1. Role of Ultrasound	1
2. Indications	2
3. Approach and Preparation	3
4. Common Pathologies Seen on Ultrasound	5
5. Normal Pelvis	7
5.1. <i>Normal Endometrium</i>	8
5.2. <i>Normal Myometrium</i>	24
5.3. <i>Normal Cavity</i>	27
5.4. <i>Normal Contour</i>	31
5.5. <i>Normal Intrauterine Contraceptive Device</i>	34
5.6. <i>Normal Vaginal Vault</i>	41
5.7. <i>Normal Adnexa</i>	44
6. Uterocervical Abnormalities	50
6.1. <i>Congenital Uterine Defects</i>	51
6.2. <i>Fibroids</i>	67
6.3. <i>Fibroid Polyp</i>	94
6.4. <i>Adenomyosis</i>	107
6.5. <i>Asherman's Syndrome</i>	120
6.6. <i>Endometrial Polyp</i>	125
6.7. <i>Endometrium: Abnormal Thickness and Echo Pattern</i>	141
6.8. <i>Cervical Polyp</i>	160
6.9. <i>Cervical Mass</i>	164
7. Adnexal Abnormalities	167
7.1. <i>Small Ovaries</i>	168
7.2. <i>Dysfunctional Cysts</i>	172
7.3. <i>Hemorrhagic Cyst</i>	179
7.4. <i>Cyst with Fluid-fluid Level</i>	190
7.5. <i>Cyst with Clot</i>	193
7.6. <i>Ovarian Tumor</i>	200
7.7. <i>Dermoid</i>	211
7.8. <i>Polycystic Ovaries</i>	218
7.9. <i>Endometriosis</i>	226
7.10. <i>Adnexal Mass</i>	242
7.11. <i>Hydrosalpinx</i>	250
7.12. <i>Pouch of Douglas</i>	256
7.13. <i>Ectopic</i>	258
7.14. <i>Free Fluid</i>	266
