual Tooth Malpositions 171 • Malrelation of Dental Arches 173 • Skeletal Malocclusions 175 • Angle's Classification of Malocclusion 176 • Dewey's Modification of Angle's Classification of Malocclusion 178 • Lischer's Modification of the Angle's Classification of Malocclusion 179 • Bennette's Classification of Malocclusion 183 • Simon's Classification of Malocclusion 183 • Skeletal Classification 184 • Ackerman-Profitt System of Classification 186 • Incisor Classification 186	
15. Etiology of Malocclusion: Classification	188
<i>Gurkeerat Singh</i>	
• White and Gardiner's Classification 188 • Salzmann's Classification 188 • Moyer's Classification 189 • Graber's Classification 190	
16. Etiology of Malocclusion: General Factors	191
<i>Gurkeerat Singh</i>	
• Hereditary 192 • Congenital Factors 193 • Predisposing Metabolic Climate and Disease 195 • Dietary Problems (Nutritional Deficiency) 196 • Abnormal Pressure Habits and Functional Aberrations 197 • Posture 199 • Trauma and Accidents 199	

17. Etiology of Malocclusion: Local Factors	201
<i>Gurkeerat Singh</i>	
• Anomalies of Number 201 • Anomalies of Tooth Size 204 • Anomalies of Tooth Shape 204	
• Abnormal Labial Frenum 206 • Premature Loss of Deciduous Teeth 207	
• Prolonged Retention of Deciduous Teeth 210 • Delayed Eruption of Permanent Teeth 211	
• Abnormal Eruptive Path 211 • Ankylosis 213 • Dental Caries 214	
• Improper Dental Restorations 214	
18. Dental Public Health Aspects of Orthodontics	215
<i>Arun Grover, Gurkeerat Singh</i>	
• Prevalence of Malocclusion 215 • Oral Cleft Lip and Palate 215	
• Assessment of Orthodontic Treatment Need 218 • Orthodontic Indices 218	
• Factors Affecting Receipt of Orthodontic Treatment 219	
• Cost of Treatment and Orthodontist Remuneration 220 • Trust in the Health Care System 220	
Section 3: Treatment Planning	
19. Formulation of Treatment Plan	223
<i>Gurkeerat Singh</i>	
• Orthodontic Diagnosis 223 • Formulation of a Problem List 223	
• Setting Priorities for the Orthodontic Problem List 224 • Planning Space Requirements 224	
• Treatment Possibilities 225 • Choice of Mechanotherapy 225 • Planning Retention 225	
• Factors in the Choice of a Specific Treatment Plan 225	
• Discussion with the Patient and Patient Consent 226	
20. Biology of Tooth Movement	227
<i>Gurkeerat Singh</i>	
• Theories of Orthodontic Tooth Movement 227 • Phases of Tooth Movement 229	
• Bone Resorption 229 • Bone Formation 230 • Biochemical Control of Tooth Movement 232	
• Effect of Drugs/Medications on Tooth Movement 233	
21. Mechanics of Tooth Movement	234
<i>Gurkeerat Singh</i>	
• Forces as Vectors 234 • Force and Movement 235 • Types of Forces 238	
22. Methods of Gaining Space	240
<i>Gurkeerat Singh</i>	
• Proximal Stripping (Reproximation) 240 • Arch Expansion 242 • Distalization of Molars 250	
• Uprighting of Tilted Posterior Teeth 254 • Derotation of Posterior Teeth 254	
• Proclination of Anterior Teeth 256 • Extraction 256 • Choice of Teeth for Extraction 259	
23. Anchorage in Orthodontics	265
<i>Gurkeerat Singh</i>	
• Sources of Anchorage 265 • Anchorage Loss 268 • Classification of Anchorage 268	
• Intraoral Anchorage 269 • Extraoral Anchorage 271 • Muscular Anchorage 273	
• Implants as Anchorage Units (Absolute Anchorage) 273 • Anchorage Planning 273	
• Classifying Anchorage Requirements 273 • Tweed's Classification of Anchorage Preparation 273	
24. Retention and Relapse in Orthodontics	275
<i>Gurkeerat Singh</i>	
• Causes of Relapse 275 • Need for Retention 276 • Schools of Thought/Philosophies 276	
• Riedel's Theorems of Retention 277 • Length of Retention Period 278 • Types of Retainers 278	

