Contents in Detail

Part 1: Structure and Properties of Dental Materials

1. Overview of Dentistry and Dental Materials	3
Dental Treatment	3
Maintenance Phase	5
The Dental Specialties	5
The Dental Laboratory	6
Classification of Dental Materials	6
International Standards Organization (ISO)	7
US Standards for Dental Materials	8
2. Structure and Properties of Dental Materials	9
Structure of Matter	9
Interatomic Bonds	10
Crystal Structure	11
Noncrystalline Structure	12
Stress and Strain	12
Diffusion	12
Surface Tension	12
Wetting	13
Properties of Dental Materials	14
Mechanical Properties	14
Stress	14
Strain	15
Complex Stresses	15
Poisson's Ratio	16
Proportional Limit	16
Elastic Limit	16
Yield Strength	16
Modulus of Elasticity	17
Flexibility	17
Resilience	17
Impact	18
Impact Strength	18
Permanent Deformation	19
Strength	19
Weibull Statistics	21
Stress Concentration	22
Fatigue	22
Toughness	23
Brittleness	23
Ductility	23
Malleability	23
Hardness	24
Abrasion Resistance	25
Rheology	25
Terms and Properties in Rheology	26
Physical Properties	27
Forms of Matter	27
Melting Point	28
Boiling Point	28
Density	28
Glass Transition Temperature (TG)	28
Solubility	29
Thermal Properties	29
Thermal Conductivity	29
Thermal Diffusivity	30
Thermal Expansion	30
Coefficient of Thermal Expansion (CTE)	30
Optical Properties and Color	31
Dimensions of Color	31
Measurement of Color	32
Metamerism	32
Tooth Esthetics	32
Transparency, Translucence, and Opacity	32
Fluorescence	33
Clinical Considerations	34
Radiological Properties	34
Magnetic Properties of Matter	36
Classification	36
Terms	36
Types	37
Uses	37
3. Structure and Properties of Metals and Alloys	39
Uses in Dentistry	39
Metallurgy	42
Periodic Table	42
General Properties of Metals	42
Valence Electron	42
Metallic Bonding	43
Alloys	43
Phase	44
Solid Solutions	44
Dental Applications	46
Solidification and Microstructure of Metals and Alloys	46
Time-temperature Graph	48
Equilibrium Phase Diagrams	49
Eutectic Alloys	50
Peritectic Alloys	51
Solid State Reactions	52
Classification of Alloys	54
Functions of Alloying Elements	54

4. Electrochemical Properties of Materials	56	7. Cavity Liners and Varnish	80
Definitions	56	Cavity Liners	80
Electromotive Force Series (EMF)	57	Supplied as	80
Classification of Corrosion	58	Composition	80
Types of Electrolytic Corrosion	58	Properties	80
Factors Affecting Corrosion of Restorations in the Mouth	60	Manipulation	81
Protection against Corrosion	60	Other Liners	81
5. Biological Properties of Dental Materials	61	Cavity Varnish	81
Biomaterials	61	Application	81
Biological Requirements of Dental Materials	61	Supplied as	81
Classification of Materials from a Biological Perspective	62	Composition	81
Biohazards Related to the Dental Materials	62	Properties	81
Biological Considerations of Restoration Design	63	Manipulation	82
Physical Factors Affecting Pulp Health	64	Precautions	82
Classification of Adverse Reactions from Dental Materials	65	Clinical Considerations	82
Toxicity Evaluation	66	Contraindications	82
Therapeutic Effects of Dental Materials	67	Fluoride Varnishes	82
Osseointegration	67	Composition	83
Effect of Pressure on Tissues	67	Manipulation	83
Effect of Pontic Design	68	Contraindications	83
Effect of Material – Porcelain versus Resin	68	8. Dental Cements	84
Infection Control	69	Classification	84
		General Structure	85
		Uses of Cements	85
		General Properties of Cements	86
		Silicate Cements	88
		Zinc Phosphate Cement	88
		Applications	89
		Classification	89
		Available as	89
		Composition	89
		Manufacture	90
		Setting Reaction	90
		Properties	91
		Manipulation	92
		Advantages and Disadvantages of Zinc Phosphate	93
		Copper Cements	93
		Applications	94
		Classification	94
		Composition	94
		Properties	94
		Manipulation	94
		Zinc Polycarboxylate Cement	94
		Applications	95
		Available as	95
		Composition	95
		Manufacture	96
		Setting Reaction	96
		Properties	96
		Manipulation	97
		Advantages and Disadvantages	98
		Zinc Oxide Eugenol Cement	98
		Classification (ISO 3107:2011)	99
6. Introduction to Restorations, Luting and Pulp Therapy	73		
Restorations	73		
Temporary Restorations	73		
Intermediate Restorations	74		
Requirements of a Temporary Filling Material	74		
Permanent	74		
Direct and Indirect Restorations	75		
Esthetic and Nonesthetic	75		
Luting	75		
Types	75		
General Requirements of Luting Materials	76		
Pulp Capping	76		
Criteria for Pulp Capping	76		
Types of Pulp Capping	77		
Bases	77		
Types	78		
Properties	78		
Clinical Considerations	79		
Liners and Varnish	79		

