

<b>1. History of Radiation</b>	<b>1</b>
❑ Key Definitions	3
❑ Discovery of X-radiation	3
❑ Chronology of Events in the Evolution of Dental Radiology	12
<b>2. Radiation Physics</b>	<b>15</b>
❑ Ionizing Radiation	18
❑ X-Radiation	21
❑ X-ray Production	22
❑ X-ray Tube	22
❑ Electricity/Electric Current and Circuits	25
❑ Transformers	26
❑ Working of the X-ray Tube	27
❑ Types of Radiation	29
❑ Factors Controlling the X-ray Beam	30
❑ Quality of the X-ray Beam	33
❑ Quantity of the X-ray Beam	34
❑ Half-Value Layer	34
<b>3. Radiation Biology, Hazards of Radiation and Radiation Protections</b>	<b>36</b>
❑ Direct Effect	37
❑ Indirect Effect	37
❑ Units of Measurement of Radiation	40
❑ Hazards of Radiation	41
❑ Dosimetry	45
❑ Radiation Protection	47
<b>4. Films Used in Dental Radiography</b>	<b>52</b>
❑ Film Composition	52
❑ Intraoral Films	54
❑ Extraoral Films	56
❑ Duplicating Films	57
<b>5. Grids, Intensifying Screens, and Cassettes</b>	<b>58</b>
❑ Grids	58
❑ Intensifying Screens	62
❑ Cassettes	64

<b>6. Processing of the X-ray Films</b>	<b>67</b>
❑ Latent Image	67
❑ Developer	68
❑ Developer Replenisher	70
❑ Fixer	70
❑ Fixer Replenisher	71
❑ Steps In Processing	71
❑ Darkroom	72
❑ Types of Processing	73
<b>7. Dental X-ray Image Characteristics</b>	<b>76</b>
❑ Visual Characteristics	77
❑ Geometric Characteristics	77
❑ Factors Influencing Diagnostic Quality of a Radiograph	78
<b>8. Causes of Faulty Radiographs</b>	<b>80</b>
❑ Faulty Radiographs Resulting from Faulty Radiographic Techniques	80
❑ Faulty Radiographs Resulting from Faulty Processing Techniques	84
<b>9. Intraoral Radiographic Techniques and Indications for Intraoral Radiographs</b>	<b>87</b>
❑ Paralleling Technique	87
❑ Bisecting Angle Technique	88
❑ Indications for Intraoral Periapical Radiograph	90
❑ Indications for Bitewing Radiograph	90
❑ Occlusal Projection	90
<b>10. Normal Anatomic Landmarks</b>	<b>94</b>
❑ Anatomic Landmarks Common to the Maxilla and the Mandible	94
❑ Anatomic Landmarks in the Maxilla	96
❑ Anatomic Landmarks in the Mandible	99
<b>11. Extraoral Radiography</b>	<b>103</b>
❑ Purpose of Extraoral Radiographs	103
❑ Lateral Jaw Projection	104
❑ Skull Radiography	106
❑ Lateral Cephalometric Projection	106
❑ Temporomandibular Joint Views	113
<b>12. Panoramic Radiography</b>	<b>118</b>
<b>13. Localization Technique</b>	<b>123</b>
❑ Indications	123
❑ Techniques	124