25. Surgical Procedures in Orthodontics	287
<i>Sanjeev Kumar, Ujjwal Gulati, Gurkeerat Singh</i>	
• Soft Tissue Procedures 287 • Lingual Frenectomy 288 • Hard Tissue Procedures 292	
26. Orthognathic Surgery	298
<i>Sanjeev Kumar, Ujjwal Gulati, Gurkeerat Singh</i>	
• Indication for Orthognathic Surgery 298 • Planning Orthognathic Surgery 300	
• Procedures 302	
27. Implants to Miniscrews	308
<i>Abhay Lamba, Gurkeerat Singh</i>	
• What are Dental Implants? 308 • What are Orthodontic Implants? 308 • History 308	
• Types of Dental Implants 309 • Biomaterials for Dental Implants 309	
• Indications for Dental Implants 310 • Orthodontic Anchorage 311	
28. Genetics in Orthodontics	317
<i>Gurkeerat Singh</i>	
• Mode of Transmission of Malocclusion 317 • Tracing the Gene in Family Pedigree Studies 318	
• Penetrance and Expressivity 318 • Inbreeding and Consanguineous Marriages—its Consequences 319 • Dental and Skeletal Characteristics that are Inherited 319	
29. Detrimental Effects of Orthodontics Treatment	324
<i>Gurkeerat Singh</i>	
• Tissue Damage during Treatment 324 • Increased Predisposition to Dental Disease and Dysfunction 328	

Section 4: Orthodontic Materials

30. Material Used in Orthodontics: Introduction and Archwire Materials	333
<i>Gurkeerat Singh</i>	
• Classification of Orthodontic Appliance Materials 333 • Archwire Materials 333	
• Classification of Archwire Materials 334	
31. Bracket Material and Auxiliary Force Delivery Systems	347
<i>Gurkeerat Singh</i>	
• Brackets 347 • Bracket Bases 350 • Auxiliary Force Delivery Systems 350	
32. Impression Materials	354
<i>Pankaj Dutta</i>	
• Irreversible Hydrocolloids (Alginate) 354 • Advantages of Alginates 354	
• Disadvantages of Alginates 355 • Uses of Alginates 355 • Composition of Alginates 355	
• Properties of Alginates 356 • Rate of Deformation 357 • Clinical Considerations 358	
• Manipulation of Alginates 359	
33. Luting Materials	363
<i>Pankaj Dutta, Gurkeerat Singh</i>	
• Dental Cements 363 • Phosphate-based Cements 363 • Manipulation 372	
• Protection of the Cement while Setting 372	
34. Adhesion Promoters and Bonding Materials	375
<i>Pankaj Dutta</i>	
• Adhesive Science 375 • The Range of Orthodontic Adhesives 377	
• Resin Ionomer Hybrids 377 • Enamel and Dentin Bonding 379 • Acid Etching 379	
• Generations of Dentin Bonding Agents 381 • Indirect Bonding 386	
• Factors Affecting the Bonding of the Brackets to the Enamel 386 • Bond Failures 388	
• Composite 388 • Classification of the Composites 391 • New Composite Materials 394	