Available as 99
 Composition 100
 Setting Reaction 100
 General Properties of Zinc Oxide Eugenol Cements 101
 Manipulation 102
Modified Zinc Oxide Eugenol Cements 102
 Eba-alumina Modified Cements 102
 Polymer Reinforced Zinc Oxide Eugenol Cement 104
 Other Zinc Oxide Eugenol Products 105
Zinc Oxide/Zinc Sulphate Cements 105
Glass Ionomer Cements 106
 Application 107
 Classification 107
 Available as 107
 Composition 108
 Manufacture 109
 Setting Reaction 109
 Properties 110
 Manipulation 111
 Packable Glass Ionomer for Posterior Restorations 114
 Fissure Sealing (Special Applications) 115
 Modified Glass Ionomers 115
Metal Modified Glass Ionomer Cement 115
 Types 115
 Uses 115
 Properties 116
Resin-modified Glass Ionomer 116
 Classification 116
 Supplied as 117
 Composition 117
 Setting Reaction 118
 Manipulation 118
 Properties 118
Calcium Hydroxide Cement 118
 Applications 119
 Available as 119
 Composition 119
 Setting Reaction 120
 Properties 120
 Manipulation 120
 Setting Time 120
 Light Activated Calcium Hydroxide Cement 121
 Calcium Hydroxide Root Canal Sealing Pastes 121
Resin Cements 121
 Applications 122
 Classification 122
 Supplied as 122
 Composition 123
 Polymerization 123
 Properties 123
 Manipulation and Technical Considerations 123
Compomer (Polyacid-modified Composite Resins) 124
 Applications 124

Supplied as 125
 Composition 125
 Setting Reaction 125
 Bonding and Curing 126
 Manipulation 126
 Properties 126
 Advantages and Disadvantages 127

9. Dental Amalgam 128

Indications 129
 Contraindications 129
 Classification of Amalgam Alloys 130
 Manufacture of Alloy Powder 130
 Supplied as 131
 Composition 132
 Comparison of Lathe Cut and Spherical Alloys 133

Low Copper Alloys 133

Composition 133
 Available as 134
 Setting Reaction 134

High Copper Alloys 135

Admixed Alloy Powder 135

Types 135
 Composition 135
 Setting Reaction 136

Single Composition Alloys 137

Composition 137
 Setting Reaction 137
 Advantages/Disadvantages of Spherical High-copper Amalgam 137
 Properties of Set Amalgam 138
 Technical Considerations 143
 Mulling 148
 Condensation 148
 Shaping and Finishing 150
 Amalgam Bonding 151
 Mercury Toxicity 152
 Amalgam Disposal 153
 Advantages and Disadvantages of Amalgam Restorations 154

10. Direct Filling Gold 156

Applications 157
 Contraindications 157
 Types 157
 Composition and Purity 158

Gold Foil 158

Manufacture 158
 Supplied as 158

Electrolytic Precipitate 159

Available as 160
 Mat Gold 160
 Mat Foil 160
 Alloyed Electrolytic Precipitates 160

Powdered Gold 160

Manufacture 160
 Available as 160

<i>Manipulation of Direct Filling Gold</i>	161
<i>Properties of Compacted Gold</i>	164
<i>Advantages and Disadvantages</i>	165
11. Resin-based Composites and Bonding Agents	167
Composite Resins	168
<i>Uses</i>	168
<i>Types</i>	169
Restorative Composite Resins	171
<i>Supplied as</i>	171
<i>Indications for Various Composite Resins</i>	172
<i>Composition and Structure</i>	172
<i>Polymerization (Setting) Mechanisms</i>	177
Microfilled Composite	181
<i>Composition</i>	181
<i>Clinical Considerations</i>	181
Hybrid Composite Resins	182
Nano and Nanohybrid Composite Resins	182
<i>Properties of Composite Resins</i>	182
<i>Problems in the Use of Composites for Posterior Restorations</i>	186
<i>Manipulation and Placement of Composite Resins</i>	187
<i>Techniques of Insertion</i>	188
<i>Finishing and Polishing</i>	189
Bonding	189
<i>Acid Etch Technique</i>	190
<i>Enamel Bond Agents</i>	192
<i>Enamel/Dentin Bond Systems</i>	192
<i>Repair of Composites</i>	196
<i>Sandwich Technique</i>	197
<i>Specialized Composite Resins</i>	197
<i>Advantages and Disadvantages of Restorative Composite Resins</i>	203

