

Contents

1. Controlled Ovarian Hyperstimulation for IVF Embryo Transfer and its Influence on Outcomes.....	1
<i>Manchi Bharucha, Faram E Irani</i>	
• Recent Advancements	1
• Endocrine Regulation of Ovarian Function and Folliculogenesis	3
• Unexpected Low or Poor Response in Women with Normal Baseline Hormonal Levels	5
• Exploring Uncharted Territories in Controlled Ovarian Hyperstimulation	5
• Newer Developments in Gonadotropin Research for Controlled Ovarian Hyperstimulation	8
• Frozen versus Fresh Embryo Transfer	10
• Correlation between Embryo Developmental Stage and Endometrial Status	10
• Maximizing Live Birth with Single Embryo Transfer	11
2. Individualized Controlled Ovarian Stimulation.....	16
<i>Abha Majumdar, Roshni Satija</i>	
• Patient Profile	16
3. Treatment for Poor Responders: Recent Consensus	24
<i>Trupti Mehta, Sangeeta Deshmukh, Meenal Khandeparkar, Firoza R Parikh</i>	
• The POSEIDON Stratification for Women with Poor Ovarian Response	24
• Etiopathology of Poor Ovarian Response	25
• Defining Ovarian Reserve	28
• Ovarian Reserve Tests	28
• Biological Markers	29
• Anti-Müllerian Hormone	29
• Discussion	30
• Management of Poor Ovarian Responders	31
• Pretreatment and Adjunctive Therapy	31
• Results of IVF Cycles with Full Dose Gonadotropins versus Natural Cycles versus Clomiphene Alone versus Letrozole Alone	33
• Future Prospects	35
4. IVF Lite: Is this the Future of Assisted Reproductive Technology?	40
<i>Gautam Nand Allahbadia, Goral Gandhi, Akanksha Allahbadia Gupta, Maham AS</i>	
• UAE Perspective	41
• Rationale of Deferred Embryo Transfer	41
• Modified Natural Cycle IVF	42
• Clomiphene Citrate or Letrozole	42
• Mild Stimulation versus Conventional Stimulation for IVF	43
• Poor Ovarian Reserve	43
• Older Women	44
• Minimal Stimulation and Single-embryo Transfer with Segmented IVF	45

• Mild Stimulation using Corifollitropin Alfa	45
• Neonatal Outcome after Minimal Stimulation	46
• Preimplantation Genetic Screening	46
• Interesting Case Reports	47
• Recent Advances	47
5. Luteal Phase Stimulation	50
<i>Markus Eckart Nitzschke, Nisha Bhatnagar, Payal Bajaj</i>	
• Luteal Phase Ovarian Stimulation	50
• Luteal Phase Stimulation Protocol	52
• Case Study	54
• Future Prospects	55
6. Downregulation in IVF Cycles	56
<i>Pratap Kumar</i>	
• Agonist Protocol by Long Suppression Method	56
• Antagonist Protocol	57
• Review of Literature	58
7. Role of Adjuvants in Controlled Ovarian Hyperstimulation: Recent Evidences	60
<i>Purnima Nadkarni, Aditi Nadkarni, Anuradha Rath, Urmila Sunda</i>	
• Adjuvants in Poor Responders	60
• Adjuvants in Hyper-responders	61
• Adjuvants in Normal Responders and Clomiphene Citrate Resistance	61
• Adjuvants for Endometrial Receptivity	61
• Adjuvants to Prevent Complications	63
8. Ovarian Hyperstimulation Syndrome	65
<i>Asha Baxi, Dhaval Baxi</i>	
• Pathophysiology	65
• Classification	66
• Risk Factors and Prediction of Ovarian Hyperstimulation Syndrome	67
• Prevention of Ovarian Hyperstimulation Syndrome	68
• Clinical Features	71
• Management	71
• Investigations	71
• Treatment	72
• Ovarian Hyperstimulation Syndrome and Pregnancy Outcome	73
9. Luteal Phase Support: Current Evidence	77
<i>Sadhana Desai, Partha Guha Roy</i>	
• Luteal Phase Deficiency	77
• Luteal Phase Support in ART Cycles	77
• Adjuvants in Luteal Phase Support	79
10. Endometrial Receptivity: Recent Advances	84
<i>Diksha Goswami, Narendra Malhotra, Jaideep Malhotra, Neharika Malhotra, Shally Gupta, Rishabh Bora</i>	
• What is Endometrial Receptivity?	84
• Impact of IVF Stimulation on Endometrial Receptivity	86

