

Contents

Section 1: Theory

1. General Physiology.....	3
• Transport Across Cell Membrane 3 • Body Fluid Compartments 7 • Intercellular Connections 8	
• Action Potential 9 • Recording of Membrane Potential 12 • Gibbs-Donnan Effect 13	
• Cell Structure 14 • Homeostasis 18	
2. Circulating Body Fluids.....	20
• Blood 20 • Plasma Proteins 20 • Hemoglobin 21 • Erythrocytes (RBC) 25 • Hemopoiesis 25	
• Leukocytes 30 • Platelets 32 • Blood Groups 37 • Immunity 39 • Lymphatic System 42	
3. Respiratory System.....	46
• General Principles 46 • Mechanism of Breathing/Ventilation 48 • Transport of Gases 57	
• Regulation of Respiration 60 • Applied Physiology 65 • High Altitude Physiology 71	
• Respiratory Changes in Exercise 73	
4. Cardiovascular System.....	76
• Organization of the Vascular System 76 • Hemodynamics 78 • Properties of Cardiac Muscle 79	
• Cardiac Cycle 86 • Arterial Pulse 92 • Heart Sounds 93 • ECG 94 • Heart Block 99 • Cardiac Output 102 • Stroke Volume 102 • Heart Rate 103 • Blood Pressure 108 • Coronary Circulation 112	
• Cerebral Circulation 113 • Cerebrospinal Fluid 114 • Pulmonary Circulation 115	
• Fetal Circulation 117 • Cutaneous Circulation and Triple Response 117 • Circulatory Shock 118	
• Cardiac Arrhythmias 122 • Cardiac Failure 123 • Cardiovascular Changes in Exercise 124	
5. Gastrointestinal System.....	127
• Physiological Anatomy of GIT 127 • Saliva 128 • Stomach and its Secretion 129 • Pancreatic Juice 134	
• Liver 135 • Gallbladder 137 • Small Intestine 139 • Large Intestine 140 • Movements of GIT 140	
• Gastric Movements 141 • Movements of Small Intestine 143 • Movements of Large Intestine/Colon 144	
• Digestion and Absorption 145 • Gastrointestinal (GI) Hormones 150	
6. Renal Physiology.....	153
• Nephron 153 • Juxtaglomerular Apparatus 155 • Renal Circulation 157 • Mechanism of Urine Formation 159 • Concentration of Urine 167 • Acidification of Urine 169 • Renal Clearance Tests 171	
• Micturition 172 • Diuresis 174 • Dialysis 175	
7. Temperature Regulation.....	178
• Central Regulation of Temperature 178 • Conditions of Heat Stress 180	
8. Endocrinology.....	182
• Pituitary Gland 184 • Thyroid Gland 192 • Parathyroid Glands 197 • Pancreas 202	
• Adrenal Cortex 207	
9. Reproductive System.....	215
• Abnormal Sexual Differentiation 215 • Male Reproductive System 215 • Female Reproductive System 219	
• Pregnancy 225 • Contraception 230	
10. Nerve and Muscle Physiology.....	233
• Neuron 233 • Neuromuscular Junction (NMJ) 238 • Skeletal Muscle 240 • Smooth Muscle 245	
• Cardiac Muscle 246	

11. Central Nervous System	249
• Synapse 249 • Receptors 257 • Reflexes 259 • Sensory System 264 • Motor System 271	
• Autonomic Nervous System 277 • Spinal Cord Lesions 279 • Vestibular Apparatus 282	
• Regulation of Posture 285 • Reticular Formation 290 • Cerebellum 291 • Thalamus 294	
• Electroencephalogram 296 • Sleep 297 • Basal Ganglia 299 • Hypothalamus 303 • Cortical Areas 306	
• Limbic System 309 • Higher Functions of Nervous System 309 • Learning and Memory 312 • Gait 314	
12. Special Senses	316
• Vision 316 • Audition 325 • Sensation of Taste 329 • Olfaction 330	

Section 2: Practicals

13. Hematology	335
• Determination of Erythrocyte Sedimentation Rate 335 • Packed Cell Volume (Hematocrit) 336	
• Estimation of Hemoglobin (Sahli's Method) 338 • RBC Count 340 • WBC Count 341 • DLC 342	
• Determination of Blood Group 343 • Reticulocyte Count 344 • Platelet Count 344 • Bleeding Time and Clotting Time 345 • Absolute Eosinophil Count 346	
14. Amphibian Experiments	347
• Gastrocnemius Muscle and Sciatic Nerve Preparation of Frog 347 • Recording of a Simple Muscle Curve 347	
• Effect of Two Successive Stimuli on Skeletal Muscle 348 • Effect of Temperature on Simple Muscle Twitch 349	
• Genesis of Fatigue 349 • Effect of Afterload and Free-Load on Muscle Contraction 350 • Genesis of Tetanus 351	
• Velocity of Nerve Impulse 352 • Amphibian Heart Experiments 352	
15. Clinical Examinations	357
• Clinical Examination Proforma 357 • Human Arterial Blood Pressure 358 • Examination of Respiratory System 359	
• Examination of Cardiovascular System 361 • Examination of Higher Functions and Sensory System 362	
• Examination of Motor System 363 • Examination of Cranial Nerve 366 • Examination of Reflexes 369	

Section 3: Extra Mile

16. Multiple Choice Questions.....	373
• Answers 408	
17. Reasoning Type Questions	410
18. Calculations	415
19. Question Bank.....	418
20. Common Laboratory Values	424
<i>Appendix.....</i>	<i>427</i>
<i>Index</i>	<i>431</i>
