

Contents

1. Physical Principles of Ultrasound Imaging	1
<i>Thomas Gauthier, Joseph Introcaso, Marnix van Holsbeeck</i>	
• Fundamental Principles	1
• Equipment	3
• Imaging	5
• Transmission Ultrasound	7
• Contrast-Enhanced Ultrasound	8
• Ultrasound-Based Elastography	9
2. Artifacts in Musculoskeletal Ultrasound	12
<i>Thomas Gauthier, Marnix van Holsbeeck, Joseph Introcaso</i>	
• The Good	12
• The Bad	16
• The Ugly	21
3. Sonography of Muscle	26
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Examination Technique	26
• Normal Sonographic Anatomy	29
• Muscle Pathology	33
4. Sonography of Tendons 	105
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Examination Technique	105
• Sonographic Tendon Anatomy	111
• Sonographic Diagnosis of Tendon Pathology	115
5. Sonography of Bursae 	188
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Examination Technique	188
• Normal Sonographic Bursal Structure	189
• Pathology of Bursae	197
6. Sonography of Ligaments 	248
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Examination Technique	248
• Normal Sonographic Structure of Ligament	249
• Ligament Pathology	253
7. Sonography of Peripheral Nerves	286
<i>Ruth Ceulemans</i>	
• Upside of Ultrasound Imaging	287
• Drawbacks of Ultrasound Imaging	287
• Examination Technique	288
• Normal Sonographic Anatomy of Peripheral Nerves	288
• Nerve Pathology	289

8. Pathophysiology and Common Patterns of Disease	320
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Muscle Rupture	320
• Tendon Rupture	322
• Tendinosis	355
• Chronic Overuse and Mesenchymal Syndrome	356
• Ligament Tears	363
• Nerve Injury	365
9. Sonography of Large Synovial Joints	379
<i>Marnix van Holsbeeck, Joseph Introcaso</i>	
• Examination Technique	379
• Normal Sonographic Anatomy	381
• Sonography of Articular Pathology	383
• Periarticular Disease	421
10. Pediatric Musculoskeletal and Spinal Sonography	444
<i>Michael DiPietro, H Theodore Harcke</i>	
• Developmental Dysplasia of the Hip	444
• Epiphyseal Alignment and Fractures	462
• Extremity Deformities	466
• Inflammation and Infection	466
• Fibromatosis Colli	472
• Brachial Plexus	474
• Spinal Canal	474
• Normal Variants and Hydromyelia	487
11. Sonography of the Dermis, Hypodermis, Periosteum and Bone	499
<i>Man Lu, Marnix van Holsbeeck, Joseph Introcaso</i>	
• Skin and Subcutaneous Tissue	499
• Examination Technique	500
• Normal Sonographic Anatomy	500
• Pathologic Findings	501
• Periosteum and Bone	514
• Examination Technique	517
• Normal Sonographic Anatomy	518
• Pathologic Findings	518
• Normal Variation and Measurement	551
12. Sonography of Rheumatoid Disease	560
<i>Andrea Klauser, Rethy Chhem, Marnix van Holsbeeck, Joseph Introcaso</i>	
• Early Diagnosis and Disease Activity	560
• Synovial Pannus and Fluid	562
• Bursal Involvement	565
• Cartilage	565
• Erosive Disease	569
• Enthesitis	571
• Differential Diagnosis	571
• Follow-Up of Rheumatoid Arthritis	573
• Scanning Techniques	574

• Complications of Rheumatoid Disease	581	
• Ultrasound-Guided Interventions	583	
• Limitations of the Ultrasound Examination	585	
• Advantages of the Ultrasound Examination	585	
13. Evaluation of Foreign Bodies		589
<i>Marnix van Holsbeeck, Joseph Introcaso</i>		
• Examination Technique	592	
• Ultrasound Versus Radiography	600	
• Specific Materials	603	
• Diagnostic and Therapeutic Approach to Foreign Bodies	612	
14. Sonographic Evaluation of Orthopedic Implants and Postoperative Pain Syndromes		617
<i>Marnix van Holsbeeck, Craig D Silvertan, Joseph Introcaso</i>		
• Arthroscopy Complications	617	
• Suture Granulomas	626	
• Heterotopic Ossification	627	
• Fracture Fixation Implants or Osteotomy Implants	627	
• Prostheses	634	
15. Interventional Musculoskeletal Ultrasound		662
<i>Marnix van Holsbeeck, Joseph Introcaso</i>		
• Examination Technique	662	
• Applications	672	
• Image-Guided Surgery	728	
• The Future of Musculoskeletal Ultrasound Intervention	729	
16. Sonography of the Shoulder and Upper Arm		737
<i>Peter Coombs, Ronnie Ptaszniak</i>		
• A Clinically Oriented Examination	737	
• Approaching the Shoulder	739	
• Ultrasound System Considerations	740	
• Sonographic Technique and Anatomy	741	
• Sonographic Appearances of Shoulder Pathology	757	
17. Sonography of the Elbow and Forearm		812
<i>Marnix van Holsbeeck, Donald Ditmars, Joseph Introcaso</i>		
• Elbow	812	
• Ultrasound of Elbow	813	
• Forearm	857	
• Ultrasound of Forearm	857	
18. Sonography of the Wrist and Hand		870
<i>Marnix van Holsbeeck, Donald Ditmars, Joseph Introcaso</i>		
• Technical Guidelines and Scanning Technique	870	
• Anatomy and Surface Landmarks of Wrist and Hand	876	
• Pathology	896	
19. Sonography of the Hip and Thigh		951
<i>Marnix van Holsbeeck, Joseph Introcaso</i>		
• Equipment and Positioning Requirements	952	
• Sonographic Technique and Anatomy	955	
• Pathology	965	

20. Sonography of the Knee and Lower Limb	996
<i>Alexander Blankstein</i>	
• Equipment, Positioning Requirements, and Sonographic Technique	997
• Clinical Points in the Evaluation of the Knee	1002
• Pathology	1005
21. Sonography of the Ankle and Foot	1040
<i>David Fessell, Marnix van Holsbeeck, Joseph Introcaso</i>	
• Equipment and Positioning Requirements	1040
• Sonographic Technique and Anatomy	1040
• Pathology	1047
22. Sonography of the Abdominal Wall and Chest	1073
<i>Catherine Brandon</i>	
• Abdominal Wall	1073
• Ultrasound of the Abdominal Wall	1073
• Chest Wall	1089
• Ultrasound of the Chest Wall	1089
23. Musculoskeletal Telemedicine	1103
<i>Ashot E Sargsyan, Scott A Dulchavsky</i>	
• Telemedicine and Teleultrasound Background and Review of Literature	1104
• Feasibility and Promise of Musculoskeletal Teleultrasound	1105
• The Use of the International Space Station as a Testbed for Remotely Guided Musculoskeletal Ultrasound	1105
• Definition of a Teleultrasound System	1106
• Development and Adaptation of the ISS Teleultrasound System for Musculoskeletal Ultrasound	1106
• Recommended Features of a Terrestrial Teleultrasound System	1107