• Impact of Various Pathologies on Endometrial Receptivity	86
• Assessment of Endometrial Receptivity	87
• Measures to Improve Endometrial Receptivity	89
11. Influence of Endometrial Preparation Protocols on Embryo Implantation in Frozen Embryo Transfer	91
<i>Arunima Halder, Kamini A Rao</i>	
• Window of Implantation	91
• Role of Estrogen and Progesterone in Generation of the Endometrium	91
• Indications for Frozen Embryo Transfer	92
• Endometrial Preparation Protocols in Frozen Embryo Transfer	92
• Adjuvants used in Frozen Embryo Transfer Cycles	95
12. Deciding on the Moment of Embryo Transfer: Discovering the Window of Implantation in ART	100
<i>Mackens Shari, Racca Annalisa, Santos-Ribeiro Samuel, van de Vijver Arne, Christophe Blockeel</i>	
• The Window of Implantation in Assisted Reproductive Technology	100
• Molecular Endometrial Receptivity Testing	104
13. Freeze-all Strategy for All	108
<i>Jatin P Shah</i>	
• How did the “Freeze-all” Strategy Begin?	108
• Other Indications for “Freeze-all”	109
• Author’s Recommendations	111
14. Procedure in Assisted Reproductive Technology	114
<i>Kaberi Banerjee, Bhavana Singla</i>	
• What is Assisted Reproductive Technology?	114
• Artificial Insemination	114
• <i>In Vitro</i> Fertilization	116
• Preimplantation Genetic Screening or Preimplantation Genetic Diagnosis	117
• Assisted Hatching	118
• Cryopreservation	118
• Third-party Reproduction	118
• What is the Success Rate for ART?	119
15. Genetic Testing in Male Infertility.....	121
<i>Rahul Gajbhiye</i>	
• Male Infertility	121
• Genetic Basis of Sperm Motility Defects and Testing	126
• Recent Advances in Genetic Evaluation of Male Infertility	126
16. Medical Management of Male Infertility.....	129
<i>Niket Patel, Yuvraj Jadeja</i>	
• Pretreatment Investigations	130
• Medications	130
• Optimizing Surgical Sperm Extraction	134

17. Advances in Sperm Retrieval Techniques in Azoospermic Men	135
<i>Rupin Shah</i>	
• Indications for Operative Sperm Retrieval	135
• Sperm Retrieval Techniques	135
• Choice of Sperm Retrieval Method	137
• Complications of Operative Sperm Retrieval	138
• Hormonal Stimulation before Sperm Retrieval	139
• Predictors of Sperm Retrieval	139
18. Ultrasound in Infertility	142
<i>Asha Rao, Padmashri, C Rathilavanya, Vedapriya</i>	
• Evaluation of Uterine, Ovarian, and Adnexal Pathology	142
• Evaluation of the Uterus	142
• Evaluation of Ovaries	146
• Evaluation of other Adnexal Pathologies	148
• Role of Ultrasound in ART	148
• 3D US in Endometrial Receptivity	149
• Ultrasound-guided Procedures	149
19. Color Doppler in Infertility	151
<i>Sonal Panchal</i>	
• Baseline Scan and Deciding the Stimulation Protocol	151
20. Hysteroscopy in ART	160
<i>Divyesh V Shukla, Shilpi Shukla</i>	
• Investigations for Evaluation of Uterine Cavity	160
• Why Hysteroscopy?	161
21. Fertility-enhancing Surgeries in ART	172
<i>Sanjay Patel</i>	
• Hysteroscopic Tubal Cannulation	172
• Laparoscopic Tubal Microsurgery	172
• Laparoscopic Salpingo-ovariectomy, Fimbrioplasty, and Adhesiolysis	175
• Role of Salpingectomy Before IVF	175
• Role of Laparoscopy in Endometriosis	175
• Role of Laparoscopy in Fibroid of Uterus	176
• Laparoscopy for Polycystic Ovary Syndrome and Infertility	177
22. Newer Concepts in the Management of PCOS	181
<i>Duru Shah, Sabahat Rasool</i>	
• Diagnostic Criteria	181
• PCOS and Subfertility	181
• Ovarian Hyperstimulation Syndrome	183
23. Recent Advances in Endometriosis in ART	188
<i>Kanthi Bansal, Sugandha Goel</i>	
• Epidemiology	188
• Endometriosis and Infertility	188