35. Orthodontic Instruments	402
<i>Gurkeerat Singh</i>	
• Separating Pliers 402 • Scissors 402 • Band Seater 402 • Mershon Band Pusher 404	
• Boone Gauge 404 • Bracket Positioning Height Gauge 404 • Double Beak Pliers 404	
• Johnson Contouring Pliers 404 • Standard Light Wire Pliers 405	
• Jarabak Light Wire Pliers 405 • Angle Wire Bending Pliers 406 • Tweed Loop Forming Pliers 406	
• Nance Loop Forming Pliers 406 • De La Rosa Contouring Pliers 406	
• Weingart Universal Pliers 407 • Angle/Tweed Ribbon Arch Pliers 407 • Howe Pliers 407	
• Ligator 407 • Mosquito Forceps 407 • “Mathieu” Needle Holder 409 • Ligature Adjuster and Tucker 409	
• Pin and Ligature Cutters 409 • Pin and Ligature Cutter 45° 409	
• Hard Wire Cutters 410 • Heavy Wire Cutters 410 • Distal End Cutters 410	
• Bracket Removing Pliers 410 • Posterior Band Removing Pliers 411	
• Anterior Band Removing Pliers 411 • Adam’s Plier 411 • Adam’s Clasp Bending Pliers 411	
• Arrow Clasp Former 412 • Arrow Clasp Bending Pliers 412 • Young Loop Bending Pliers 412	
• Face Bow Bending/Cutting Pliers 412 • 3-Prong Pliers 412 • Turrets 412	
36. Sterilization in Orthodontics	414
<i>Gurkeerat Singh</i>	
• Steps in Sterilization/Disinfection 415 • Methods for Sterilization 415	
• Poststerilization Procedures 416 • Handling Processed Instruments 417	
• Methods of Disinfection 417 • Hand Disinfection 418 • Disposal of Waste Materials 420	
Section 5: Orthodontic Appliances	
37. Orthodontic Appliances: An Introduction	423
<i>Gurkeerat Singh</i>	
• Classification of Orthodontic Appliances 423 • Mechanical Orthodontic Appliances 423	
• Functional Orthodontic Appliances 425 • Ideal Requirement of an Orthodontic Appliance 425	
38. Removable Orthodontic Appliances	427
<i>Tapasya Juneja Kapoor, Gurkeerat Singh</i>	
• Advantages of Removable Appliances 427 • Disadvantages of Removable Appliances 427	
• General Principles of Removable Appliances 428 • Active Components 428	
• Retentive Components (Fixation) 441 • Framework/Base Plate 447	
• Instructions to the Patient 450 • Common Failures for no Tooth Movement 451	
39. Fixed Orthodontic Appliances	453
<i>Gurkeerat Singh</i>	
• Advantages of Fixed Orthodontic Appliances 453 • Disadvantages of Fixed Orthodontic Appliances 453	
• Indications of Fixed Appliances 454 • Contraindications to Fixed Orthodontic Appliances 454	
• Components of Fixed Orthodontic Appliances 454	
40. The Edgewise Appliance	472
<i>Gurkeerat Singh</i>	
• Treatment Steps 473 • Bracket Specifications 473 • Bracket Position 473	
• Archwire Fabrication 473 • First Order Bends 474 • Second Order Bends 474	
• Third Order Bends 474	
41. The Begg Appliance	477
<i>Gurkeerat Singh</i>	
• Components used in the Begg Technique 477 • Diagnosis in the Begg Technique 481	
• Three Stages of Begg Technique 481	

42. The Preadjusted Edgewise Appliance	484
<i>Gurkeerat Singh</i>	
• Anchorage Control 486 • Leveling and Aligning 486 • Overbite Control 486	
• Overjet Reduction and Space Closures 486 • Finishing and Detailing 487	
43. The Tip Edge Appliance	491
<i>Gurkeerat Singh</i>	
• Tip Edge Bracket Design 491 • Advantages of the Tip Edge Brackets 491	
• Placement of Tip Edge Attachments 492 • Auxiliaries 493 • Treatment Stages 494	
44. Lingual Orthodontics	497
<i>Pravin Shetty, Gurkeerat Singh</i>	
• Difficulties Encountered during the Development of Lingual Orthodontic Therapy and their Current Solutions 498 • Indications for Lingual Appliances 499	
45. Orthopedic Appliances	505
<i>Tapasya Juneja Kapoor, Gurkeerat Singh</i>	
• Philosophy of Extraoral Force 505 • Basis for Orthopedic Appliances 505	
• Orthopedic Appliances 506	
46. Functional Appliances	516
<i>Ankur Kaul, Ashish Gupta, Gurkeerat Singh</i>	
• Basis for Functional Appliances 516 • Classification of Functional Appliances 517	
• Mode of Action of Functional Appliances 525 • Activator 526 • Fabrication 528	
• Bionator 530 • Frankel Function Regulator 532 • Fabrication of Function Regulator 532	
• Twin Block 537 • Appliance Design and Construction 538 • Construction Bite 540	
• Fixed Functional Appliances 542 • Flex Developer 546 • Power Scope 547	
Section 6: Management of Malocclusion	
47. Preventive Orthodontic Procedures	551
<i>Rajesh Ahal, Gurkeerat Singh</i>	
• Preventive Measures Undertaken 551	
• Space Maintenance (in the Deciduous and the Mixed Dentition) 555	
48. Interceptive Orthodontic Procedures	563
<i>Rajesh Ahal, Gurkeerat Singh</i>	
• Space Regaining 563 • Correction of Anterior and Posterior Cross Bites 567	
• Elimination of Oral Habits Leading to Interception 568 • Muscle Exercises 570	
• Removal of Soft or Hard Tissue Impediments in the Pathway of Eruption 571	
• Resolution of Crowding 572 • Management of Crowding 572	
• Serial Extraction and Guidance of Eruption 573 • Definition 573 • Historical Review 574	
• Diagnosis and Treatment Planning 574 • Procedure 575 • Interception of Developing Skeletal Malocclusions 576 • Classification 579 • Interception of Class II Malocclusion 579	
• Interception of Class III Malocclusion 580	
49. Oral Habits and their Management	587
<i>Tapasya Juneja Kapoor, Gurkeerat Singh</i>	
• Definitions of Habits 587 • Classification of Habits 588 • Maturation of Oral Functions 589	
• Development of a Habit 590 • Etiological Agents in the Development of Oral Habits 590	
• Treatment Philosophy and Considerations 591 • Digit-sucking Habit (Thumb/Finger-sucking) 591 • Tongue Thrusting Habit 599 • Mouth Breathing Habit 605	
• Bruxism 609 • Lip Habits 611 • Cheek-biting 612 • Masochistic Habit 613	
• Postural Habit 614	