Part 3: Endodontic Materials

12. Endodontic Medicaments and Irrigants	207
Root Canal Irrigants	208
<i>Chemically Active Irrigants</i>	209
Intracanal Medicaments	211
<i>Phenol and Related Compounds</i>	212
<i>Antibiotics</i>	213
<i>Halogens</i>	214
<i>Quaternary Ammonium Compounds</i>	215
<i>Calcium Hydroxide</i>	215
<i>Chlorhexidine (CHX) Gluconate</i>	215
13. Endodontic Sealers and Obturating Materials	216
Root Canal Obturating Materials	217
<i>Silver Points</i>	217
<i>Gutta-percha</i>	218

<i>Paste-type Obturating Materials</i>	224
Root Canal Sealers	225
<i>Zinc Oxide-eugenol-based Sealers</i>	226
<i>Epoxy Resin-based Sealers</i>	228
<i>Calcium Hydroxide based Sealers</i>	229
<i>Glass Ionomer-based Sealers</i>	231
<i>Silicon-based Sealers</i>	231
<i>Mineral Trioxide Aggregate (MTA)</i>	232
Endodontic Solvents	237

Part 4: Impression Materials

14. Rigid Impression Materials—Impression Compound and Zoe Paste	243
<i>Advantages of Using a Cast or Model</i>	243
<i>Desirable Properties of an Impression Material</i>	244
<i>Classification of Impression Materials</i>	244
Rigid Impression Materials	245
Impression Compound	245
<i>Classification</i>	245
<i>Supplied as</i>	245
<i>Applications</i>	246
<i>Requirements of Impression Compound</i>	246
<i>Composition</i>	247
<i>Properties of Impression Compound</i>	247
<i>Manipulation</i>	248
<i>Removal of Impression from the Mouth</i>	249
<i>Disinfection</i>	250
<i>Pouring the Cast and Cast Separation</i>	250
<i>Advantages and Disadvantages</i>	250
Zinc Oxide Eugenol Impression Paste	250
<i>Classification</i>	251
<i>Available as</i>	251
<i>Composition</i>	252
<i>Setting Reaction</i>	252
<i>Microstructure</i>	252
<i>Setting Time</i>	252
<i>Properties</i>	253
<i>Manipulation</i>	254
<i>Impression Tray</i>	254
<i>Disinfection</i>	255
<i>Pouring the Impression</i>	255
<i>Advantages and Disadvantages</i>	255
<i>Other Zinc Oxide Pastes</i>	255
15. Elastic Impression Materials—Agar and Alginate	258
<i>Hydrocolloids</i>	259
Reversible Hydrocolloids—Agar	260
<i>Classification Based on Viscosity (ISO 21563:2013)</i>	260
<i>Uses</i>	260
<i>Supplied as</i>	261
<i>Composition</i>	261

Gelation or Setting of Agar 262
Manipulation 262
Impression Trays 263
Making the Impression 263
Working and Setting Time 263
Removal of Impression 263
Storage of Agar Impression 263
Separation from Cast 264
Properties of Agar Hydrocolloids 264
Laminate Technique (Agar–Alginate Combination Technique) 265
Wet Field Technique 265
Cast Duplication 265
Impression Disinfection 266
Advantages and Disadvantages of Agar Hydrocolloid 266

Irreversible Hydrocolloid—Alginate 267

Types 267
Supplied as 267
Applications 268
Composition 268
Setting Reaction 269
Properties of Alginate Hydrocolloid 269
Shelf Life and Storage 271
Manipulation 271
Mixing Time 272
Working Time 272
Gelation Time (Setting Time) 272
Tray Selection 272
Loading the Tray 273
Seating the Tray 273
Time of Removal and Test for Set 273
Removal of the Impression 274
Impression Disinfection 274
Storage of Alginate Impression 275
Construction of Cast 275
Advantages and Disadvantages of Alginate 276