• Medical versus Surgical Treatment: What is the Best Choice and What Comes First?	188
• Management of Ovarian Endometrioma	190
• Assisted Reproduction and Endometriosis	192
• Future Thoughts	193
24. Recurrent Implantation Failure	196
<i>Hrishikesh Pai, Unnati Mamtara</i>	
• Acquired Uterine Abnormalities	197
• Sperm DNA Fragmentation	198
• Gamete Donation and Surrogacy	199
25. Recurrent Pregnancy Loss: What's New.....	202
<i>Mala Arora</i>	
• Incidence	202
• Etiology	202
• Evaluation, Workup, and Treatment	207
• Hormonal Causes	209
• Unexplained Recurrent Miscarriage	210
• Prognostic Factors in Early Pregnancy Transvaginal Scan	211
26. Fertility Preservation: Newer Concepts	214
<i>Nalini Mahajan</i>	
• Effect of Chemotherapy and Radiotherapy on Gonads	214
• Fertility Protection and Preservation	215
• Fertility Preservation Techniques	216
• Future Directions	218
27. Third-party Reproduction	225
<i>Molina Patel, Nayana H Patel</i>	
• Egg Donation	225
• Embryo Donation	230
• Sperm Donation	231
• Surrogacy	231
• ICMR Code of Practice and Ethical Considerations in Gestational Surrogacy (Salient Points)	233
• Reproductive Tourism	233
• Disclosure to Children	233
28. Laparoscopic-assisted Uterus Retrieval from Live Organ Donors for Uterine Transplant: The Next Step in Infertility and a Giant Leap in Surgery.....	235
<i>Shailesh Puntambekar, Sambit Nanda</i>	
• Formulation of Team and Patients	235
• Presurgical Procedures	235
• Postoperative Procedures	240
• Discussion	241
29. Regenerative Medicine in Infertility	245
<i>Nayana H Patel, Molina Patel</i>	
• Platelet-rich Plasma	245
• Stem Cells	247

• Application of Regenerative Medicine in Infertility	249
• Future Prospects of Regenerative Medicine	252
• Issues Related to Use of Stem Cells	252
• Current Status of Stem Cells in India	252
• Clinical Studies at Akanksha Hospital and Research Institute	253
30. Quality Control in Embryology Laboratory	255
<i>Priya Kannan</i>	
• Importance of Quality Management	255
• Quality Management in IVF Laboratory	255
• Quality Control of Culture Systems	256
• Key Performance Indicators for Assisted Reproductive Technology Program	257
• Quality Control of IVF Laboratory Environment	257
• Quality Control of Equipment	258
• Quality Control IVF Laboratory Personnel	259
31. Newer Media in Embryology Laboratory	261
<i>Pankaj Talwar, Pooja Awasthi</i>	
• The Composition of Embryo Culture Media	261
• Advances in the Media	263
• Advances in Oils	263
• Type of Embryo Culture Media and Cell Culture	265
• Future of Embryo Culture System	266
32. Oocyte Quality and Markers	273
<i>Vijay Mangoli</i>	
• Morphological Assessment	274
• Oocytes with Abnormal Size and Shape	279
• Cellular Parameters and Oocyte Maturity	281
33. Influence of Controlled Ovarian Stimulation on Oocyte Quality	283
<i>Matheus Roque</i>	
• Does Ovarian Stimulation Exert an Effect on Oocyte/Embryo Quality?	284
• Does the Number of Retrieved Oocytes Affect the IVF Outcomes?	285
34. Optimizing Sperm Selection Methods	290
<i>Alpesh Doshi</i>	
• Considerations for Treatment Selection	290
• Sperm Selection Methods	292
35. Cryopreservation in ART	299
<i>Rajvi H Mehta</i>	
• Principles of Cryopreservation	299
• Removing Water from Cells	299
• Mechanisms of Cell Damage during Freezing	300
• Ideal Rate of Cooling	300
• Mitigating the Detrimental Effects of Freezing	300
• Factors Determining the Success of Cryopreservation	301

