

## **Section 1 PHACO BASICS**

*Amar Agarwal, Priya Narang*

■ Diagrammatic Representation of the Connection of Air Pump to the Infusion Bottle	2
■ Internal Gas Forced Infusion	4
■ Viscoelastic being Injected with a 26 G Needle Attached to a 1 mL Syringe	6
■ Framing a Clear Corneal Incision	8
Location of the Incision	9
Size of the Incision	9
Plane of the Incision	10
■ Capsulorhexis being done with a Bent 26 Gauge Needle	11
■ Capsulorhexis Flap	12
■ Vertical Chop	15
■ Chopping the Nuclear Hemisegments	17
■ Pull out Nuclear Fragments from Bag and Emulsify	19
■ Bi-manual Cortical Aspiration	20

## **Section 2 CHALLENGING CASES**

*Amar Agarwal, Priya Narang*

■ Pseudoexfoliation	24
■ Deposition of Fluffy Amorphous Material Around the Pupil in Pseudoexfoliation	25
■ Pigment Deposition on Anterior Capsule	27

■ Posterior Synechia	28
■ Posterior Polar Cataract	30
■ Trypan Blue Enhanced Capsulorhexis being Performed in a Miotic, Fibrotic Pupil	32
Surgical Tips	33
■ Subluxation of the Lens and its Management	37
■ Modified Cionni's Capsular Tension Ring	39
■ Lenticular Coloboma	41
■ Iris Coloboma	43
■ Soemmering Ring	44
■ Posterior Lenticulus	46

### **Section 3 COMPLICATIONS**

*Amar Agarwal, Priya Narang*

■ Sleeveless Phacotip Assisted Levitation of Dropped Nucleus (SPAL) Technique—Step 1	50
■ Spal Technique—Step 2	53
■ Dropped Nucleus Lying on the Retina	54
Managing the Anterior Chamber	
Opacities and Herniated Vitreous	55
Posterior Vitrectomy and Phacofragmentation	56
■ Insulating the Retina with Perfluorocarbon	59
■ Principle of an Ophthalmic Endoscopic System	60
■ Removal of Entire Hard Lens Fragment with Perfluorocarbon	64

■ Management of Lens Coloboma with Glued IOL	69
■ Dislocated IOL on the Retina	72
Sleeveless Extrusion Cannula	
for Levitation of Dropped IOL	72
Surgical Technique	73
Perfluorocarbon Liquids	76
■ 25-G Chang Passive-Action IOL Forceps	78
■ Temporary Haptic Externalization	80
■ Removal of a Plate Haptic IOL	84
■ Management of Eyes with two Intraocular Implants	87
■ Endophthalmitis: Methods of Collecting Specimens	90
Clinical Features	91
Organisms Associated with Acute	
Postoperative Endophthalmitis	93
Delayed-onset Endophthalmitis	94
Propionibacterium Endophthalmitis	94
Diagnostic Workup and	
Microbiological Studies	96
Techniques of Specimen Collection	97
■ Endophthalmitis (Anterior Chamber Washout before Vitrectomy)	99
Antimicrobial Therapy	100
Corticosteroid Therapy	103
Vitrectomy	104
■ Cystoid Macular Edema	107
Macular Edema	108
Cystoid Macular Edema	108
Cme and AcioI—Possible Pathophysiology	112
Clinical Appearance of CME	113

Macular Function Tests in Cystoid Macular Edema	116
■ <b>Optical Coherence Tomography in CME</b>	116
Sequela of CME: Post-CME Lamellar Hole	117
Prophylactic Treatment	118
Therapy for Established CME	119
■ <b>Glued IOL</b>	123
■ <b>Glued IOL (Continued)</b>	125
■ <b>Traumatic Iridodialysis</b>	127
■ <b>Boston Keratoprosthesis (KPro)</b>	129
■ <b>Decentration of the Capsular Bag and IOL</b>	131
■ <b>IOL Scaffold</b>	132
■ <b>Glued IOL Scaffold</b>	134
■ <b>Pre-Descemet's Endothelial Keratoplasty with Glued IOL</b>	137
Surgical Considerations for Combined Procedure	140
Surgical Technique	140
■ <b>Preoperative and Postoperative Image of Patient of PDEK with Glued IOL</b>	142
Refractive Concern	144

## **Section 4 MICROINCISION CATARACT SURGERY (PHAKONIT AND MICROPHAKONIT)**

*Amar Agarwal, Priya Narang*

■ <b>Clear Corneal Incision Made with a Special Knife (MST, USA)</b>	146
■ <b>Capsulorhexis Initiated with a Needle</b>	148

■ MST Rhexis Forceps used to Perform the Rhexis in a Mature Cataract	150
■ Designs of Agarwal Irrigating Choppers	151
■ Phakonit Irrigating Chopper and Phako Probe without the Sleeve Inside the Eye	152
■ Phakonit being done	154
■ Bimanual Irrigation Aspiration Completed	155
■ Soft Tip Irrigation-aspiration from MST, USA	156
■ Thinoptx Roller Cum Injector Inserting the IOL in the Capsular Bag	157
■ Comparison between Phaco Foldable IOL and Phakonit Thinoptx IOL	158
■ Microphakonit	160
■ Microphakonit Completed. The Nucleus has been Removed	162
■ Bimanual Irrigation-aspiration with the 0.7 mm Set	164
■ Bimanual Irrigation-aspiration Completed	165