<b>14. Specialized Radiographs in Dental Radiology</b>	<b>127</b>
❑ Xeroradiography 127	
❑ Sialography 129	
❑ Conventional Tomography 131	
❑ Computerized Tomography 132	
❑ Magnetic Resonance Imaging 133	
❑ Ultrasound Technique 133	
❑ Nuclear Medicine 134	
❑ Thermography 135	
❑ Arthrography 135	
❑ Radiovisiography 135	
❑ Digital Panoramic Radiography 136	
<b>15. Radiographic Features of Dental Caries</b>	<b>138</b>
❑ Clinical Examination 138	
❑ Radiographic Examination 139	
❑ Classification of Carious Lesions based on Radiographic Appearance 139	
❑ Radiographic Differential Diagnosis of Dental Caries 144	
<b>16. Radiographic Features of Periodontal Disease</b>	<b>146</b>
❑ Use of Radiographs in the Diagnosis of Periodontal Disease 146	
❑ Limitations of Radiographs 147	
❑ Radiographic Features of Periodontal Disease 148	
❑ Juvenile Periodontitis 151	
<b>17. Radiographic Features of Traumatic Injuries: Fracture of the Teeth and Jaws</b>	<b>152</b>
❑ Traumatic Injuries Involving the Teeth 153	
❑ Traumatic Injuries Involving the Jaws 156	
<b>18. Inflammation and Infections of the Jaws</b>	<b>164</b>
❑ Infections of the Supporting Tissues of the Teeth 164	
❑ Pericoronitis and Pericoronal Infection 165	
❑ Periapical and Residual Infections 166	
❑ Osteomyelitis 168	
❑ Actinomycosis 169	
❑ Cellulitis 169	
❑ Ludwig's Angina 170	
<b>19. Cysts of the Jaws</b>	<b>171</b>
❑ Odontogenic Cysts 171	
❑ Nonodontogenic Cysts 174	

<b>20. Odontogenic Tumors</b>	<b>177</b>
❑ Epithelial Odontogenic Tumors without Inductive Changes	178
❑ Epithelial Odontogenic Tumors with Inductive Changes (Mixed Odontogenic Tumors)	179
❑ Mesodermal Odontogenic Tumors	183
<b>21. Benign and Malignant Nonodontogenic Tumors of the Jaws</b>	<b>185</b>
❑ Benign Tumors	185
❑ Malignant Tumors	189
<b>22. Fibro-Osseous Lesions</b>	<b>192</b>
❑ Fibrous Dysplasia	193
❑ Ossifying Fibroma	195
❑ Periapical Cemental Dysplasia	195
❑ Localized Fibro-Osseous-Cemental Lesions	196
❑ Florid Cemento-Osseous Dysplasia	196
❑ Cementoblastoma	197
❑ Juvenile Aggressive Ossifying/Cementifying Fibroma	197
❑ Cherubism	198
❑ Paget's Disease (Osteitis Deformans)	198
<b>23. Radiographic Features of Systemic Diseases</b>	<b>200</b>
❑ Disorders of the Endocrine System	200
❑ Metabolic Disorders	203
❑ Disorders of the Blood and Hematopoietic System	207
❑ Bone Disease of Unknown Origin	208
❑ Reactive Lesions	208
❑ Hereditary Diseases	209
<b>24. Pathologic Soft Tissue Calcification</b>	<b>210</b>
❑ Lymph Nodes	210
❑ Sialolith	211
❑ Antrolith	211
❑ Calcified Stylohyoid Ligament	211
❑ Osteoma	213
❑ Calcified Blood Vessel	214
❑ Myositis Ossificans	214
❑ Cysticercosis	215
❑ Dystrophic Calcification	215
<b>25. Radiographic Features of Diseases of the Maxillary Sinus</b>	<b>216</b>
❑ Inflammatory Changes	217
❑ Cystic Conditions	219

❑ Traumatic Conditions	219
❑ Tumors	220
<b>26. Radiographic Features of Temporomandibular Joint Disorders</b>	<b>221</b>
❑ Developmental Disorders	221
❑ Enlargement of Coronoid Process	223
❑ Ankylosis	223
❑ Degenerative Joint Disease	224
❑ Rheumatoid Arthritis	224
❑ Temporomandibular Joint Osteoma	225
❑ Neoplasms	225
<b>27. Infection Control in Dental Radiography</b>	<b>226</b>
❑ Protective Attire and Barrier Techniques	228
❑ Handwashing and Care of Hands	228
❑ Sterilization and Disinfection of Instruments	228
<b>28. Radiographic Differential Diagnosis</b>	<b>230</b>
❑ Radiolucencies with Definite Borders	230
❑ Anatomic Radiolucencies	231
❑ Radiolucencies Other than the Anatomic Radiolucencies	231
❑ Multilocular Radiolucencies	231
❑ Radiolucencies with Ill-defined Borders	232
❑ Generalized Rarefactions	232
❑ Pericoronal Radiolucencies	233
❑ Localized Radiopacities	233
❑ Periapical Radiopacities	234
❑ Generalized Radiopacities	234