• Vitrification	301
• Mechanisms of Cooling during Vitrification	301
• Factors Determining the Success of Cryopreservation	302
• Cryopreservation in Assisted Reproductive Technology	302
• Cryopreservation of Embryos	303
• Cryopreservation of Oocytes	303
• India's Contribution to Human Embryo Cryopreservation	303
• Cryopreservation of Human Reproductive Tissues: The Purpose	303
• Purpose for Cryopreservation of Semen/Spermatozoa	303
• Purpose for Cryopreservation of Oocytes	304
• Purpose for Cryopreservation of Zygotes	304
• Cryopreservation Protocols	304
• Comparison of Slow Freezing versus Vitrification	305
36. Morphokinetics in ART	307
<i>Keshav Malhotra</i>	
• Time-lapse Technology: Different Systems Available Right Now	307
• Time-lapse Imaging: A Predictive as well as a Selective Tool	309
• Limitations of Existing Models	311
• Limitation of Morphokinetics	311
37. Preimplantation Genetic Screening and Diagnosis	314
<i>Yuvraj Jadeja, Niket Patel, Piyush Chudasama</i>	
• History of Preimplantation Genetic Diagnosis	315
• Indications for Preimplantation Genetic Testing	315
• Preimplantation Genetic Testing	315
• Sources of Genetic Material for Preimplantation Genetic Testing	315
• Protocols for Genetic Analysis	316
• Diagnostic Methods for PGD/PGS	317
• Mosaicism Challenge	319
• Recommendations for the Laboratory	319
• Recommendations for Clinicians	319
• Suggested Guidelines to Prioritize the Transfer of Mosaic Embryos	320
38. In Vitro Maturation	322
<i>Devika Gunasheela, Rajam Murali</i>	
• History	322
• Definition of IVM and its Controversies	323
• Physiology of Oocyte Maturation	323
• Why IVM and in Whom?	324
• Laboratory and Embryological Aspects of IVM	326
• Endometrial Preparation in IVM Cycles	327
• Safety of IVM	327
• The Gunasheela Experience	328
• Results	329
• IVM in Fertility Preservation	329

39. Microfluidics in ART	334
<i>Manish Pandya</i>	
• What is our Goal in Assisted Reproductive Technology?	334
• Embryologist Compatibility	336
• Andrology and Microfluidics	336
• Embryology and Microfluidics	336
• Embryo Culture	337
40. Co-culture Techniques in ART	342
<i>Harsha Bhadarka, Kruti Patel</i>	
• Mechanisms	343
• Autologous Endometrial Co-culture	343
• Autologous Cumulus Cell Co-culture	345
• Cumulus Co-culture Method	345
• Co-culture with Fallopian Tube Epithelial Cells	346
41. Oocyte Activation	349
<i>Takashi Yamaguchi, Keiji Kuroda, Masahiko Ito, Atsushi Tanaka</i>	
• Fertilization and Oocyte Activation	349
• Fertilization Failure	350
• Treatment of Fertilization Failure	350
42. Triple Parenting	355
<i>Harsha Bhadarka, Arpita Patel</i>	
• Indications	355
• Prevention in Next Generation	356
Index	363