16. Elastomeric Impression Materials 277

Chemistry and Structure of Elastomeric Polymers 278
Types 279
Uses of Elastomeric Impression Materials 280
Supplied as 280
General Properties of Elastomeric Materials 280
Polysulfides 282
Supplied as 282
Composition 282
Chemistry and Setting Reactions 282
Properties 283
Silicone Rubber Impression Materials 283
Types 284
Condensation Silicone 284
Supplied as 284
Composition 285
Chemistry and Setting Reaction 285
Properties 285

Addition Silicones (Polyvinyl Siloxane) 286

Supplied as 286
Composition 286
Chemistry and Setting Reaction 286
Properties 287

Polyether Rubber Impression Material 287

Available as 287
Composition 288
Chemistry and Setting Reaction 288
Properties 289
Manipulation of Elastomeric Impression Materials 289
Impression Techniques 291
Removal of the Impression 294
Infection Control 294
Impression Errors 294
Specialized Materials 297

Part 5: Dental Laboratory— Materials and Processes

17. Model, Cast and Die Materials 301

Types of Die Materials 302
Ideal Requirements of Die Materials 302
Alternate Die Materials 303
Improved Dental Stone or Die Stone 303
Advantages 303
Disadvantages 303
Electroformed/Electroplated Casts and Dies 303
Advantages 304
Disadvantages 304
Electroforming 304
Components of an Electroplating Apparatus 304
Composition of the Electroplating Bath 305
Procedure 305

Polyurethane 306

Mode of Supply 306
Indications 306
Properties 306
Manipulation 306

Epoxy Resin Die Materials 307

Advantages 307
Disadvantages 307
Available as 307

Refractory Cast for Wax Patterns 307

Refractory Cast for Ceramics 308

Die Stone-investment Combination (Divestment) 308

Divestment Phosphate or DVP 308

18. Gypsum Products 310

Applications 310
Classification 311

Type 1 or Dental Plaster, Impression 311
 Type 2 or Dental Plaster, Model, Mounting 312
 Type 3 or Dental Stone, Model 312
 Type 4 or Dental Stone, Die, High Strength, Low Expansion 313
 Type 5 or Dental Stone, Die, High Strength, High Expansion 313
 Manufacture of Gypsum Products 314
 Setting Reaction 315
 Theories of Setting 315
 The Microstructure of Set Gypsum 316
 Manipulation 317
 Setting Time 318
 Properties 321
 Setting Expansion 321
 Strength 322
 Hardness and Abrasion Resistance 323
 Flow 323
 Reproduction of Detail 323
 Specialized Gypsum Products 324
 Care of Gypsum 325
 Infection Control 326
 Differences between Dental Plaster and Dental Stone 326

19. Waxes in Dentistry

Components of Dental Waxes 327
 Chemical Nature of Waxes 327
 Classification of Dental Waxes 330
 General Properties 330
Pattern Waxes 331
 Inlay Casting Wax 332
 RPD Casting Wax 336
 Milling Wax 337
 Baseplate Wax 337
Processing Waxes 339
 Boxing Wax and Beading Wax 339
 Utility Wax 340
 Sticky Wax 340
 Carding Wax 340
 Shellac 341
Impression Waxes 342
 Corrective Impression Wax 342
 Bite Registration Wax 343

20. Dental Investments and Refractory Materials 345

Requirements of an Investment Material 345
 Classification of Refractory Materials in Dentistry (ISO 15912:2006) 346
 General Composition of Investments 346
Gypsum Bonded Investments 347
 Classification 347
 Uses 347
 Supplied as 347
 Composition 347
 Manipulation 348

Setting Reaction 348
 Setting Time 348
 Properties of Gypsum Investments 348
 Hygroscopic Thermal Inlay Casting Investment 351
 Investments for Casting High Melting Alloys 351
Phosphate Bonded Investment 351
 Uses 351
 Classification 351
 Supplied as 352
 Composition 352
 Setting Reaction 352
 Manipulation 352
 Properties 353
 Specialized Refractory Materials 354
Silica Bonded Investments 356
 Types 356
 Manipulation 356
Brazing (Soldering) Investment 356
 Uses 357
 Types 357
 Composition 357
 Properties 357
 Procedure 357

21. Dental Casting and Metal Fabrication Procedures 358

Metal Restorations in Dentistry 358
Casting 360
 Steps in Making a Small Cast Restoration 360
 Tooth/Teeth Preparation 360
 Die Preparation 360
 Die Spacer 360
 Wax Pattern 360