50. Etiology and Management of Class I Malocclusion	615
<i>Gurkeerat Singh</i>	
• Associated Problems 615 • Features of Class I Malocclusion 615	
• Correction of Class I Malocclusion 616	
51. Etiology and Management of Class II Malocclusion	619
<i>Gurkeerat Singh</i>	
• Classification of Class II Malocclusion 619 • Clinical Features of Class II Malocclusion 623	
• Etiological Considerations of Class II Malocclusion 624	
• Management of Class II Malocclusion 626	
52. Etiology and Management of Class III Malocclusion	631
<i>Gurkeerat Singh</i>	
• Clinical Features 632 • Etiologic Considerations 633 • Correction of the Class III Malocclusion 634 • Treatment of the Preadolescent Child 634 • Treatment of the Adolescent Child 635 • Treatment during Adulthood 638	
53. Correction of Midline Diastema	640
<i>Rajesh Ahal, Gurkeerat Singh</i>	
• Etiology 640 • Diagnosis 643 • Treatment Planning 644	
• Use of Removable Appliances 644 • Fixed Orthodontic Appliances 645	
• Role of Cosmetic Restorations/Prosthesis 646 • Retention 646	
54. Management of Open Bite	648
<i>Gurkeerat Singh</i>	
• Classification of Open Bite 648 • Etiology of Anterior Open Bite 648 • Anterior Open Bite 648	
• Skeletal Open Bite 651 • Dental Open Bite 651 • Correction of Anterior Open Bite 651	
• Posterior Open Bite 652 • Correction of Posterior Open Bite 653	
55. Management of Cross Bite	655
<i>Gurkeerat Singh</i>	
• Classification of Cross Bites 655 • Management of Anterior Cross Bites 659	
• Correction of Posterior Cross Bites 665	
56. Orthodontics for Adults	671
<i>Rajesh Ahal, Gurkeerat Singh</i>	
• Indications for Orthodontic Treatment in Adults 671 • Contraindications for Orthodontic Treatment in Adults 673 • Difference between Adolescents and Adults 673	
• Biomechanical Considerations when Treating Adults 673 • Types of Treatment in Adults 678	
• Retention and Relapse in Adults 682	
57. Management of Cleft Lip and Palate	685
<i>Puneet Batra, Ashish Garg, Gurkeerat Singh</i>	
• Historical Review 685 • Incidence 686 • Factor Influencing Incidence 686	
• Etiology of Cleft Lip and Palate 686 • Hereditary (Genetic Predisposition) 687	
• Congenital 687 • Embryological Background 688 • Theories of Cleft Lip and Palate 688	
• Possible Mechanism for Formation of Isolated Cleft Palate 688 • Classifications of Cleft Lip and Palate 688 • Problems Associated with Cleft Lip and Palate 693 • Management of Cleft Lip and Palate 695
