

Contents

1. Electromagnetic Radiations	1
<i>Shrikant Nagare</i>	
Properties of Electromagnetic Radiation	1
Classification of Radiation	1
Ionizing Radiation	1
2. Production of X-ray	3
<i>Yasmeen Khan</i>	
Mechanism of X-ray Production	4
Rotating Anode	5
Transformer	5
Autotransformer	6
Transformer Losses	7
Rectification	7
Electronic Timer	9
Cooling of X-ray Tube	9
Focal Spot	9
Anode Heel Effect	10
Spectrum Out of X-ray Tube	10
3. X-ray Interactions	12
<i>Aditi Dongre</i>	
Relative Importance of Photon Interaction to Radiography	12
Applications of Photoelectric Effect in Diagnostic Radiation	13
Attenuation	13
Scattered Radiation	15
4. Grids, Collimators, Filters	16
<i>Rajlaxmi Sharma</i>	
Grids	16
Filters	19
Special Types of Filters	20
Beam Restrictor: Collimators	21
5. X-ray Films	23
<i>Subodh Laul</i>	
Types of X-ray Films	23
Cassette	24
Processing of Exposed X-ray Films	27
Dry Imaging Cameras	30

6. Fluoroscopic Imaging	31
<i>Prashant Naik</i>	
Factors Affecting Image Quality	32
Lag	32
Distortion	32
Multiple Field Image Intensifiers	32
Cinefluorography	33
7. Image Quality	34
<i>Roshan Lodha</i>	
Blur	34
Density	35
Contrast	35
Distortion	35
8. Radiation Hazards and Protection	36
<i>Amol Sasane</i>	
Classification of Radiation Injury	36
Film Badge	40
9. Ultrasound Physics	42
<i>Anand Kamat</i>	
Velocity of Propagation	42
Measurement of Distance by Machine	42
Acoustic Impedance	42
Reflection	42
Refraction	43
Attenuation	43
Ultrasound Transducer	43
Presentation of Ultrasound Image on Monitor	44
10. Doppler	46
<i>Santosh Konde</i>	
11. Recent Advances in Ultrasound	54
<i>Shailendra Savale</i>	
Limitations of HIFU	57
Imaging Guidance and Monitoring of Therapy	57
Current Clinical Applications	58
High Intensity Focused Ultrasound Technology	58
Intravascular Ultrasound	58
Future Utility	61

12. Mammography	62
<i>Hariqbal Singh</i>	
Breast Imaging Reporting and Data System Classifications	63
13. Computed Tomography	64
<i>Varsha Rangankar</i>	
System Configuration	65
Window Settings	70
Typical Doses for Computed Tomography	71
Computed Tomography Image Quality	71
Image Artifacts	71
14. Magnetic Resonance Imaging	72
<i>Manisha Hadgaonkar</i>	
History	72
Physics	73
Magnetic Resonance Signal Localization	74
Special Sequences	75
Fast Magnetic Resonance Imaging Sequences	75
Magnetic Resonance Angiography	76
Functional Magnetic Resonance Imaging	77
15. Computed Tomography Contrast Media	78
<i>Hariqbal Singh</i>	
Iodinated Intravascular Agents	78
Oral Contrast	79
Treatment of Adverse Reactions	80
Magnetic Resonance Imaging Contrast	81
Ultrasound Contrast	83
16. Artifacts	85
<i>Hariqbal Singh</i>	
Artifacts in Conventional Radiography	85
Computed Radiography Artifacts	85
Ultrasound and Doppler Artifacts	86
Computed Tomography Artifacts	87
Magnetic Resonance Imaging Artifacts	89
17. Computed Radiography and Digital Radiography	93
<i>Shrikant Nagare</i>	
Computed Radiography	93
Direct Digital Radiography	94

18. Positron Emission Tomography-Computed Tomography	96
<i>Sikandar Shaikh</i>	
Tracers Used for Positron Emission Tomography	96
Lung Cancer	97
Lymphoma	97
Colorectal Cancer	97
Head and Neck Cancers	98
Skin Cancer	98
Gynecological Malignancies	98
Unknown Primary Tumors	98
19. Magnetic Resonance-Positron Emission Tomography	100
<i>Chandan Mishra</i>	
Neuro Applications of Magnetic Resonance Imaging-Positron Emission Tomography	100
Oncological Applications of Magnetic Resonance Imaging-Positron Emission Tomography	102
20. Single-photon Emission Computed Tomography	104
<i>Sikandar Shaikh</i>	
Gamma Camera	104
Radiolabeled Leukocytes	107
Additional Radiolabeled Molecules for Infection Imaging	107
21. Picture Archiving and Communication System	108
<i>Parvez Seikh</i>	
Picture Archiving and Communication System	108
Some Technical Features of Picture Archiving and Communication System	108
22. Planning of Radiology Department	113
<i>Raunaklaxmi Laul</i>	
Modalities	113
Planning Considerations	113
Safety Considerations and Protective Measures	115
Housing Modalities for Imaging Equipment	115
Maintenance and Management	119
23. Molecular Imaging	120
<i>Shrikant Nagare</i>	
Modalities Used for Noninvasive Molecular Imaging	121
Clinical Applications	122
24. Nuclear Medicine Physics	124
<i>Sujit Nilagaonkar</i>	
Basic Atomic and Nuclear Physics	124
Radioactive Decay	124
Radiation Detectors	125

Nuclear Medicine Imaging System 126
Production of Radioisotopes 127
Cyclotron 127
Technetium-99m 127
Radionuclide Scanning 128
Radionuclide Agents used in Neuroimaging 131

25. Miscellaneous 133
Hariqbal Singh

Resistors 133
Attenuation and Absorption 133
Tube Rating Charts 133
The Inverse Square Law 134
Darkroom 134
Safe Light 135
Negative Contrast Agents 135
Linear Tomography 136
Soft Tissue Radiography 136
Dental Film 137
Mobile Radiography 137
Film Badge 138
Thermoluminescence Dosimeter Badge 138
Mass Miniature Radiography 139
Radiation Units 139
Gamma Rays 140
Xeroradiography 140
P Value 141
Cloud Computing 142
Ultrasound Wireless Transducers 142
