

Contents

1. Common Abbreviations Used in Laboratory Investigations	1
• Conventional Units	1
• SI Units (International System of Units)	2
2. Introduction.....	3
• The Probabilistic Nature of Diagnosis	3
• Purposes for Ordering Laboratory Tests	4
• Diagnosis	4
• Monitoring Therapy	4
• Screening	4
3. Sample Collection by Technical Personnel and Ward Sisters	5
• Procedure of Sample Collection	6
• Procedure of Venipuncture	8
• Order of Draw	8
• Sample Collection Order Form/Requisition	11
• Procedural Issues	12
• Performance of Fingerstick Collection	15
• Other Collection Issues	16
• Safety and Infection Control	19
• Troubleshooting Guidelines	20
• Blood Sampling System	24

4. SI Units and Conversion Tables.....	25
• Litre	25
• Gram	27
• Mole (Mol)	27
• International Unit (U)	28
• Conversion Factors between Conventional and System International Units (SIU)	28
5. Body Excreta Analysis.....	48
<i>Urine Analysis</i>	48
• Composition of Urine	48
• Gross Examination of Urine	51
• Multiple® Reagent Strips for Urinalysis	61
<i>Stool Examination</i>	79
6. Body Fluids Analysis.....	89
<i>Cerebrospinal and other Body Fluids</i>	89
• Cerebrospinal Fluid	89
• Pleural Fluid	92
• Pericardial Fluid (PF)	95
• Peritoneal Fluid	95
• Amniocentesis and Amniotic Fluid Analysis, Diagnostic	98
7. Sputum Examination.....	101
• Specimen Collection	101
• Sputum Examination	102

8. Laboratory Investigations	105
• Hematology 105	
• Serum, Plasma and Whole Blood Chemistries 108	
• Urine Chemistry 122	
• Immunodiagnostic Test 128	
• Cerebrospinal Fluid 131	
• Miscellaneous Values 132	
9. Profile of Laboratory Tests According to Body Systems	138
• Cardiovascular System 138	
• Pulmonary System 143	
• Neurological System 145	
• Hematological System 148	
• Endocrine System 154	
• Renal and Urologic System 160	
• Musculoskeletal System 164	
• Hepatobiliary–GI Systems 168	
• Reproductive System 174	
• Immune and Autoimmune Conditions 181	
• Tumors 184
